The Greatest Typewriter Bargain

Half-Price for New Olivers

Save
\$51

The identical Oliver Typewriter—Model 9—the latest and best—formerly priced at \$100—now costs you but \$49—monthly payments if desired

This great reduction in price is the result of the Oliver Typewriter Company's "direct-to-you" selling plan.

A \$2,000,000 guarantee that it is the same machine which formerly sold for \$100. Not a second-hand or rebuilt Oliver, nor earlier model.

Any stenographer can use the Oliver. It has the universal keyboard. She can do better work and more of it. It is exactly the same machine used by the U. S. Steel Corporation, National Biscuit Co., International Harvester Co., Bethlehem Steel Co., Pennsylvania R. R., Montgomery Ward Co., Hart, Schaffner & Marx, Morris & Co. and other large businesses. Over 600,000 sold.

Every Oliver carries the regular Oliver guaranteed service. These machines are famed for durability and simplicity. Get full exchange value for a used machine.

Telephone Randolph 500, or write at once to "Chicago Distributor." Better still, come to our office—159 N. Dearborn St. Then you will know of the Oliver plan for saving you \$51.

Machines shipped out of town on approval.

The Oliver Typewriter Co.

159 N. Dearborn St., Chicago
Chicago Distributing Headquarters

THIS SAVES YOU \$51.00

Ask for the Chicago manager. He will take your order or send an Oliver for inspection and demonstration. Ask for the sensational book which discloses how amazing wastes in selling were discovered and eliminated.

THE CHICAGO DAILY NEWS
ALMANAC
AND YEAR-BOOK

FOR

1918

EDITED BY JAMES LANGLAND, M. A.

PREFACE.

The Chicago Daily News Almanac and Year-Book for 1918 is devoted largely to the facts connected with the entry of the United States into the European conflict, which thus became a veritable world war. The reasons for abandoning the policy of neutrality so resolutely maintained by America until April, 1917, are given at length in numerous official documents from various sources, including the historical speeches made by President Wilson. Congress passed laws of the utmost importance to every citizen of the country and a large number of these acts are given in full. Much space is also devoted not only to the mobilization of the nation's military and naval forces but also to the marshaling of its civil forces and the concentration of its economic resources for war purposes. As will be seen by the records in this volume, it was truly a wonderful year in the history of America. The developments on the various battle fronts are fully outlined and the story of the sensational political developments in Russia, Greece and other countries directly affected by the conflict is comprehensively told.

This volume, however, is not merely a war history. It contains all the statistical and other matter relating to international, national, state and local affairs found in previous issues revised and brought down to date.

ALMANAC AND YEAR-BOOK FOR 1918

Astronomical calculations prepared by Berlin H. Wright, DeLand, Fla.

All the calculations in this Almanac and Year-Book are based upon mean or clock time unless otherwise stated. The sun's rising and setting are for the upper limb, corrected for parallax and refraction. In the case of the moon no correction is needed, as in the sun, for "parallax and refraction"; with her they are of an oppo-

site nature and just balance each other. The figures given, therefore, are for the moon's center on a true horizon such as the ocean affords.

The calculations in each of the geographical divisions of each calendar page will apply with sufficient accuracy to all places in contiguous zones indicated by the heading of the divisions.

BEGINNING AND LENGTH OF SEASONS.

THE GREAT SUN, SIRIUS, OR THE DOG STAR.

Sirius, the greatest of the starry hosts, seven times brighter than the brightest star of the northern heavens, was credited by the ancients with peculiar powers over nature. This belief is supposed to owe its origin to the fact that when he is the "bright and morning star," rising at early morning, the great Nile river of Africa mysteriously rises about twenty-five feet, overflowing the vast desert regions adjacent and thereby making them fertile with the rich material brought from the luxuriant tropical regions 2,000 miles above. Now Sirius is twenty times greater than our sun, and when he seemingly united his forces with those of the sun, rising about the same time, came also the hottest days of the year and the time of greatest sickness in the northern hemisphere. Hence the "dog days" of the forty days from about July 3 to Aug. 11, inclusive. South of the equator, of course, the seasons being reversed, these days fall six months later or earlier. Here we can see a reason for their belief that mad dogs and all other hot weather conditions were attributable

to the malign influence of this king of suns, which we know to be one million times more distant than our sun and whose influence upon us or our planet may well be compared to that of a pebble when dropped into the ocean. Sirius may be seen in the daylight by knowing just where to look, though so distant that a ray of his light is eight years in reaching us, traveling at the inconceivable speed of 186,000 miles in one second of time. The vastness of this distance has been well illustrated by the rate of motion of nerve sensation of the human body, as follows: When the tip of a finger is injured the news of such hurt must travel to the brain and the order of withdrawal be sent back to the finger point via the nerve route. As brief as that interval is, had one an arm long enough at infancy to reach out and touch the burning gases that surround that and all other suns and get the fingers burned, said infant would be several centuries old before the injured member could be withdrawn.

NOTE—To ascertain any day of the week first look in the table for the year required and under the months are figures which refer to the corresponding figures at the head of the columns of days below. For example: To know on what day of the week July 4 was in the year 1895, in the table of years look for 1895, and in a parallel

line, under July, is figure 1, which directs to column 1, in which it will be seen that July 4 falls on Thursday.

*1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1750 (Sept. 2-13 were omitted).—This Calendar is from Whitaker's London Almanack, with some revisions.

CHART OF THE HEAVENS.

EXPLANATION—The chart of the heavens shows all the bright stars and groups visible in the United States, Canada, Cuba and Hawaii. Stars of the third magnitude are sometimes shown in order to complete a figure.

If a bright, uncharted body be seen near the "ecliptic circle" it must be a planet. To locate the planets or moon refer to the monthly calendar pages in this almanac, find the proper signs on the chart in the "ecliptic circle" and an inspection of that part of the heavens, comparing with the chart, will serve to identify the planet and all surrounding objects.

Because of the earth's motion from west to east (opposite to the direction of the arrow in the chart), the stars rise 4 m. earlier each day or 30 m. per week or 2 hrs. a month. The chart shows the position at 9 p. m. Then if the

position for any other hour be desired, as for 7 p. m., count ahead one month, or back one month for 11 p. m., and so on for any hour of the night, holding the month desired in front as the face looks either to the north or south with name down.

A circle described from the zenith on the "zenith circle" for the desired latitude with a radius of 90 degrees (see graduated meridian) will show what stars are above the horizon. Thus Capella is near the overhead (zenith) point on latitude 40 degrees north Jan. 15, 9 p. m., as will be "big dipper" at 3 a. m. Then from Capella or two stars all the surrounding visible groups can be identified. The "pointers," being 5 degrees apart and always in sight, may be used as a convenient unit of measure; also when visible, the "belt of Orion," 3 degrees, or the sides of the "square of Pegasus."

NOTE—The above table is in mean local time and should be corrected for the standard time of the zone of the observer. The first column of each division shows the position of the planet on the ecliptic circle, as indicated by the Roman numerals and fractions. Example: Required the position of Venus June 21, when her

right ascension, as given above, is XII¹⁴-hours, which point, when found on the margin of the chart of the heavens and connected by a straight line with the north pole star, intersects the ecliptic circle very near the Pleiades, where Venus will be at that time.

LIBRARY OF CONGRESS.

The library of congress was established in 1800 in the city of Washington, D. C. It was burned in 1814 and in 1851 lost 35,000 volumes by fire. The present library building, which cost \$6,347,000, was opened to the public in November, 1897. It is located a short distance east of the capitol and is the largest and finest building of its kind in the world.

June 30, 1916, the library contained 2,451,974 books and pamphlets, 154,200 maps, 770,248 pieces

of music and 392,905 photographs, prints, engravings and lithographs. The copyright office is a distinct division of the library with its own force of employees. The total number of employees in the library is 551 and the annual cost of maintenance is now about \$850,000, including \$200,000 for printing and binding.

The librarian of congress is Herbert Putnam, salary, \$6,500; chief assistant librarian, Appleton P. C. Griffin, \$4,000.

LIGHT AND DARK OF THE MOON IN 1918.

Explanation: The light spaces represent three hours each and the entire width of the column under each month is the twelve hours from 6 p. m. to 6 a. m. Thus, by the chart it is apparent that in January, on the 1st, the moon will be rising about 9 p. m., or at the end of

the first division; at midnight on the 4th-5th; at 3 a. m. on the 8th-9th; at sunrise (new moon) on the 12th-13th, and will shine until 3 a. m. on the 22d-23d, and all night (full) on the 25th, 26th and after 9:30 p. m. on the 31st.

Explanation: By the absolute scale of magnitudes stars brighter than Aldebaran and Altair are indicated by fractional or negative quantities; thus Vega 0.2 and Sirius -1.4. As the magnitudes increase the brilliancy decreases, each increase of a unit being equal to a decrease of about two and one-half in brightness.

To ascertain when any star or constellation will be on the upper meridian add the number opposite in the column "For Meridian Passage" to the figures in the table on the previous page, "Sidereal Noon," taking note whether such figure be "Morn." or "Eve." If "Morn." and the sum is more than 12h. the result will be Eve. of same day; if "Eve." and the sum is more than

12h. the result will be Morn. of the next day. Having found the time of meridian passage, for the rising subtract and for the setting add the numbers opposite the star in the column headed "For Rising and Setting" (†) and observe the directions as to Morn. and Eve. given for the meridian passage. Those marked (.....) in the last columns are circumpolar. Stars having an asterisk (*) in the last columns are to be seen only in the far south and then when near the meridian, as the vapors of the horizon will prevent seeing them when they rise or set. To tell how high up from the nearest point of the horizon a star will be at its meridian passage subtract the star's declination from 90° and if the

result is less than the latitude of the place of the observer that star will neither rise nor set, but is circumpolar, and the difference between that result and the latitude shows the star's altitude above the north point of the horizon or below the southern horizon. Or (90° - dec.) - lat. = alt. or elevation of the star above the nearest point of the horizon at meridian passage for stars of a southern declination. Examples: Sidereal noon, Oct. 30, 9:27 p. m.

OTHER WORLDS AS SEEN FROM OURS IN 1918.

THE SUN—Almost the entire western continent will be favored in solar eclipses this year. A total eclipse of the sun is one of the most impressively sublime events in the realm of nature. In the word eclipse, meaning a failing, as one in a faint, we see a trace of the mental limitations of the coiners of the word back near the dawn of reason. When the pointed shadow of the moon is long enough to reach the earth as she swings between us and the sun, it traces a line in a general east and west direction across continents and oceans, limited in length only by the interval between the rising and setting of the sun, and that greatly shortened by the speed of the earth in its diurnal revolution, so that the actual interval is, in this case, reduced to about 4h. The higher the sun the slower will be the speed of the shadow spot and vice versa. Hence, in this eclipse of June 3, when the shadow first touches this continent at the northwest corner of the United States, its motion will be slowest, and when it leaves us on the coast of Florida, it will be greatest, being near sundown. Then, too, the width of the belt of totality and also the duration of the total phase will vary with the distance of the moon, decreasing with increased distance, and in the same eclipse varies with the position of the observer, being smallest where the shadow is most oblique, i. e., near the sunrise and sunset regions. It will also be apparent that the more oblique the shadow the greater will be its longitudinal diameter, which would give greater duration but for its consequent vast increase in speed. When the point of the dark shadow does not reach the earth the light shadow or penumbra yields a partial eclipse, similar to that on either side of the total belt to a distance of 2,000 to 3,000 miles. The duration of totality will vary from an instant to eight minutes. During the early life history of the moon it was much nearer to us than at present, so that total eclipses were of several hours' duration and arctic temperatures followed. Even a brief eclipse will cause a perceptible chill and dew to form. See under "Eclipses" for the details of the one of June 8.

MERCURY—See "Planets, Brightest," etc.

VENUS—Will be the brightest of the starry hosts at the beginning of the year, illuminating the eastern sky like a great electric light hanging up in Capricornus. (See "Chart of the Heavens.") When brightest, a small telescope will show only a thin crescent of light, similar to C in the annexed cut. She will diminish in apparent size and light from Jan. 5 until like H as we see the last of her as an evening star, passing between us and the sun. A good time to compare her phase with that of the moon will be Jan. 14-15, when she will be very close to the two or three day old moon and show identically the same phase.

The above will be easily understood when compared with the chart "Visibility of the Planets." The fact that she appears forty times larger at C and G than at A is due to her

Fomalhaut, dec. 30° S. $90^\circ - 30^\circ = 60^\circ$, — $40^\circ = 20^\circ$, altitude of Fomalhaut in latitude 40° at its meridian passage. To measure celestial distances with the eye keep in mind that one-third of the distance from the zenith to the horizon is 30° . For smaller measurements use the belt of Orion, 3° long, or the sides of the square of Pegasus; the "pointers" in the "big dipper," which are nearly 5° apart—a convenient celestial yardstick because always to be seen. In the case of a star whose dec. is such as to bring it nearer to the zenith than to a horizon at meridian passage, it will be more convenient to use its zenith distance as a means of locating it. The difference between the latitude and dec. is this zenith distance. If the dec. is greater than the latitude then such distance is to be counted northward, otherwise southward from the zenith.

greatly increased distance when on the opposite side of the sun from us. These phases prove to us that Venus is a dark solid body, shining by the reflected light of the sun, as do the moon and our planet—the earth, as seen from other worlds. By following the planets as they dodge about among the stars and star groups, or constellations, a fair knowledge of the heavens may be obtained.

At the first of the year Venus will be in Capricornus and moves east until Jan. 17, when after a brief rest she backs westward past the stars until lost in the light of the sun the last of January. The latter part of Febru-

- Just after inferior conjunction with the sun, Feb. 15-20.
- Fifteen days after superior conjunction with the sun, Dec. 8.

ary she appears on the other (west) side of the sun as a morning star; stationary March 1, and reaches her full glory as a morning star March 16, appearing as in C, having passed within 2° of the moon and again showing the same phase. April 2 she will be 2° north of Uranus, affording a most excellent opportunity of seeing and identifying this remote planet, using an opera glass or small telescope; to see him unaided is a good eye test; look out from a dark room. She reaches her greatest angular distance from the sun— 46° —April 21 and crosses the prime meridian of the heavens May 5, passing 6° south of the moon on May 7 and again on June 5 as she enters Aries. From June 21 to 26 she will be gliding along just south of the

Pleiades and on July 5 will be 4° north of Aldebaran with the moon 3° south; July 27 ½° south of Jupiter in Gemini, in a rich star field—Castor, Pollux and Procyon to the left, Sirius south, Betelgeuse to the right and below, while Capella is higher. Aug. 6 the moon passes 1° south of her and Venus will again be in conjunction with the moon Sept. 3. On the morning of Sept. 5 she will almost eclipse Saturn; their nearest approach will occur while they are about 1 hour below the horizon, but they will be strikingly close when rising—a most charming and unusual sight. Sept. 10 she will be only 1° north of the brilliant Regulus, in the end of the handle of the Sickle, rising about 1 hour before the sun and from this on her path lies too near the sun for good seeing.

MARS—Will be an attractive object in the evening skies throughout most of the year, being in eastern Leo at first, about midway between Regulus and Denebola. He will increase in brilliancy and rise earlier in the evening until March 15, and will be practically an all-night star throughout March. He advances past the stars until Feb. 4, when he becomes stationary and then retrogrades until stationary again, April 27, and then advances the remainder of the year, passing his point of nearest approach to the earth March 18, when brightest and very close to his position at the beginning of the year; Aug. 4 only 4° north of Spica and Aug. 25 3° south of Arcturus; Oct. 12-13 3° north of Antares; traverses the Milky Way Nov. 1-20, and keeps close company with the Milkmaid's Dipper in Sagittarius to the end of the month, being very dim at the close of the year. To an inhabitant of Mars the earth presents all the phases that the moon and Venus do to us, provided the Martians have the telescopes with which to view them.

JUPITER—Will be most favorably situated during the first part and last of the year; dim in May and invisible in June. When at his best he will be in the most interesting star field in the heavens—between the Pleiades on the west and the brilliant Castor and Pollux on the east; in conjunction with the moon Jan. 22, Feb. 18, March 17 and April 14, being from 1° to 4° south; visible in the evening twilight, he will be midway between Aldebaran and El Nath and in line with Sirius and Betelgeuse. In August he will again be seen, but as a morning star and much nearer Castor and Pollux just to the east. Procyon and Sirius to the south and the glories of Orion to the southwest. On Oct. 25, Nov. 25 and Dec. 19 the moon will pass about 5° south of him, being almost at his brightest and an all-night star at the close of the year.

SATURN—Will be most favorably situated in January and February, when brightest and an all-night star, when in the midst of very interesting star groups and constellations: The majestic Sickle close to the left, the Beehive or Praesepe to the right and that galaxy of celestial brilliants—Castor, Pollux, Procyon and Sirius—still farther to the right and below. His marvelously beautiful ring system, while steadily working into less favorable position for visibility, may still be seen fairly well, their inclination being from 11° to 15°, against a maximum of 28°; their southern surface being presented to our view.

URANUS AND NEPTUNE—See under Venus for a favorable time to catch Uranus early in April, but no such good mark for Neptune. Look for him about 1° south of the rich star cluster Praesepe in January and February.

HUNTER'S AND HARVEST MOON.

The full moon nearest to Sept. 21 is popularly known as the "harvest moon." This is because the moon then rises for several consecutive evenings at nearly the same hour, giving an unusual number of moonlight evenings. This is the most noticeable in the higher latitudes and quite disappears at the equator.

The "hunter's moon" is the first full moon following the harvest moon.

FACTS ABOUT THE SUN AND PLANETS.

Name.	Diameter, miles.	Distance from sun, miles.	Period of rev., days.
Sun	866,400		
Mercury	3,080	36,000,000	88
Venus	7,700	67,200,000	225
Earth	7,918	92,900,000	365
Mars	4,230	141,500,000	687
Jupiter	86,500	483,300,000	4,333
Saturn	73,000	886,000,000	10,759
Uranus	31,900	1,781,900,000	30,687
Neptune	34,800	2,791,600,000	60,181

The sun's surface is 12,000 and its volume 1,300,000 times that of the earth, but the mass is only 332,000 times as great and its density about one-quarter that of the earth. The force of gravity at the surface of the sun is twenty-seven times greater than that at the surface of the earth. The sun rotates on its axis once in 25.3 days at the equator, but the time is longer in the higher latitudes, from which fact it is presumed that the sun is not solid, at least as to its surface.

THE EARTH AND THE MOON.

Earth—The equatorial diameter of the earth is 7,926.5 miles and the polar diameter 7,899.5 miles; equatorial circumference, 25,000. The linear velocity of the rotation of the earth on its axis at the equator is 24,840 miles a day, or 1,440 feet a second; its velocity in its orbit around the sun is approximately nineteen miles a second, the length of the orbit being about 560,000,000 miles. The superficial area of the earth, according to Encke, the astronomer, is 197,108,580 square miles, of which two-thirds is water and one-third land. The planetary mass is about 256,000,000 cubic miles.

Moon—The moon has a diameter of 2,162 miles, a circumference of about 6,800 miles and a surface area of 14,685,000 square miles. Her mean distance from the earth is 238,840 miles. The volume of the moon is about 1-49th that of the earth and the density about 3% that of water. The time from new moon to new moon is 29 days 12 hours 44.6 minutes. The moon has no atmosphere and no water and is a dead world. Light takes the path of 136,300 miles per second. It requires 8 minutes and 8 seconds for light to come from the sun to the earth.

ECLIPSES IN THE YEAR 1918.

There will be three eclipses this year, as follows:

1. Total of the sun on the afternoon of June 8, visible as a partial eclipse throughout North America. In the United States the total phase will be visible from the state of Washington to Florida, in a belt about 120 miles wide at the west end and 50 at the east. From an elevation the moon's shadow may be seen advancing eastward over this track at terrific speed, making the 3,000 miles in forty-seven minutes. The speed will be least on the Pacific coast and greatest on the Atlantic. Along the Atlantic seaboard the sun will set more or less eclipsed. South of belt of totality the northern limb of the sun will be eclipsed and north of it the southern, and the size will decrease with the distance, about one digit, or one-twelfth of the diameter of the sun, every 240 miles. The cut shows the appearance of the sun with different numbers of digits eclipsed on either limb.

Figure 1—Appearance of the sun with 9 to 11 digits of the northern limb eclipsed. The 9 digit size will show through southern Texas and northern Mexico, southern Arizona, New Mexico and California; the 10 digit size in central Texas, New Mexico, Nevada and northern California; the 11 digit in southern Florida, Mississippi, Louisiana, northern Texas, Utah, Nevada, Oregon and southern Mississippi, Oklahoma, Colorado and Idaho.

Figure 2—Appearance of the sun with from 6 to 11 digits of the southern limb eclipsed. The 6 digit size will show in Maine, New Hampshire and Vermont; the 7 digit in New England and northern New York; 8 digits in New Jersey, Maryland, Delaware, Pennsylvania, upper Mich-

igan, Wisconsin, the Dakotas, Montana and northern Minnesota; 9 digit size in the Virginias, Ohio, northern Indiana and Illinois; southern Michigan, Wisconsin, the Dakotas and Montana; the 10 digit size in the Carolinas, Kentucky,

Walla close on the north, and reaches Baker City at 3:36; crosses the Snake river into Idaho at Huntington and Boise at 4:06-8, and reaches the southeast corner of the state at 4:15; crosses the two northeast corners of Utah and the southwest corner of Wyoming and reaches the northwest corner of Colorado at 4:20, leaving Salt Lake City and Ogden just to the south; thence over the mountains of northwest Colorado at Leadville, Denver, Boulder, Longmont, Cripple Creek and Colorado Springs at 4:24; Cheyenne, Laramie, Wyo., are close on the north and Trinidad, Pueblo, Col., on the south; enters Kansas near Tribune, passes over Dodge City and reaches Medicine Lodge at 5:30; enters Oklahoma near Alva and Ingersoll, reaching Guthrie at 5:32 and the Arkansas line at Waldron, south of Fort Smith, at 5:35, Oklahoma City being close to or on the south boundary, and Arkansas City and Tulsa on the north; passes across Arkansas to Greenville on the Mississippi river at 5:37, with Hot Springs close to the north; Little Rock and Pine Bluff but a trifle off and Texarkana a little farther south; crosses Mississippi to Meridian at 5:38, with Columbus and Wagona just north and Jackson and Vicksburg just south of the line; enters Alabama at Healing Springs at 5:39, leaving Mobile just to the south, and reaches the northwest corner of Florida at 5:40; sweeps across western Florida in one minute, and to Cedar Keys in one more, entering the Atlantic just south of Cape Canaveral at 5:42, De Funiak Springs, Leesburg and Orlando being near the middle of the path and Gainesville and DeLand just north of it, while Brooksville and Dade City are close to the south line.

The different phases will be visible as follows:

Tennessee, southern Indiana, Illinois, northern Missouri, Nebraska, Iowa, Montana; the 11 digit size in northern Florida, Alabama, Mississippi, Arkansas, Kansas, southern Missouri, Nebraska, northern Wyoming, Idaho and Washington.

Following is the standard time of the total eclipse and the names of the more important places within or very near the zone of the total eclipse:

Mount Olympus, Anderson and Grays Harbor in northwest Washington, 2:55; passes over Tacoma, Olympia, Mounts Rainier, St. Helena, Adams, etc., and reaches the Yakima Indian reservation at 3:00; crosses the Columbia river into Oregon at The Dalles, leaving Walla

Explanation: The light spaces represent one hour each and show the approximate time and extent of visibility, and with the superior planets, the comparative degree of brilliancy also. Thus Venus will be less than two hours east of the sun Jan. 1; between us and the

sun in February; at greatest distance west of the sun April 21, etc.; Mars, twelve hours from the sun March 15, rising at sunset, brightest and shining all night and close to the sun the last of the year.

THE PLANETS.

Morning stars, west of the sun—Mercury, Jan. 13-23 and Sept. 18-28, rising at early dawn, near where the sun will later rise; Venus, from Feb. 10 to Nov. 23; Mars, not this year; Jupiter, from June 13 to Oct. 8; Saturn, from Aug. 11 to Nov. 21.

Evening stars, east of the sun—Mercury, March 21 to 31 and Dec. 1 to 10, setting at close of twilight; Venus, until Feb. 10 and after Nov. 23; Mars, all the year; Jupiter, until June 15 and after Oct. 8; Saturn, until Aug. 11 and after Nov. 21.

Brightest or best seen—Mercury, within the time limits mentioned as an evening and morning star; Venus, Jan. 1 to 10 as an evening star and March 11 to 21 as a morning star; Mars, in March; Jupiter, not at his very brightest during the year, but best seen in December, being opposite the sun and brightest in January, 1919; Saturn, Jan. 15 to Feb. 15, being at opposition Jan. 31; Uranus, in August; Neptune, in January.

All-night stars or planets—Only superior planets, those outside the orbit of the earth, can gain positions opposite the sun, rising at sunset and shining all night. These in 1918 are: Mars, in March, being at opposition March 15; Jupiter, not this year, but very close to it in December; Saturn, Jan. 15 to Feb. 15, at opposition Jan. 31; Uranus, during August, opposition Aug. 19; Neptune, January-February.

Invisible or very dim—Mercury, at all other times than within the time limits stated above when an evening or morning star and brightest; Venus, Feb. 5 to 15, being at inferior conjunction Feb. 10, also Nov. 20 to 25, when at superior conjunction; Mars, not at all unless at the very last of the year; Jupiter, in June, being in conjunction with the sun June 15; Saturn, in August, being at conjunction Aug. 11, and Neptune and Uranus always.

SIGNS AND CONSTELLATIONS OF THE ZODIAC.

Until recently it was taken for granted that the present relationship between signs and constellations of the zodiac was generally understood, as all astronomical textbooks mention their disagreement and explain the cause. The numerous letters of inquiry concerning differences between the data in this almanac and certain others show the necessity for this note of explanation. (Both sign and constellation now given.)

Thousands of years ago when the zodiac, that belt of the heavens about 16° in width within which move the moon and planets, was formed and divided into twelve parts or seasons called signs, each containing certain star groups called constellations, each was given the name of an object or animal which never did bear any relationship to the configuration of the stars in that group or division, but which did or is supposed

to have reference to certain astronomical or other facts. Thus Libra =, the scales or balance, comes at the autumnal equinox when there is an equilibrium or balance between the length of day and night the world over. Aquarius, =, the water-bearer, whose sign is the Egyptian sign for running water, comes at the season of greatest rains in Egypt, and so on.

Since the time when these divisions were made and named, owing to the precession of the equinoxes, resulting from the differing polar and equatorial diameters of the earth, the signs have moved back west nearly a whole division or constellation and where ♈ was the first, ♊ now is. Hence, though the sun now enters the sign ♈ March 20, it is a month later when he enters the constellation ♈. It must be apparent, therefore,

that any supposed influence or relationship which early astrologers attributed to the position of the sun, moon or planets when in certain of these divisions can no longer exist, as the sign now only represents that space or division of the zodiac where the controlling constellation was 2,000 or more years ago, but is not now. Nevertheless, some almanacs still give the signs for the moon's place, which is very misleading to those who attempt to follow her in her course among the stars. Hence, this almanac gives both and discards the ancient picture of the disemboweled man as a relic of the age of superstition. The sign is retained for sun's place in connection with the seasons and sun's path through the zodiac each month because of its relationship to the equinoxes and solstices.

UNITED STATES PASSPORT REGULATIONS.

Passports are issued to citizens of the United States upon application to the state department in Washington. The application must be accompanied by an affidavit, attested by a notary public or other officer empowered to administer oaths, stating that the applicant is a citizen and giving the place of birth and age, and it must be accompanied by the certificate of one other citizen to whom he is personally known that the declaration made by the applicant is true. The application must also be accompanied by a description of the person, particularly as to age, height, complexion, forehead, eyes, nose, mouth, chin, hair and face. Blank forms are furnished by the state department upon application. The fee for each passport is \$1. Citizens traveling abroad may also in some cases obtain passports by applying to United States ambassadors and ministers. Where any person has made a declaration of intention to become a citizen of the United States and has resided in the United States for three years a passport valid for six months may be issued to him.

Owing to the war the state department was obliged in June, 1917, to issue stricter regulations governing the issue of passports. Applicants for passports were required to send in their applications so long in advance as to permit them to be held in the department one week, if deemed necessary, for examination. It was announced that during the continuation of the war passports would not be issued to naturalized American citizens within a period of six months after they have obtained naturalization, except in cases of extraordinary emergency. Such exceptions would not be made in cases of persons desiring to go abroad on commercial business.

TIME AND STANDARDS OF TIME.

Various kinds of time are in use in this country:

1. **Astronomical Time or Mean Solar Time**—This is reckoned from noon through the twenty-four hours of the day and is used mainly by astronomical observatories and in official astronomical publications. It is the legal time of the Dominion of Canada, though "standard" and "mean" time are in general use there as in this country.

2. **Mean Local Time**—This is the kind that was in almost universal use prior to the introduction of standard time. This time was based upon the time when the mean sun* crosses the meridian, and the day begins at midnight. When divided into civil divisions—years, months, weeks, days, etc.—it is sometimes called civil time.

3. **Standard Time**—For the convenience of the railroads and business in general a standard of time was established by mutual agreement in 1883 and by this calculation trains are now run and local time is regulated. By this system the United States, extending from 65° to 135° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour (7½° or 30m. on each side of a meridian), commencing with the 75th meridian. The first or eastern section includes all territory between the Atlantic coast and an irregular line drawn from Buffalo to Charleston, S. C., the latter city being

its southernmost point. The second or central section includes all the territory between this eastern line and another irregular line extending from Bismarck, N. D., to the mouth of the Rio Grande. The third or mountain section includes all the territory between the last named line and nearly the western borders of Idaho, Nevada and Arizona. The fourth or Pacific section includes all the territory of the United States between the boundary of the mountain section and the Pacific coast. Inside of each of these sections standard time is uniform and the time of each section differs from that next to it by exactly one hour, as shown on the map.

*Owing to the eccentricity of the earth's orbit and the inclination of the equator to the ecliptic, the apparent motion of the sun is retarded or accelerated according to the earth's place in its orbit. Hence, to take the actual sun as a guide would necessitate years, days and their subdivisions of unequal length. Therefore an imaginary or "mean sun" was invented. The difference between apparent and mean time is called the "equation of time" and may amount to a quarter of an hour in twenty-four hours. It is the difference between the figures in "Sun at noon mark" column in calendar and twelve hours. The figures on a correct sun dial give the apparent time.

STANDARDS OF TIME.

The following is the table of times, based upon the meridians used by the United States and Canada:

NAME OF TIME.	Degrees.	Central meridian from Greenwich.	Nearest place.
Intercolonial or Atlantic.....	60	4 hours west.....	About 3¾ degrees east of Halifax, N.S.
Eastern.....	75	5 hours west.....	Between New York and Philadelphia
Central.....	90	6 hours west.....	St. Louis and New Orleans.
Mountain.....	105	7 hours west.....	Denver, Col.
Pacific.....	120	8 hours west.....	1½ degrees east of Sacramento, Cal.
Sitka.....	135	9 hours west.....	¼ degree east of Sitka, Alaska.
Tahiti.....	150	10 hours west.....	½ degree west of the island of Tahiti
Hawaiian.....	157½	10 hrs. 31 min. west.	Near center of Molokai.

It is obvious that to express the time of rising and setting of the sun and moon in standard time would limit the usefulness of such data to the single point or place for which it was computed, while in mean time it is practically correct for places as widely separated as the width

of the continent, and persons having obtained the mean time by the rising or setting of the sun or moon may easily ascertain the correct standard time of any event by making use of the following table and map:

The heavy dotted lines show the arbitrary (standard) divisions of time in the United States. The plus and minus marks on either side of the meridian lines show whether it is necessary to add to or subtract from the mean time of points east or west of these lines to arrive at actual

standard time. Example: Chicago is $2\frac{1}{2}^\circ$ east of the 90th meridian; therefore Chicago local time = $2\frac{1}{2} \times 4 = 10$ to be subtracted from mean time to standard time, and for Boston standard (eastern) time, 16m. must be subtracted from mean time.

WEATHER FORECASTS AND SIGNALS.

The operations of the weather bureau of the department of agriculture are based on observations of the weather taken at about 200 observatories throughout the United States at the same moment of time and telegraphed daily to Washington, D. C., and to other important cities. These observations, comprising barometric pressure, temperature, precipitation, winds, and clouds, are entered upon outline charts of the United States by means of symbols, forming the "daily weather map," from which the forecasts are made. These forecasts are issued every day for every state in the union, and whenever necessary special warnings are sent out of storms,

frosts, cold waves, heavy snows and floods. In addition to the main office in Washington, there are subordinate forecast centers in Chicago, New Orleans, Denver, San Francisco and Portland, Ore. Weather forecasts for a week in advance are now sent out from Washington.

The forecasts are first telegraphed to about 2,300 principal distributing points, whence they are further disseminated by telegraph, telephone and through the mail by means of forecast cards, rural free delivery slips and newspapers.

It is estimated that the total number of persons in the United States to whom the weather forecasts are available is more than 4,000,000.

WEATHER FLAGS.

When No. 4 is placed above No. 1, 2 or 3 it indicates warmer; when below, colder; when not displayed, the temperature is expected to remain

about stationary. During the late spring and early fall the cold-wave flag is used to indicate anticipated frosts.

STORM-WARNING FLAGS.

Small craft warning—A red pennant indicates that moderately strong winds are expected.

Storm warnings—A red flag with a black center indicates that a storm of marked violence is expected. The pennants displayed with the flags indicate the direction of the wind: Red, easterly; white, westerly (from southwest to north). The pennant above the flag indicates that the wind is expected to blow from the northerly quadrants; below, from southerly quadrants.

By night a red light indicates easterly winds and a white light above a red light westerly winds.

Two red flags, with black centers, displayed one above the other, indicate the expected approach of tropical hurricanes, and also of those extremely severe and dangerous storms which occasionally move across the lakes and northern Atlantic coast. Hurricane warnings are not displayed at night.

TORNADOES IN CENTRAL WEST AND SOUTH.

Tornadoes swept through portions of Kansas, Illinois, Kentucky, Tennessee, Arkansas and Alabama May 25, 26 and 27, 1917, killing more than 200 persons, injuring 800 or 900 others and destroying property valued at several million dollars. The first severe storm reported was on the 25th, when twenty-six persons were killed at Andale, Kas. On the 26th a heavy wind and rain storm, taking in some places the form of tornadoes, passed through the central part of Illinois. The places hardest hit were Mattoon and Charleston in Coles county. In Mattoon sixty-one persons were killed, while in Charleston thirty-three lives were lost and 300 persons were injured. The injured in Mattoon numbered between 300 and 500. Mattoon had 632 houses wrecked and 2,738 persons made homeless. The property loss there was placed at about \$1,000,000. In Charleston, where 400 houses were destroyed, the property loss was \$750,000. Some 2,500 persons were made homeless.

Relief was prompt and generous, coming in the shape of carloads of food from adjoining towns, clothing, tents, blankets, medicine, medical attendance and guards for protection. Red Cross and other agencies contributed help of

various kinds and cash donations were sent from the larger cities, while the legislature made an appropriation to help in the work of rehabilitation. Immediate aid was given by the people of Mattoon and Charleston whose residences escaped the storm and the victims were sheltered, fed and clothed until they were able to help themselves or get assistance from other sources.

On the 27th another series of storms passed through parts of Kentucky, Tennessee, Arkansas and Alabama, killing 160 persons and injuring about 550. In Clinton, Ky., twenty-five persons were killed and seventy-five injured. Sixteen were killed on the plantation of Syd L. Dodds, near Hickman, and thirteen lost their lives in the vicinity of Bondurant. In Fulton county, the southwestern tip of Kentucky, sixty-six persons were killed and more than 100 injured. In Alabama the mining camps at Sayre, Bradford and Carbon Hill reported forty-six fatalities, and in Tennessee Tipton, Dyer and Carroll counties reported thirty-four dead. In Mississippi county, Arkansas, across the Mississippi river from the Tennessee and Kentucky counties swept by the storm, ten were killed.

DANISH WEST INDIES UNDER AMERICAN FLAG.

Received from the Secretary of the Treasury of the United States of America the sum of \$25,000,000 gold, in warrant on the Treasury of the United States, numbered 15,225, and dated March 31, 1917, the same being in full payment of the obligation of the Government of the United States to the Government of Denmark as set forth in Article V of the Convention between the United States and Denmark for the cession of the Danish West Indian Islands to the United States, signed at the City of New York on August 4, 1916, the ratifications of which were exchanged at Washington on January 17, 1917; the payment being provided by an Act of Congress approved March 3, 1917, entitled "An Act to provide a temporary government for the West Indian Islands acquired by the United States from Denmark by the convention entered into between said countries on the fourth day of August, nineteen hundred and sixteen, and ratified by the Senate of the United States on the seventh day of September, nineteen hundred and sixteen, and for other purposes."

FACSIMILE OF DENMARK'S RECEIPT FOR \$25,000,000 PAID FOR WEST INDIAN ISLANDS.
[Copyright, 1917, Harris & Ewing.]

The Danish West Indies, now known as the Virgin Islands of the United States, were formally transferred from Danish to American sovereignty on Saturday, March 31, 1917. In Washington, D. C., the secretary of the treasury, William G. McAdoo, paid to Constantin Brun, the Danish minister, \$25,000,000, the sum stipulated in the treaty providing for the sale as the purchase price. News of the transaction was telegraphed and cabled to Charlotte Amalie on the island of St. Thomas, where Acting Governor Konow, representing Denmark, notified Commander Edwin T. Pollock of the United States ship Hancock that all conditions for the transfer had been complied with. The governor made a brief speech formally turning over the island to the United States and hauling down the Danish flag in the name of King Christian X. Commander Pollock made a short speech of acceptance, after which the American flag was run up. With the transfer the islands became known as the Virgin Islands of the United States, a designation chosen by the inhabitants and adopted by the Washington authorities.

The steps taken in the acquisition of the islands were briefly these: In 1867 Secretary of State William H. Seward entered into negotiations with Denmark for the purchase of the islands of St. Thomas and St. John for \$7,500,000, and a treaty was eventually signed. It was approved by a vote of the people of the islands, but was rejected by the United States senate March 23, 1870. On Jan. 24, 1902, a treaty was signed by Secretary of State John Hay and Constantin Brun, the Danish minister, for the sale to the United States of the islands of St. Thomas, St. John and St. Croix for \$5,000,000 in gold, but ratification was refused by a tie vote in the Danish rigsdag.

In 1916, while the war in Europe was engaging the attention of the world, negotiations for the transfer of the islands to America were resumed, and Aug. 4 a treaty was signed by Secretary of State Robert Lansing and Constantin Brun. It was approved by the United

States senate Sept. 7 and by a referendum vote in Denmark Dec. 14. Dec. 20 it was approved by the folkething in Copenhagen and by the landsting on the following day. Ratifications were exchanged Jan. 17, 1917, and, as already stated, the transaction was completed March 31.

AREA AND POPULATION.

The Virgin islands number about fifty, but only three are of sufficient size to be known by name to any but geographers and local inhabitants. The three main islands are named St. Thomas, St. Croix (or Santa Cruz, as the Spaniards called it) and St. John. The combined area of all the islands, large and small, is between 138 and 142 square miles and the total population is approximately 32,000.

St. Thomas has an area of 28.25 square miles and a population of 11,000. It is the most important in the group on account of its fine harbor. Most of the inhabitants, chiefly negroes, live in Charlotte Amalie, the only town on the island, and are dependent for subsistence upon the harbor and shipping. St. Thomas is capable of producing fruits, vegetables, coffee, tobacco, sugar cane and cotton, but cultivation of the soil has been neglected for many years. The harbor of St. Thomas lies on the direct line of communication between European ports and the entrance of the Panama canal, as well as in direct line for vessels plying between the Atlantic ports of the two Americas or between the Atlantic and Pacific ports of these continents. It is 1,400 miles from New York, 1,020 miles from the Atlantic entrance of the Panama canal, and 490 miles from La Guaira, the chief port of Venezuela. Its location commands the Virgin passage to the Caribbean sea, the easternmost gateway to that body of water.

St. Croix has an area of 84.25 square miles and a population of about 20,000. It is situated forty miles south of St. Thomas and St. John. Its surface is flat and is given over largely to plantations producing sugar, rum, cotton, vegetables and tropical fruits. Horses, cattle, goats, sheep, hogs and donkeys are also raised. There

are two towns, Frederiksted and Christiansted. The latter place, with a population of approximately 4,500, was the seat of the Danish colonial government. Frederiksted, though having a population of only 3,000, does about 80 per cent of the export and import business of the island, having a much better harbor than Christiansted.

St. John lies four miles east of St. Thomas and has an area of 21 square miles. It is only eight miles long by four miles wide, but it has a fine harbor at Coral bay. It is noted especially for the "bay" tree, the leaves of which are used in making bay rum. The island has between 900 and 1,000 inhabitants, nearly all of whom are colored. The largest settlement is at Cruz bay, with possibly 150 inhabitants.

FOREIGN TRADE.

The foreign trade of the islands has not been of great importance. Imports at St. Thomas for the fiscal year ended March 31, 1916, were valued at \$734,680, and this represents about 70 per cent of the imports of the three islands. Of this total the United States furnished \$332,286, the West Indies \$91,748, Great Britain \$38,411, Denmark \$50,778, France \$13,286, Holland \$12,601 and Germany \$1,195. The United States purchased \$273,625 worth of goods from the islands in 1915.

CLIMATE.

The climate of all the islands is healthful for whites, and during the cooler months is made enjoyable by the trade winds. The hottest weather is in August and September, but it seldom becomes oppressive and prostration from heat is unknown. In the year ended June 30, 1915, the temperature during the coolest weeks ranged from 65 to 83 degrees and during the hottest weeks from 76 to 92 degrees. The heaviest rainfalls occur in May and September-October.

GOVERNMENT.

Provision for the government of the newly acquired islands was made by the 64th congress at its closing session in the shape of an act entitled "An act to provide a temporary government for the West Indian islands acquired by the United States from Denmark by the convention entered into between said countries on the 4th day of August, 1916, and ratified by the senate of the United States on the 7th day of September, 1916." It declares that, except as otherwise provided, all military, civil and judicial powers necessary to govern the West Indian islands acquired from Denmark shall be vested in a governor and in such person or persons as the president may appoint, and shall be exercised in such manner as the president shall direct until congress shall provide for the government of the islands. The president may assign an officer of the army or navy to serve as such governor. The compensation of all persons appointed under the act shall be fixed by the president.

Until congress shall otherwise provide, in so far as compatible with the changed sovereignty and not in conflict with the provisions of the act, the laws regulating elections and the electoral franchise as set forth in the code of laws published at Amalienborg April 6, 1906, and the other local laws in force Jan. 17, 1917, shall remain in force in the islands and shall be administered by the civil officials and through the local tribunals. With the approval of the president, or under such rules as he may prescribe, any of the laws may be repealed or amended by the colonial council having jurisdiction. The jurisdiction of the judicial tribunals of the islands shall extend to all judicial proceedings and controversies in the islands to which the United States or any citizen thereof may be a party. In all cases formerly reviewable by the courts of Denmark writs of error and appeal shall be to the Circuit Court of Appeals for the 3d circuit.

On and after the passage of the act there shall be paid upon all articles coming into the

United States or its possessions from the West Indian islands ceded to the United States by Denmark the rates of duty and internal revenue taxes which are required to be paid upon like articles imported from foreign countries: Provided, that all articles the growth or product of, or manufactured in such islands from materials the growth or product of such islands of the United States, or of both, or which do not contain foreign materials to the value of more than 20 per centum of their total value, upon which no drawback of customs duties has been allowed therein, coming into the United States from such islands shall hereafter be admitted free of duty.

Until congress shall otherwise provide all laws now imposing taxes in the West Indian islands, including the customs laws and regulations, shall, in so far as compatible with the changed sovereignty and not otherwise herein provided, continue in force and effect, except that articles the growth, product or manufacture of the United States shall be admitted there free of duty: Provided, that upon exportation of sugar to any foreign country, or the shipment thereof to the United States or any of its possessions, there shall be levied, collected and paid thereon an export duty of \$8 per ton of 2,000 pounds irrespective of polariscope test, in lieu of any export tax now required by law.

The duties and taxes collected in pursuance of this act shall not be covered into the general fund of the treasury of the United States, but shall be used and expended for the government and benefit of said islands under such rules and regulations as the president may prescribe.

For the purpose of taking over and occupying the islands and of carrying this act into effect and to meet any deficit in the revenues of the islands resulting from the provisions of this act the sum of \$100,000 is appropriated, to be applied under the direction of the president of the United States.

The sum of \$25,000,000 is appropriated, to be paid in the city of Washington to the diplomatic representative or other agent of his majesty the king of Denmark duly authorized to receive the money, in full consideration of the cession of the Danish West Indian islands to the United States made by the convention between the United States of America and his majesty the king of Denmark entered into Aug. 4, 1916, and ratified by the senate of the United States Sept. 7, 1916.

This act, with the exception of the preceding paragraph, shall be in force and effect and become operative immediately upon the payment by the United States of the sum of \$25,000,000. The fact and date of such payment shall thereupon be made public by a proclamation issued by the president and published in the Danish West Indian islands and in the United States. The preceding paragraph shall become immediately effective and the appropriation thereby provided for shall be immediately available. (Approved March 3, 1917.)

Rear-Admiral James H. Oliver was appointed as the first American governor-general of the islands.

TORNADO IN INDIANA.

Nineteen persons were killed and 200 injured in Newcastle, Ind., by a tornado which swept through the southern part of the city from west to east Sunday afternoon, March 11, 1917. Fully 500 homes, most of them small frame structures, were destroyed or badly damaged. The property loss was estimated at \$1,000,000. The storm extended as far as Cincinnati, O., where it leveled thirty houses in the residential district of Hyde Park. Three persons were killed and about a score injured.

Forty-two persons were killed and about 100 injured in a storm which passed over New Albany, Ind., Friday afternoon, March 24, 1917. The property loss was estimated at \$1,133,000.

SECOND INAUGURATION OF PRESIDENT WILSON.

Owing to the fact that March 4, 1917, fell on a Sunday, Woodrow Wilson was not formally inaugurated president of the United States for his second term until March 5. He was, however, sworn in at 12:04 p. m. March 4 in the president's room at the capitol, Chief Justice Edward D. White of the United States Supreme court administering the oath of office. Mr. Wilson placed his hand on an open bible and repeated the following words after the chief justice:

"I do solemnly swear that I will faithfully execute the office of president of the United States and will, to the best of my ability, preserve, protect and defend the constitution of the United States."

As the chief justice finished reading these words the president kissed the bible and then both signed the oath inscribed on the flyleaf of the book, which was the same as that used at the first inauguration of Mr. Wilson in 1913. Not more than fifty persons witnessed the ceremony, which was marked by extreme simplicity.

The ceremonies attending the formal inauguration of President Wilson and Vice-President Marshall on March 5 followed in the main the old precedents, but because of the grave danger of a war with Germany and the action of a small group of senators in refusing to give him the power he desired to protect American lives and property at sea more than the usual solemnity marked the proceedings. The occasion was made a patriotic demonstration, the only colors used in the decorations of the capital being those of the American flag.

With the customary military escort the president and vice-president proceeded to the senate chamber in the capitol, where at noon the ceremonies of the day began with the swearing in of Vice-President Thomas R. Marshall in the presence of both the old and the new congresses, members of the cabinet, the diplomatic corps and a large assemblage of noted men and women from all parts of the country. The oath was administered to the vice-president by Senator Willard Saulsbury of Delaware, after which Mr. Marshall delivered his second inaugural address. It was brief and consisted of his creed of citizenship under a government for which, he said, "I ought to be willing to live or die, as God decrees, that it may not perish from off the earth through treachery within or through assault from without."

Immediately upon the conclusion of the ceremonies in the senate chamber a line of those within its walls was formed at 12:45 p. m. to escort the president to the inaugural amphitheater on the plaza before the east front of the capitol. There, in the open air, surrounded by senators and representatives, department officials, diplomats, governors and members of his family, the president had the oath of office administered to him in the same manner as on the previous day, but before a vast assemblage of people. The sun was shining, though the weather was too cold for comfort. After shaking hands with the chief justice and the vice-president Mr. Wilson read his inaugural address, which, in full, was as follows:

"My Fellow Citizens: The four years which have elapsed since last I stood in this place have been crowded with counsel and action of the most vital interest and consequence. Perhaps no equal period in our history has been so fruitful of important reforms in our economic and industrial life or so full of significant changes in the spirit and purpose of our political action.

"We have sought very thoughtfully to set our house in order, correct the grosser errors and abuses of our industrial life, liberate and quicken the processes of our national genius and energy and lift our politics to a broader view of the people's essential interests. It is a record of singular variety and singular distinction, but I shall not attempt to review it. It speaks for itself and will be of increasing influence as the years go by.

"This is not the time for retrospect. It is

time, rather, to speak our thoughts and purposes concerning the present and the immediate future.

"Although we have centered counsel and action with such unusual concentration and success upon the great problems of domestic legislation to which we addressed ourselves four years ago, other matters have more and more forced themselves upon our attention, matters lying outside our own life as a nation and over which we had no control, but which, despite our wish to keep free of them, have drawn us more and more irresistibly into their own current and influence.

"It has been impossible to avoid them. They have affected the life of the whole world. They have shaken men everywhere with a passion and an apprehension they never knew before. It has been hard to preserve calm counsel while the thought of our own people swayed this way and that under their influence. We are a composite and cosmopolitan people. We are of the blood of all the nations that are at war. The currents of our thoughts as well as the currents of our trade run quick at all seasons back and forth between us and them. The war inevitably set its mark from the first alike upon our minds, our industries, our commerce, our politics and our social action. To be indifferent to it or independent of it was out of the question.

"And yet all the while we have been conscious that we were not part of it. In that consciousness, despite many divisions, we have drawn closer together. We have been deeply wronged upon the seas, but we have not wished to wrong or injure in return; we have retained throughout the consciousness of standing in some sort apart, intent upon an interest that transcended the immediate issues of the war itself. As some of the injuries done us have become intolerable we have still been clear that we wished nothing for ourselves that we were not ready to demand for all mankind, fair dealing, justice, the freedom to live and be safe against organized wrong.

"It is in this spirit and with this thought that we have grown more and more aware, more and more certain, that the part we wished to play was the part of those who mean to vindicate and fortify peace. We have been obliged to arm ourselves to make good our claim to a certain minimum of right and of freedom of action. We stand firm in armed neutrality, since it seems that in no other way can we demonstrate what it is we insist upon and cannot forego. We may even be drawn on, by circumstances, not by our own purpose or desire, to a more active assertion of our rights as we see them and a more immediate association with the great struggle itself. But nothing will alter our thought or our purpose. They are too clear to be obscured. They are too deeply rooted in the principles of our national life to be altered. We desire neither conquest nor advantage. We wish nothing that can be had only at the cost of another people. We have always professed unselfish purpose and we covet the opportunity to prove that our professions are sincere.

"There are many things still to do at home to clarify our own politics and give new vitality to the industrial processes of our own life, and we shall do them as time and opportunity serve; but we realize that the greatest things that remain to be done must be done with the whole world for a stage and in co-operation with the wide and universal forces of mankind, and we are making our spirits ready for those things. They will follow in the immediate wake of the war itself and will set civilization up again. We are provincials no longer. The tragical events of the thirty months of vital turmoil which we have just passed have made us citizens of the world. There can be no turning back. Our own fortunes as a nation are involved, whether we would have it so or not.

"And we are not the less American on that

account. We shall be the more American if we but remain true to the principles in which we have been bred. They are not the principles of a province or of a single continent. We have known and boasted all along that they were the principles of a liberated mankind.

"These, therefore, are the things we shall stand for, whether in war or in peace:

"That all nations are equally interested in the peace of the world and in the political stability of free peoples and equally responsible for their maintenance.

"That the essential principle of peace is the actual equality of nations in all matters of right or privilege.

"That peace cannot securely or justly rest upon an armed balance of power.

"That governments derive all their just powers from the consent of the governed and that no other powers should be supported by the common thought, purpose or power of the family of nations.

"That the seas should be equally free and safe for the use of all peoples, under rules set up by common agreement and consent, and that, so far as practicable, they should be accessible to all upon equal terms.

"That national armaments should be limited to the necessities of national order and domestic safety.

"That the community of interest and of power upon which peace must henceforth depend imposes upon each nation the duty of seeing to it that all influences proceeding from its own citizens meant to encourage or assist revolution in other states should be sternly and effectually suppressed and prevented.

"I need not argue these principles to you, my fellow countrymen; they are your own, part and parcel of your own thinking and your own motive in affairs. They spring up native among us. Upon this platform of purpose and of action we can stand together.

"And it is imperative that we should stand together. We are being forged into a new unity amidst the fires that now blaze throughout the world. In their ardent heat we shall, in God's providence, let us hope, be purged of faction and division, purified of the errant humors of party and of private interest, and shall stand forth in the days to come with a new dignity of national pride and spirit. Let each man see

to it that the dedication is in his own heart, the high purpose of the nation in his own mind, ruler of his own will and desire.

"I stand here and have taken the high and solemn oath to which you have been audience because the people of the United States have chosen me for this august delegation of power and have by their gracious judgment named me their leader in affairs. I know now what the task means. I realize to the full the responsibility which it involves.

"I pray God I may be given the wisdom and the prudence to do my duty in the true spirit of this great people. I am their servant and can succeed only as they sustain and guide me by their confidence and their counsel. The thing I shall count upon, the thing without which neither counsel nor action will avail, is the unity of America—an America united in feeling, in purpose and in vision of duty, of opportunity and of service. We are to beware of all men who would turn the tasks and the necessities of the nation to their own private profit or use them for the building up of private power; beware that no faction or disloyal intrigue break the harmony or embarrass the spirit of our people; beware that our government be kept pure and incorrupt in all its parts. United alike in the conception of our duty and in the high resolve to perform it in the face of all men, let us dedicate ourselves to the great task to which we must set our hand.

"For myself I beg your tolerance, your countenance and your united aid. The shadows that now lie dark upon our path will soon be dispelled and we shall walk with the light all about us if we are but true to ourselves—to ourselves as we have wished to be known in the counsels of the world and in the thought of all those who love liberty and justice and the right exalted."

Great enthusiasm was shown by the vast throng, which cheered the president heartily upon his appearance and at different points in his address. Because of the threats which had been made against his life and of plots which had been discovered by the secret service agents extraordinary precautions were taken to guard the president from injury. Troops lined the streets throughout the whole route of the procession from the white house to the capitol and guards were even stationed on the roofs of the buildings along Pennsylvania avenue.

CORPORATIONS AND LABOR AGENTS CONVICTED.

Thirteen labor agents and five corporations charged with conspiracy to restrain interstate trade in violation of the antitrust act were convicted by a jury in the United States District court, Chicago, March 3, 1917. The defendants included Michael J. Boyle, agent of the Electrical Workers' union; three former agents of the same organization; nine members of the Chicago Switchboard Manufacturers' association, and five corporations in the electrical business. The government charged that in October, 1911, the unions and manufacturers entered into a contract by which a boycott of outside nonunion electrical concerns was to be maintained for the monopolistic benefit of the Chicago factories and Chicago electrical workers. Stress was laid by the government on the part alleged to have been taken by Boyle, who was

not only charged with leadership in the boycott but also with having received thousands of dollars in "graft" for settling building trade strikes.

March 22 Boyle was sentenced to a year in prison and to pay a fine of \$5,000. Raymond Cleary was given sixty days in the bridewell and fined \$500. The other defendants were fined as follows: Frank A. Lundmark, \$500; Warren E. Ripple, \$3,000; John Cuthbert, \$1,000; Charles Kreider, \$1,000; Otto B. Duncan, \$1,000; James Obermiller, \$1,500; Julian J. Neilson, \$500; G. W. Berthold, \$500; C. J. Peterson, \$500; Henry Newgard & Co., \$2,000; J. Lang Electric company, \$1,000; Cuthbert Electrical and Manufacturing company, \$1,000; Electric Apparatus company, \$500, and the States Electric company, \$500.

BLUE SKY LAWS DECLARED VALID.

The so called "blue sky" laws of Ohio, Michigan and South Dakota, regulating the sale of securities and designed to bar get-rich-quick schemes, were pronounced constitutional by the United States Supreme court in a decision announced Jan. 22, 1917. The decision affected similar laws in twenty-six states. The court admitted that such statutes might curb and burden legitimate business, but held that the interests even of legitimate business are not paramount to the police power of states to protect their citizens from fraud. The laws do not at-

tempt to prohibit unwise investments, but give state authorities the right to forbid the sale within the state borders of securities which they believe would result in fraud upon investors.

"The statutes," said the court, "burden honest business, it is true, but burden it only that under its forms dishonest business may not be done. Expense may be caused and inconvenience, but to arrest the power of the state by such considerations would make it impotent to discharge its functions. It costs something to be governed."

RAILWAY EIGHT-HOUR DAY CONTROVERSY.

In March, 1916, representatives of the Order of Railway Conductors, the Brotherhood of Railway Trainmen, the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen presented to the general managers of the railroads of the United States demands for an eight hour day and various increases in pay. The demands were refused. A conference was held in New York, N. Y., which ended June 15 in a disagreement, the brotherhood leaders declining to submit to arbitration the issues involved. President Wilson intervened and series of conferences were held at the white house in Washington, D. C., in August following a fruitless attempt by the United States board of mediation and conciliation to settle the controversy. The president's efforts were also in vain and the brotherhood heads issued a secret order for a strike to begin Sept. 4. Aug. 29 President Wilson went before congress and asked for the passage of a law establishing an eight hour day for railway employes and also for certain other legislation desired by the railroads.

Congress, under the threat of a general strike on all the railroads of the country if a bill satisfactory to the brotherhoods were not passed by Saturday night, Sept. 2, passed the so called Adamson act, establishing an eight hour day on the railroads and providing for the appointment of a commission of three men to observe the effect of the institution of the eight hour day. The railroads attacked the Adamson law as unconstitutional and a test case was brought before Judge William C. Hook in the United States District court in Kansas City, Mo., on a petition from the receivers of the Missouri, Oklahoma & Gulf Railroad company. To facilitate bringing the case before the United States Supreme court Judge Hook on Nov. 22, 1916, held the Adamson act to be unconstitutional. Jan. 1, 1917, was the date set for the law to go into effect, and it was agreed by both sides to the controversy that pending a final decision by the Supreme court the railroads would keep accounts of the wages which would have been earned if the statute was enforced so as to enable their payment if the law was finally upheld.

STRIKE THREAT IS RENEWED.

In March, 1917, while the country was in the midst of preparations to meet the German war crisis, the railroad brotherhood leaders suddenly renewed the controversy and demanded an immediate settlement. This step was taken at a meeting held in Cleveland, O., March 10, when a call was issued for a conference with the railroad officials in New York March 15. The conference was held, but resulted in a deadlock. The brotherhood leaders thereupon ordered that a general railroad strike should begin on Saturday evening, March 17. On March 16 President Wilson sent the following personal appeal to the representatives of the two sides in the controversy:

"I deem it my duty and right to appeal to you in this time of national peril to open again the questions at issue between the railroads and their operatives with a view to accommodation or settlement.

"With my approval a committee of the council of national defense is about to seek a conference with you with that end in view.

"A general interruption of the railway traffic of the country at this time would entail a danger to the nation against which I have the right to bring my most solemn and earnest protest.

"It is now the duty of every patriotic man to bring matters of this sort to immediate accommodation. The safety of the country against manifest perils affecting its own peace and the peace of the whole world makes accommodation absolutely imperative and seems to me to render any other choice or action inconceivable."

RAILROADS AGREE TO TERMS.

The council of national defense appointed the following committee from its own membership

and its advisory council to go to New York to mediate between the unions and the railroads: Secretary of the Interior Franklin K. Lane, Secretary of Labor William B. Wilson, President Daniel B. Willard of the Baltimore & Ohio railroad and a member of the advisory council, and Samuel Gompers, president of the American Federation of Labor and a member of the advisory council.

The conference began on March 16 and on the afternoon of the following day the brotherhood leaders agreed to postpone the strike forty-eight hours. Early on the morning of March 19 the conference committee of railroad managers authorized the national defense mediators to settle the controversy in the following letter:

"In the national crisis precipitated by events [torpedoing of American ships] of which we heard this afternoon [March 18] the national conference committee of railroads joins with you in the conviction that neither at home nor abroad should there be fear or hope that the efficient operation of the railroads of the country will be hampered or impaired.

"Therefore you are authorized to assure the nation there will be no strike, and as a basis for such assurance we hereby authorize the committee of the council of national defense to grant to the employes who are about to strike whatever adjustment your committee deems necessary to guarantee the uninterrupted and efficient operation of the railroads as an indispensable arm of national defense."

TERMS OF SETTLEMENT.

The following agreement was signed on the night of March 18-19 by the representatives of the brotherhoods, the railroads and the commission of mediators:

"In all road service, except passenger, where schedules now read '100 miles or less, nine or ten hours or less, overtime at ten or eleven miles per hour,' insert 'eight hours or less for a basic day and twelve and one-half miles per hour for a speed basis,' for the purpose of computing overtime.

"Overtime to be paid for at not less than one-eighth of the daily rate per hour.

"In all yard service switching and hostelry service where schedules now read 'ten, eleven or twelve hours or less shall constitute a day's work,' insert 'eight hours or less shall constitute a day's work at present ten hours' pay.'

"Overtime to be paid for at not less than one-eighth of the daily rate per hour.

"In yards now working on an eight hour basis the daily rate shall be the present ten hour standard rate, with overtime at one-eighth of the present standard daily rate.

"In case the law is declared unconstitutional eight hours or less at present ten hour pay will constitute a day's work.

"In passenger service the present mileage basis will be maintained. On roads now having a flat ten hour day in passenger service the rule will be amended to read 'eight within ten hours.'

"For all classes of employes in short turn around passenger service, where the rule now reads 'eight within twelve hours,' it will be amended to read 'eight within ten hours.'

"For such territory as has no number of hours for a day's work in short turn around passenger service, the eight within ten hour rule applies. Overtime to be paid for at not less than one-eighth of the daily rate per hour.

"The general committees on individual railroads may elect to retain their present overtime rules in short turn around passenger service or the foregoing provision, but may not make a combination of both to produce greater compensation than is provided in either basis.

"In the event the law is held to be constitutional, if the foregoing settlement is inconsistent with the decision of the court, that application will be adjusted to the decision. If declared unconstitutional the above stands with all the provisions as written.

"The foregoing to govern for such roads, classes of employes and classes of service represented by the national conference committee of railroads.

"Schedules, except as modified by the above changes, remain as at present."

Their demands having been complied with the brotherhood chiefs called off the strike.

ADAMSON ACT DECLARED VALID.

On March 19, only a few hours after the announcement that the railroad controversy had been settled, the decision of the United States Supreme court upon the Adamson law was made public in Washington. The majority opinion, concurred in by Chief Justice White and Justices McKenna, Holmes, Brandeis and Clarke, upheld the law as valid. Dissenting opinions were held by Justices Pitney, Van Devanter, Day and McReynolds.

MAJORITY OPINION.

The majority opinion, after reciting the facts in the controversy, went on to say:

"Stating its desire to co-operate with the parties in their purpose to expedite the cause, the court below briefly announcing that it was of opinion that congress had no constitutional power to enact the statute, enjoined its enforcement and as the result of the direct appeal which followed we come, after elaborate oral and printed arguments, to dispose of the controversy.

"All the propositions relied upon and arguments advanced ultimately come to two questions:

"First, the entire want of constitutional power to deal with the subjects embraced by the statute, and, second, such abuse of the power if possessed as rendered its exercise unconstitutional. We will consider these subjects under distinct propositions separately.

"1. The entire want of constitutional power to deal with the subjects embraced by the statute.

"There must be knowledge of the power exerted before determining whether as exercised it was constitutional and we must hence settle a dispute on that question before going further.

Only an eight hour standard for work and wages was provided, is the contention of one side, and, in substance, only a scale of wages was provided, is the argument on the other. We are of the opinion that both are right and, in a sense, both wrong in so far as it is assumed that the one excludes the other. * * * Both provisions are equally mandatory. * * *

"However, there is this very broad difference between the two powers exerted. The first, the eight hour standard, is permanently fixed. The second, the fixing of the wage standard resulting from the prohibition against paying lower wages, is expressly limited to the time specified in section 2 [of the law]. It is, therefore, not permanent but temporary, leaving the employers and employes free as to the subject of wages matters after the specified time.

"Concretely stated, therefore, the question is this: Did congress have power under the circumstances to provide a permanent eight hour standard and to create by legislative action a standard of wages to be operative upon the employers and employes for such reasonable time as it deemed necessary to afford an opportunity for the meeting of the minds of employers and employes on the subject of wages?

"Coming to the general consideration, we put the question as to the eight hour standard entirely out of view on the ground that the authority to permanently establish it is so clearly sustained as to render the subject not disputable.

"What was the extent of the power therefore of congress to regulate, considering the scope of regulation which the government had the right to exert with reference to interstate commerce carriers, when it came to exercise its legislative authority to regulate commerce? This is the matter to be decided. That the business of common carriers by rail is in a sense a public business is settled by so many decisions, state and federal, and is illustrated by such a con-

tinuous exertion of state and federal legislative power, as to leave no room for question on the subject.

"If the situation which we have described and with which the act of congress dealt be taken into view it would seem inevitably to result that the power to regulate necessarily obtained and was subject to be applied to the extent necessary to provide a remedy for the situation. This must be unless it can be said that the right to so regulate as to save and protect the public interest did not apply to a case where the destruction of the public right was imminent as the result of a dispute between the parties and their consequent failure to establish by private agreement the standard of wages which was essential; in other words, that the existence of the public right and the public power to preserve it was wholly under the control of the private right to establish a standard by agreement.

"Nor is it an answer to this view to suggest that the situation was one of emergency and that emergency cannot be made the source of power. The proposition begs the question, since, although an emergency may not call into life a power which has never lived, nevertheless emergency may afford a reason for the exertion of a living power already enjoyed. If acts which, if done, would interrupt if not destroy interstate commerce may be by anticipation legislatively prevented, by the same token the power to regulate may be exercised to guard against the cessation of interstate commerce threatened by a failure of employers and employes to agree as to the standard of wages, such standard being an essential prerequisite to the uninterrupted flow of interstate commerce."

Here the chief justice recounted at length the previously acknowledged powers of congress to regulate commerce.

"In the presence of this vast body of acknowledged powers there would seem to be no ground for disputing the power which was exercised in the act which is before us so as to prescribe by law for the absence of a standard of wages caused by the failure to exercise the private right to the end that no individual dispute or difference might bring ruin to the vast interests concerned.

"What would be the value of the right to a reasonable rate if all movement in interstate commerce could be stopped as a result of a mere dispute between the parties or their failure to exert a primary private right concerning a matter of interstate commerce? Again, what purpose would be subserved by all the regulations established to secure the enjoyment by the public of an efficient and reasonable service if there was no power in government to prevent all service from being destroyed? Further yet, what benefits would flow to society by recognizing the right, because of the public interest, to regulate the relation of employer and employee and of the employees among themselves and to give to the latter peculiar and special rights, safeguarding their persons, protecting them in case of accident and giving efficient remedies for that purpose, if there was no power to remedy a situation created by a dispute between employers and employes as to rate of wages, which, if not remedied, would leave the public helpless, the whole people ruined and all the homes of the land submitted to a danger of the most serious character?

"And finally, to what decision would it not reduce the proposition that government had power to enforce the duty of operation if that power did not extend to doing that which was essential to prevent operation from being completely stopped by filling the interregnum created by an absence of a conventional standard of wages because of a dispute on that subject between the employers and employes by a legislative standard binding on employers and employes for such a time as might be deemed by the legislature reasonably adequate to enable normal conditions to come about as the result of agreements as to wages between the parties?

"We are of opinion that the reasons stated conclusively establish that from the point of view of inherent power the act which is before us was clearly within the legislative power of congress to adopt, and that in substance and effect it amounted to an exertion of its authority under the circumstances disclosed to compulsorily arbitrate the dispute between the parties by establishing as to the subject matter of that dispute a legislative standard of wages operative and binding as a matter of law upon the parties—a power none the less efficaciously exerted because exercised by direct legislative act instead of by the enactment of other and appropriate means providing for the bringing about of such result.

"If it be conceded that the power to enact the statute was in effect the exercise of the right to fix wages where by reason of the dispute there had been a failure to fix by agreement, it would simply serve to show the nature and character of the regulation essential to protect the public right and safeguard the movement of interstate commerce, not involving any denial of the authority to adopt it.

"And this leaves only to be generally considered whether the right to exercise such a power under the conditions which existed was limited or restrained by the private rights of the carriers or their employees.

"As to the carrier, as engaging in the business of interstate commerce carriage subjects the carrier to the lawful power of congress to regulate, it follows that the very absence of the scale of wages by agreement and the impediment and destruction of interstate commerce, which was threatened, called for the appropriate and relevant remedy, the creation of a standard by operation of law binding upon the carrier.

"As to the employee, here again it is obvious that what we have previously said is applicable and decisive, since whatever would be the right of an employee engaged in a private business to demand such wages as he desires, to leave the employment if he does not get them and by concert of action to agree with others to leave upon the same condition, such rights are necessarily subject to limitation when employment is accepted in a business charged with a public interest and as to which the power to regulate commerce possessed by congress applied and the resulting right to fix in a case of disagreement and dispute a standard of wages as we have seen necessarily obtained.

"In other words, considering comprehensively the situation of the employer and the employee in the light of the obligations arising from the public interest and of the work in which they are engaged and the degree of regulation which may be lawfully exerted by congress as to that business, it must follow that the exercise of the lawful governmental right is controlling.

"This results from the considerations which, * * * we repeat, since, conceding that from the point of view of the private right and private interest as contradistinguished from the public interest and power exists between * * * employers and employees, to agree as to standard of wages free from legislative interference, that right in no way affects the lawmaking power to protect the public right and create a standard of wages resulting from a dispute as to wages and a failure, therefore, to establish by consent a standard.

"The capacity to exercise the private right, free from legislative interference, affords no ground for saying that legislative power does not exist to protect the public interest from the injury resulting from a failure to exercise the private right. In saying this, of course, it is always to be borne in mind that as to both carrier and employee the beneficent and ever present safeguards of the constitution are applicable, and therefore both are protected against confiscation and against every act of arbitrary power which, if given effect to, would amount to a denial of due process or would be repugnant to any other constitutional right.

"And this emphasizes that there is no question here of purely private right.

"Having thus adversely disposed of the contentions as to the inherent want of power, we come to consider all the other propositions which group themselves under a common heading, that is:

"2. Such an abuse of the power, if possessed, as rendered its exercise unconstitutional.

"The want of equality is based upon two considerations. The one is the exemption of certain short line and electric railroads. We dismiss it because it has been adversely disposed of by many previous decisions. The second rests upon the charge that unlawful inequality results because the statute deals not with all but only with the wages of employees engaged in the movement of trains. But such employees were those concerning whom the dispute, in which wages existed, growing out of which the threat of interruption of interstate commerce arose—a consideration which establishes an adequate basis for the statutory classification.

"As to penalties, it suffices to say that in this case a recovery of penalties is not asked, and consequently the subject may well be postponed until it actually arises for decision."

At this point the chief justice dealt at length with the argument that the law was "unworkable." Disposing of the argument of unworkability, the chief justice said:

"Considering the extreme contentions relied upon in the light of this situation, we can discover no basis upon which they may rest. When it is considered that no contention is made that in any view the enforcement of the act would result in confiscation, the misconception upon which all the propositions proceed becomes apparent.

"Finally, we say that the contention that the act was void and could not be made operative because of the unworkability of its provisions is without merit, since we see no reason to doubt that if the standard fixed by the act were made applicable and a candid effort followed to carry it out the result would be without difficulty accomplished. If it is true that it might follow that in some cases because of particular terms of employment or exceptional surroundings some change might be necessary, but these exceptions afford no ground for holding the act void because its provisions are not susceptible in practice of being carried out.

"Being of the opinion that congress had the power to adopt the act in question, whether it be viewed as a direct fixing of wages to meet the absence of a standard on that subject resulting from the dispute between the parties or as an exertion by congress of the power which it undoubtedly possessed to provide by appropriate legislation for compulsory arbitration—a power which inevitably resulted from its authority to protect interstate commerce in dealing with a situation like that which was before it—we conclude that the court below erred in holding the statute was not within the power of congress to enact and in restraining its enforcement; and its decree, therefore, must be and it is reversed and the cause remanded with directions to dismiss the bill."

DISSENTING OPINIONS.

Justices Pitney and Van Devanter, in their joint dissenting opinion, held that the law should be held unconstitutional and void "because congress, although confessedly not in possession of information necessary for intelligent and just treatment of the controversy, arbitrarily imposed upon the railroads the entire and enormous cost of an experimental increase in wages."

Holding the Adamson act an "arbitrary and unreasonable taking of property" from the railroads without due process of law, experimental and admitted enacted without due deliberation, Justice Day dissented, although he said, he was not prepared to say congress is without power to regulate railroad wages. He expressly said, however, he did not believe congress has power to enforce compulsory arbitration and asserted that the emergency in September did not war-

rant any excessive exercise of constitutional powers of congress.

"I agree that, to secure the proper service and to insure reasonable rates to the public, congress has the power to fix the amount of compensation," he said, adding that this power must be exercised subject to usual constitutional limitations of "due process" of law.

Citing these limitations, Justice Day continued: "This act cannot successfully withstand the attack that it is an arbitrary and unlawful exertion of supposed legislative power. It is not an act limiting the hours of service. Nor is it a legitimate enactment fixing the wages of employees."

Stating that the law provides temporary pay for eight hours' service formerly required for ten hours, Justice Day said:

"In other words, congress expresses its inability to fix, in advance of investigation, a just and proper wage. It inevitably follows that the cost of the experiment, many millions of dollars, must not be paid by the public, but by the legislative edict is made to fall entirely upon one of the parties.

"Inherently such legislation requires that investigation and deliberation shall precede action. Nevertheless, congress has in this act itself declared the lack of sufficient information and knowledge to warrant the action taken and has directed an experiment to determine what it

should do. Such legislation, it seems to me, amounts to the taking of the property of one and giving it to another in violation of the spirit of fair play and the due process clause. No emergency, whatever the character, could justify the violation of constitutional rights."

Justice McReynolds' dissenting opinion said: "Whatever else the act may do, it certainly commands that during a minimum period of seven months interstate carriers by railroad shall pay their employees engaged in operating trains for eight hours' work a wage not less than the one then established for a standard day—generally of ten hours.

"I have not heretofore supposed that such action was a regulation of commerce within the fair intendment of those words as used in the constitution, and the argument advanced in support of the contrary view is unsatisfactory to my mind. I cannot, therefore, concur in the conclusion that it was within the power of congress to enact the statute.

"But, considering the doctrine now affirmed by a majority of the court as established, it follows that congress has power to fix a maximum as well as a minimum wage for trainmen; to require compulsory arbitration of labor disputes which may seriously and directly jeopardize the movement of interstate traffic and to take measures effectively to protect the free flow of such commerce against any combination, whether of operatives, owners or strangers."

NIAGARA GORGE TROLLEY ACCIDENT.

On the afternoon of July 1, 1917, a Niagara gorge route trolley car left the rails and plunged into the upper reaches of the whirlpool rapids. There were about sixty passengers on the car

at the time and of these at least ten were drowned. The car was an open one or the casualty list would have been larger. The accident was due to a washout.

IMMIGRATION LAW.

Effective May 1, 1917.

The word "alien" as used in the act includes any person not a native born or naturalized citizen of the United States, but it does not include Indians of the United States not taxed or citizens of the islands under the jurisdiction of the United States. The term "United States"

means the United States and any waters, territory or other place subject to the jurisdiction thereof except the Isthmian Canal Zone; but if any alien shall leave the Canal Zone or any insular possession and attempt to enter any other place under the jurisdiction of the United States he is not to be permitted to enter under any other conditions than those applicable to all aliens.

There shall be collected a tax of \$3 for every alien, including alien seamen regularly admitted, entering the United States. Children under 16 accompanying father or mother are not subject to the tax. The tax shall not be levied on aliens who enter after an uninterrupted residence of at least one year preceding such entrance in Canada, Newfoundland, Cuba or Mexico for a temporary stay, nor upon aliens in transit, nor upon aliens who, having been lawfully admitted, shall go from one part of the United States to another, although through contiguous foreign territory.

EXCLUDED ALIENS.

The following classes of aliens are excluded from the United States: Idiots, imbeciles, feeble minded, epileptics, insane persons; persons who have had one or more attacks of insanity previously; persons of constitutional psychopathic inferiority; persons with chronic alcoholism; paupers; professional beggars; vagrants; persons afflicted with tuberculosis in any form or with a loathsome or dangerous contagious disease; persons not comprehended within any of the foregoing excluded classes who are found to be and are certified by the examining surgeon as being mentally or physically defective, such physical defect being of a nature which may affect the ability of such alien to earn a living; persons who have been convicted of or admit having committed a felony or other crime or misdemeanor involving moral turpitude; polygamists, or persons who practice polygamy or believe in or advocate the practice of polygamy; anarchists or persons who believe in or advocate the overthrow by force or violence of the government of the United States or of all forms of law, or who disbelieve in or are opposed to organized government, or who advocate the assassination of public officials, or who advocate or teach the unlawful destruction of property; persons who are members of or affiliated with any organization entertaining and teaching disbelief in or opposition to organized government, or who advocate or teach the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers, either of specific individuals or of officers generally, of the government of the United States or of any other organized government, because of his or their official character, or who advocate or teach the unlawful destruction of property; prostitutes, or persons coming into the United States for the purpose of prostitution or any other immoral purpose; persons who directly or indirectly procure or attempt to procure or import prostitutes or persons for the purpose of prostitution or any other immoral purpose; persons who are supported by or receive in whole or in part the proceeds of prostitution; contract laborers, who have been induced or assisted to migrate to this country by offers or promises of employment, whether such offers or promises are true or false, or in consequence of agreements, oral, written or printed, express or implied, to perform labor in this country of any kind, skilled or unskilled; persons who have come in consequence of advertisements for laborers printed, published or distributed in a foreign country; persons likely to become a public charge; persons who have been deported under any of the provisions of this act, and who may again seek admission within one year from the date of such deportation, unless prior to their re-embarkation at a foreign port or their attempt to be admitted from foreign contiguous

territory the secretary of labor shall have consented to their reapplying for admission; persons whose ticket or passage is paid for with the money of another, or who are assisted by others to come, unless it is satisfactorily shown that such persons do not belong to one of the foregoing excluded classes; persons whose ticket or passage is paid for by any corporation, association, society, municipality, or foreign government, either directly or indirectly; stowaways, except that any such stowaway, if otherwise admissible, may be admitted at the discretion of the secretary of labor; all children under 16 years of age unaccompanied by or not coming to one or both of their parents, except that any such children may, in the discretion of the secretary of labor, be admitted if, in his opinion, they are not likely to become a public charge and are otherwise eligible; unless otherwise provided for by existing treaties, persons who are natives of islands not possessed by the United States adjacent to the continent of Asia, situate south of the 20th parallel latitude north, west of the 160th meridian of longitude east of Greenwich, and north of the 10th parallel latitude south, or who are natives of any country, province, or dependency situate on the continent of Asia west of the 110th meridian of longitude east from Greenwich and the 24th and 38th parallels of latitude north, and no alien now in any way excluded from, or prevented from entering, the United States shall be admitted to the United States.

The provision next foregoing, however, shall not apply to persons of the following status or occupation: Government officers, ministers or religious teachers, missionaries, lawyers, physicians, chemists, civil engineers, teachers, students, authors, artists, merchants, and travelers for curiosity or pleasure, nor to their legal wives or their children under 16 years of age who shall accompany them or who may subsequently apply for admission to the United States, but such persons or their legal wives or foreign born children who fail to maintain in the United States a status or occupation placing them within the excepted classes shall be deemed to be in the United States contrary to law and shall be subject to deportation.

LITERACY TEST.

After three months from the passage of this act, in addition to the aliens who are by law now excluded from admission into the United States, the following persons shall also be excluded from admission thereto, to wit:

All aliens over 16 years of age, physically capable of reading, who cannot read the English language, or some other language or dialect, including Hebrew or Yiddish: Provided, that any admissible alien, or any alien heretofore or hereafter legally admitted, or any citizen of the United States, may bring in or send for his father or grandfather over 55 years of age, his wife, his mother, his grandmother or his unmarried or widowed daughter, if otherwise admissible, whether such relative can read or not; and such relative shall be permitted to enter. That for the purpose of ascertaining whether aliens can read the immigrant inspectors shall be furnished with slips of uniform size, prepared under the direction of the secretary of labor, each containing not less than thirty nor more than forty words in ordinary use, printed in plainly legible type in some one of the various languages or dialects of immigrants. Each alien may designate the particular language or dialect in which he desires the examination to be made, and shall be required to read the words printed on the slip in such language or dialect. That the following classes of persons shall be exempt from the operation of the illiteracy test, to wit: All aliens who shall prove to the satisfaction of the proper immigration officer or to the secretary of labor that they are seeking admission to the United States to avoid religious persecution in the country of their last permanent residence, whether such persecution be evidenced by overt

acts or by laws or governmental regulations that discriminate against the alien or the race to which he belongs because of his religious faith; all aliens who have been lawfully admitted to the United States and who have resided therein continuously for five years and who return to the United States within six months from the date of their departure therefrom; all aliens in transit through the United States; all aliens who have been lawfully admitted to the United States and who later shall go in transit from one part of the United States to another through foreign contiguous territory: Provided, that nothing in this act shall exclude, if otherwise admissible, persons convicted, or who admit the commission, or who teach or advocate the commission, of an offense purely political: Provided further, that the provisions of this act relating to the payments for tickets or passage by any corporation, association, society, municipality or foreign government shall not apply to the tickets or passage of aliens in immediate and continuous transit through the United States to foreign contiguous territory: Provided further, that skilled labor, if otherwise admissible, may be imported if labor of like kind unemployed cannot be found in this country, and the question of the necessity of importing such skilled labor in any particular instance may be determined by the secretary of labor upon the application of any person interested, such application to be made before such importation, and such determination by the secretary of labor to be reached after a full hearing and an investigation into the facts of the case: Provided further, that the provisions of this law applicable to contract labor shall not be held to exclude professional actors, artists, lecturers, singers, nurses, ministers of any religious denomination, professors for colleges or seminaries, persons belonging to any recognized learned profession, or persons employed as domestic servants: Provided further, that whenever the president shall be satisfied that passports issued by any foreign government to its citizens or subjects to go to any country other than the United States, or to any of its insular possessions or the Canal Zone, are being used for the purpose of enabling the holder to come to the continental territory of the United States to the detriment of labor conditions therein, the president shall refuse to permit such persons to enter the United States or its possessions: Provided further, that aliens returning after a temporary absence to an unrelinquished United States domicile of seven consecutive years may be admitted at the discretion of the secretary of labor and under such conditions as he may prescribe: Provided further, that nothing in the contract-labor or reading-test provisions of this act shall be construed to prevent any alien exhibitor or holder of any concession for any fair or exposition authorized by congress from bringing into the United States, under contract, such otherwise admissible alien mechanics, artisans, agents or other employees, natives of his country, as may be necessary for installing or conducting his exhibit or business, under such rules as the commissioner-general of immigration with the approval of the secretary of labor may prescribe, both as to the admission and return of such persons: Provided further, that the commissioner-general of immigration with the approval of the secretary of labor shall issue rules and prescribe conditions, including exaction of such bonds as may be necessary, to control and regulate the admission and return of otherwise inadmissible aliens applying for temporary admission: Provided further, that nothing in this act shall be construed to apply to accredited officials of foreign governments, nor to their suites, families or guests.

The importation of any alien into the United States for any immoral purpose is punishable by imprisonment for not more than ten years and by a fine of not more than \$5,000. Violations of the contract-labor section of the act are punishable by fines of \$1,000 or by imprisonment for not less than six months nor more than

two years. The act provides for the fining or imprisonment of persons engaged in the transportation of aliens into the United States who encourage or help persons excluded under the provisions of the law to enter the country. The administrative features of the act, both as to the immigration and deportation of aliens, are practically the same as under the old law. (Signed by Champ Clark, speaker of the house of representatives, and Thomas R. Marshall, vice-president of the United States and president of the senate.)

The foregoing act was vetoed by President Wilson Jan. 23, but was passed over his veto by the house Feb. 1 by a vote of 286 to 106 and by the senate Feb. 5 by a vote of 62 to 19, and thus became a law. In his veto message the president said:

"In most of the provisions of the bill I should be very glad to concur, but I cannot rid myself of the conviction that the literacy test constitutes a radical change in the policy of the nation which is not justified in principle. It is not a test of character, of quality or of personal fitness, but would operate in most cases merely as a penalty for lack of opportunity in the country from which the alien seeking admission came.

"Moreover, even if this test might be equitably insisted on, one of the exceptions proposed to its application involves a provision which might lead to very delicate and hazardous diplomatic situations. Such a provision (the literacy test) so applied and administered would oblige the officer concerned in effect to pass judgment upon the laws and practices of a foreign government and declare that they did or did not constitute religious persecution.

"This would, to say the least, be a most invidious function for any administrative officer of this government to perform, and it is not only possible but probable that very serious questions of international justice and comity would arise between this government and the government or governments thus officially condemned should its exercise be adopted."

Immigration bills carrying a similar literacy test were vetoed by President Taft Feb. 14, 1913, and by President Wilson Jan. 23, 1915, congress on each occasion failing to carry the measure over the veto.

VOCATIONAL EDUCATION.

The act provides for the promotion of vocational education, for co-operation with the states in the promotion of such education in agriculture and the trades and industries and for co-operation with the states in the preparation of teachers of vocational subjects. For the purpose of co-operating with the states in the payment of the salaries of teachers, supervisors or directors of agricultural subjects there are appropriated for the use of the states, subject to the provisions of the act, the following sums for the fiscal years (ending June 30) named: 1918, \$500,000; 1919, \$750,000; 1920, \$1,000,000; 1921, \$1,250,000; 1922, \$1,500,000; 1923, \$1,750,000; 1924, \$2,000,000; 1925, \$2,500,000; 1926 and annually thereafter, \$3,000,000. The sums shall be allotted to the states in the proportion which their rural population bears to the total rural population in the United States, not including outlying possessions. The allotment of funds to any state shall not be less than a minimum of \$5,000 for any year prior to and including 1923, nor less than \$10,000 for any year thereafter. The sums necessary to provide this minimum are appropriated by the act.

For the purpose of co-operating with the states in paying the salaries of teachers of trade, home economics and industrial subjects appropriations the same in amount and annual increase as those for agricultural teachers, supervisors and directors, that is, from \$500,000 for 1918 up to \$3,000,000 for 1926 and each year thereafter, are made. The sums shall be allotted to the states in the proportion which their urban population bears to the total urban population in the United States, not including outlying possessions. The

allotment to any state shall be not less than a minimum of \$5,000 for any year prior to and including 1923 nor less than \$10,000 for any fiscal year thereafter. Not more than 20 per cent of the money appropriated for the salaries of teachers of trade, home economics and industrial subjects for any year shall be expended for the salaries of teachers of home economics subjects.

For the purpose of co-operating with the states in preparing teachers, supervisors and directors of agricultural subjects and teachers of trade and industrial and home economics subjects appropriations are made, running from \$500,000 in 1918 to \$1,000,000 in 1921 and annually thereafter, the sums to be allotted to the states in the proportion which their population bears to the total population of the United States, outlying possessions not included. The allotment to any state shall be not less than \$5,000 for any fiscal year prior to 1919 nor less than \$10,000 for any fiscal year thereafter.

In order to secure the benefits of any of the foregoing appropriations any state shall through its legislative authority create a state board of not less than three members having all necessary power to co-operate with the federal board for vocational education in the administration of the act. The state board of education or other board having charge of the administration of public education in the state or any state board having charge of the administration of any kind of vocational education in the state may, if the state so elects, be designated as the state board for the purposes of the act.

In any state the legislature of which does not meet in 1917, if the governor of that state, so far as he is authorized to do so, shall accept the provisions of the act and create a state board of not less than three members to act in co-operation with the federal board for vocational education, the federal board shall recognize such local board until the legislature of such state meets and has been in session sixty days.

Any state may accept the benefits of any one or more of the respective funds created by the act, and it may defer the acceptance of the benefits of such funds and shall be required to meet only the conditions relative to the fund or funds the benefits of which it has accepted. After June 30, 1920, no state shall receive any appropriation for salaries of teachers, supervisors or directors of agricultural subjects until it shall have taken advantage of at least the minimum amount appropriated for their training. After that date no state shall receive any appropriation for the salaries of teachers of trade, home economics and industrial subjects until it shall have taken advantage of at least the minimum amount appropriated for such training.

A federal board for vocational education is created, to consist of the secretary of agriculture, the secretary of commerce, the secretary of labor, the United States commissioner of education and three citizens of the United States to be appointed by the president, by and with the advice and consent of the senate. One of the three citizens shall be a representative of the manufacturing and commercial interests, one a representative of the agricultural interests and one a representative of labor. The board shall elect annually one of its members as chairman. In the first instance, one of the citizen members shall be appointed for one year, one for two years and one for three years, and thereafter for three years each. The members of the board other than the members of the cabinet and the United States commissioner of education shall receive a salary of \$5,000 per annum.

The board shall have power to co-operate with state boards in carrying out the provisions of this act. It shall be the duty of the federal board for vocational education to make or cause to have made studies, investigations and reports with particular reference to their use in aiding the states in the establishment of vocational schools and classes and in giving instruction in agriculture, trades and industries, commerce and commercial pursuits and home economics.

Such studies, investigations and reports shall include agriculture and agricultural processes and requirements upon agricultural workers; trades, industries and apprenticeships, trade and industrial requirements upon industrial workers and classification of industrial processes and pursuits; commerce and commercial pursuits and requirements upon commercial workers; home management, domestic science and the study of related facts and principles, and problems of administration of vocational schools and of courses of study and instruction in vocational subjects.

When the board deems it advisable such studies, investigations and reports concerning agriculture, for the purposes of agricultural education, may be made in co-operation with or through the department of agriculture; such studies, investigations and reports concerning trades and industries, for the purposes of trade and industrial education, may be made in co-operation with or through the department of labor; such studies, investigations and reports concerning commerce and commercial pursuits, for the purposes of commercial education, may be made in co-operation with or through the department of commerce; such studies, investigations and reports concerning the administration of vocational schools, courses of study and instruction in vocational subjects may be made in co-operation with or through the bureau of education.

The commissioner of education may make such recommendations to the board relative to the administration of this act as he may from time to time deem advisable. The chairman of the board shall carry out the rules, regulations and decisions the board may adopt.

There is appropriated to the federal board for vocational education \$200,000 annually for the purpose of making or co-operating in making the studies, investigations and reports provided for in the act, for the purpose of paying the salaries of the officers and assistants and office and other expenses.

In order to secure the benefits of the appropriation for any purpose specified in the act the state board shall prepare plans showing the kinds of vocational education for which it is proposed that the appropriation shall be used; the kinds of schools and equipment; courses of study; methods of instruction; qualifications of teachers; in the case of agricultural subjects the qualifications of supervisors or directors; plans for the training of teachers and plans for the supervision of agricultural education. Such plans shall be submitted by the state board to the federal board and if the federal board finds the same to be in conformity with the provisions of the act they shall be approved. The state board shall make an annual report to the federal board on or before Sept. 1 of each year on the work done in the state and the receipts and expenditures under the act.

The appropriation for the salaries of teachers, supervisors or directors of agricultural subjects and of teachers of trade, home economics and industrial subjects shall be devoted exclusively to the payment of such salaries. The cost of supplementary instruction necessary to build a well rounded course of training shall be borne by the state and local communities. The money expended under the provisions of the act shall be conditioned that for each dollar of federal money expended for salaries or training of teachers the state or local community, or both, shall expend an equal amount for such salaries and training.

Any state may use the appropriation for agricultural purposes or any part of it for the salaries of teachers, supervisors or directors of agricultural subjects, either for the salaries of teachers of such subjects in schools or classes or for the salaries of supervisors or directors of such subjects under a plan of supervision for the state to be set up by the state board, with the approval of the federal board for vocational education. In order to receive the benefits of such appropriation the state board of

any state shall provide in its plan for agricultural education that such education shall be that which is under public supervision or control; that the controlling purpose of such education shall be to fit for useful employment; that such education shall be of less than college grade and be designed to meet the needs of persons over 14 years of age who have entered upon or who are preparing to enter upon the work of the farm or of the farm home; that the state or local community, or both, shall provide the necessary plant and equipment determined upon by the state board, with the approval of the federal board for vocational education, as the minimum requirement for such education in schools and classes in the state; that the amount expended for the maintenance of such education in any school or class receiving the benefit of such appropriation shall be not less annually than the amount fixed by the state board, with the approval of the federal board, as the minimum for such schools or classes in the state; that such schools shall provide for directed or supervised practice in agriculture, either on a farm provided for by the school or other farm, for at least six months a year; that the teachers, supervisors or directors of agricultural subjects shall have at least the minimum qualifications determined for the state by the state board, with the approval of the federal board for vocational education.

In order to receive the benefits of the appropriation for the salaries of teachers of trade, home economics and industrial subjects the state board of any state shall provide in its plan for trade, home economics and industrial education that such education shall be given in schools or classes under public supervision or control; that the controlling purpose of such education shall be to fit for useful employment; that such education shall be of less than college grade and shall be designed to meet the needs of persons over 14 years of age who are preparing for a trade or industrial pursuit or who have entered upon the work of a trade or industrial pursuit; that the state or local community, or both, shall provide the necessary plant and equipment determined upon by the state board, with the approval of the federal board for vocational education, as the minimum requirement in such state for education for any given trade or industrial pursuit; that the total amount expended for the maintenance of such education in any school or class receiving the benefit of such appropriation shall be not less annually than the amount fixed by the state board, with the approval of the federal board, as the minimum for such schools or classes in the state; that such schools or classes giving instruction to persons who have not entered upon employment shall require that at least half of the time of such instruction be given to practical work on a useful or productive basis, such instruction to extend over not less than nine months per year and not less than thirty hours per week; that at least one-third of the sum appropriated to any state for the salaries of teachers of trade, home economics and industrial subjects shall, if expended, be applied to part-time schools or classes of workers over 14 years of age who have entered upon employment, and such subjects in a part-time school or class may mean any subject given to enlarge the civic or vocational intelligence of such workers over 14 and less than 18 years of age. Such part-time schools or classes shall provide for not less than 144 hours of classroom instruction a year. Evening industrial schools shall fix the age of 16 years as a minimum entrance requirement and shall confine instruction to that which is supplemental to the daily employment. For cities and towns of less than 25,000 population the state board, with the approval of the federal board, may modify the conditions as to the length of course and hours of instruction per week to those who have not entered upon employment in order to meet the particular needs of such cities and towns.

In order for any state to receive the benefits of the appropriation for the training of teachers

of agricultural subjects, trade, industrial or home economics subjects, the state board of such state shall provide in its plan for such training that it shall be carried out under the supervision of the state board; that such training shall be given in schools or classes under public supervision or control; that such training shall be given only to persons who have had adequate vocational experience in the line of work for which they are preparing themselves as teachers or who are acquiring such experience or contact as a part of their training; that the state board, with the approval of the federal board, shall establish a minimum for such experience or contact for teachers; that not more than 60 per cent nor less than 20 per cent of the money appropriated for the training of teachers of vocational subjects to any state for any year shall be expended for any one of the following subjects: For the preparation of teachers, supervisors or directors of agricultural subjects, or the preparation of teachers of trade and agricultural subjects, or the preparation of teachers of home economics subjects.

In order to secure the benefits of the appropriations for the salaries of teachers, supervisors or directors of agricultural subjects, or for the salaries of teachers of trade, home economics and industrial subjects, or for the training of teachers, any state shall, through the legislative authority thereof, appoint as custodian for the appropriations its state treasurer, who shall receive and provide for the proper custody and disbursements of all money paid to the state from the appropriations.

The federal board for vocational education shall annually ascertain whether the several states are using or are prepared to use the money received by them in accordance with the provisions of the act. On or before Jan. 1 of each year the federal board for vocational education shall certify to the secretary of the treasury each state which has accepted the provisions of the act and complied therewith, certifying the amounts which each state is entitled to receive. Upon such certification the secretary of the treasury shall pay quarterly to the custodian for vocational education of each state the moneys to which it is entitled under the provisions of the act. The moneys so received by the custodian for vocational education for any state shall be paid out on the requisition of the state board as reimbursement for expenditures already incurred to such schools as are approved by the state board and are entitled to receive such moneys.

Whenever any portion of the fund annually allotted to any state has not been expended for the purpose provided for in the act, a sum equal to such portion shall be deducted by the federal board from the next succeeding annual allotment from such fund to such state.

The federal board for vocational education may withhold the allotment of moneys to any state whenever it shall be determined that such moneys are not being expended for the purposes and under the conditions of the act.

If any allotment is withheld from any state, the state board of such state may appeal to the congress of the United States, and if the congress shall not direct such sum to be paid it shall be covered into the treasury.

If any portion of the moneys received by the custodian for vocational education of any state under the act, for any given purpose named in the act, shall, by any action or contingency, be diminished or lost, it shall be replaced by such state, and until so replaced no subsequent appropriation for such education shall be paid to such state. No portion of any moneys appropriated under the act for the benefit of the states shall be applied, directly or indirectly, to the purchase, erection, preservation or repair of any building or buildings or equipment, or for the purchase or rental of lands, or for the support of any religious or privately owned or conducted school or college.

The federal board for vocational education shall make an annual report to congress, on or

before Dec. 1, on the administration of the act and shall include in such report the reports made by the state boards on the administration of the act by each state and the expenditure of the money allotted to each state. (Approved Feb. 23, 1917.)

GOVERNMENT OF PORTO RICO.

The act applies to the island of Porto Rico and to the adjacent islands belonging to the United States. The second section of the act, which deals with the bill of rights, in addition to the usual features provides that one year after the act is approved it shall be unlawful to import, manufacture, sell or give away any intoxicating liquor or drug except for medicinal, sacramental, industrial and scientific uses as authorized and regulated by the legislature. At any general election within five years after the approval of the act this provision may, upon petition of not less than 10 per cent of the qualified electors of Porto Rico, be submitted to a referendum, and if a majority of all the qualified electors of Porto Rico voting upon such question shall vote to repeal this provision, it shall thereafter not be in force and effect; otherwise it shall be in full force and effect.

The capital of Porto Rico shall be in the city of San Juan and the seat of government shall be maintained there.

CITIZENSHIP.

"All citizens of Porto Rico, as defined by section 7 of the act of April 12, 1900, 'temporarily to provide revenues and a civil government for Porto Rico,' and all natives of Porto Rico who were temporarily absent from that island on April 11, 1899, and have since returned and are permanently residing on that island, and are not citizens of any foreign country, are hereby declared, and shall be deemed and held to be, citizens of the United States: Provided, that any person hereinbefore described may retain his present political status by making a declaration, under oath, of his decision to do so within six months of the taking effect of this act before the District court in the district in which he resides, the declaration to be in form as follows:

"I,, being duly sworn, hereby declare my intention not to become a citizen of the United States as provided in the act of congress conferring United States citizenship upon the citizens of Porto Rico and certain persons permanently residing in said island."

"In the case of any such persons who may be absent from the island during the said six months the term of this proviso may be availed of by transmitting a declaration, under oath, in the form herein provided within six months after the taking effect of this act to the executive secretary of Porto Rico; and provided further, that any person who is born in Porto Rico of an alien parent and is permanently residing in that island may, if of full age, within six months of the taking effect of this act, or if a minor, upon reaching his majority or within one year thereafter, make a sworn declaration before the United States District court of Porto Rico, setting forth therein all the facts connected with his or her birth and residence in Porto Rico and accompanying due proof thereof, and from and after making such declaration shall be considered to be a citizen of the United States."

The statutory laws of the United States not locally inapplicable, except as otherwise provided in the act, shall have the same force and effect in Porto Rico as in the United States. All officials shall be citizens of the United States, and before entering upon the duties of their respective offices shall take an oath to support the constitution of the United States and the laws of Porto Rico.

EXECUTIVE DEPARTMENT.

The supreme executive power shall be vested in an officer whose official title shall be "the governor of Porto Rico." He shall be appointed

by the president, with the advice and consent of the senate, and shall hold office at the pleasure of the president and until his successor is chosen and qualified. The governor shall live in Porto Rico during his official incumbency and maintain his office at the seat of government. He shall have general supervision and control of all the government departments and bureaus and shall be commander-in-chief of the militia, shall appoint certain officers, shall be responsible for the execution of the laws of Porto Rico and of the United States applicable there. He may also veto acts of the legislature.

Departments of justice, finance, interior, education, agriculture and labor and health are created to be headed respectively by an attorney-general, treasurer, commissioner of the interior, commissioner of education, commissioner of agriculture and labor and commissioner of health. The attorney-general and commissioner of education shall be appointed by the president and the others by the governor with the consent of the senate of Porto Rico. The term of office of each is four years. Heads of departments shall reside in Porto Rico during their official incumbency, and those appointed by the governor shall have lived in Porto Rico at least one year prior to their appointment.

The heads of the departments shall collectively form a council to the governor, known as the executive council. The duties of each department head are prescribed by the act. For the purposes of this summary they are sufficiently indicated by the titles.

There shall be appointed by the president an auditor, at an annual salary of \$5,000, for a term of four years, who shall examine, audit and settle all accounts pertaining to the revenues and receipts, from whatever source, of the government of Porto Rico and of the municipal governments of Porto Rico, including public trust funds and funds derived from bond issues; and audit all expenditures of funds or property pertaining to or held in trust by the government of Porto Rico or the municipalities or dependencies thereof.

There shall be appointed by the governor an executive secretary at an annual salary of \$4,000, who shall record the minutes and proceedings of the public service commission, the laws enacted by the legislature, the acts and proceedings of the governor and promulgate laws and orders.

LEGISLATIVE DEPARTMENT.

Local legislative powers shall be vested in a legislature to consist of a senate and a house of representatives. The senate shall consist of nineteen members elected for terms of four years by the qualified electors of Porto Rico. Each of the seven senatorial districts into which the island is apportioned shall have the right to elect two senators, and in addition there shall be elected five senators at large. Senators must be more than 30 years of age and able to read and write either Spanish or English.

The house of representatives shall consist of thirty-nine members elected quadrennially by the qualified electors of Porto Rico. Thirty-five are to be elected, one from each of thirty-five representative districts, and four at large. Representatives must be more than 25 years of age and able to read and write Spanish or English. The act provided that the districting of the island should be made by the executive council of the then existing government and that the first election under the new form of government should take place July 16, 1917. Then senators, representatives, a resident commissioner in the United States, and two public service commissioners were to be elected. Hereafter elections are to be held quadrennially on the first Tuesday after the first Monday in November, beginning with 1920.

The compensation of members of the senate and house of representatives shall be \$7 a day for the first ninety days of each regular session and \$1 a day for each additional day, with mileage at the rate of 10 cents per kilometer. The

sessions of the legislature are to be biennial and are to begin on the second Monday in February. The governor, at the opening of each session, shall submit a budget of receipts and expenditures, which shall be the basis of the biennial appropriation bill. The governor has the power of veto, but in case each house of the legislature pass a bill by a two-thirds vote over his veto, he shall then submit it to the president of the United States. If the president approves the bill, he shall sign it and it shall become a law. If he shall not approve it he shall return it to the governor so stating, and it shall not become a law. All laws enacted by the legislature of Porto Rico shall be reported to the congress of the United States, which reserves the power and authority to annul the same.

At the first election under the act the qualified voters shall be those qualified under the old law. Thereafter voters shall be citizens of the United States, 21 years of age or more, and have such additional qualifications as may be prescribed by the legislature. No property qualifications, however, shall ever be required.

The electors of Porto Rico shall choose a resident commissioner to the United States for a term of four years with a salary of \$7,500 a year, payable by the United States. He must be a bona fide citizen of the United States, more than 25 years of age and able to read and write English.

All grants of franchises, rights and privileges of a public or quasi-public nature shall be made by a public service commission consisting of the heads of the executive departments, the auditors and two commissioners to be elected by the qualified voters for terms of four years. They shall receive \$3 a day for each day's attendance on the sessions of the commission. The legislature of Porto Rico is authorized to enact laws relating to the regulation of rates, tariffs and service of public carriers by rail in Porto Rico, and the public service commission shall have power to enforce such laws.

The judicial power shall be vested in the courts and tribunals of Porto Rico as they existed at the time the act was passed except that the chief justice and associate justices of the Supreme court shall be appointed by the president of the United States.

Porto Rico shall constitute a judicial district, and the president shall appoint a district judge at a salary of \$5,000 a year, a district attorney at a salary of \$4,900 a year and a marshal at a salary of \$3,500 a year, each for a term of four years. This court, which shall be known as the "District Court of the United States for Porto Rico," shall have jurisdiction of all cases cognizable in the district courts of the United States and shall proceed in the same manner. In addition, it shall have charge of the naturalization of aliens and Porto Ricans.

The annual salaries of the following named officials appointed by the president shall be: Governor, \$10,000; heads of executive departments, \$5,000; chief justice of the Supreme court, \$6,500; associate justices of the Supreme court, \$5,500 each. (Approved March 2, 1917.)

PROHIBITION IN ALASKA.

On and after Jan. 1, 1918, it shall be unlawful for any person, house, association, firm, company, club or corporation, his, its or their agents, officers, clerks or servants, to manufacture, sell, give or otherwise dispose of any intoxicating liquor or alcohol of any kind in the territory of Alaska, or to have in his or its possession or to transport any intoxicating liquor or alcohol in the territory of Alaska. The act does not apply to methyl or wood alcohol. Pharmacists may, after having secured a permit for the purpose, transport pure alcohol for scientific, artistic, medicinal or mechanical purposes and sell the same to persons holding permits to purchase. Shipments of wine for sacramental purposes are also permitted under stringent regulations. Persons violating the pro-

visions of the law are subject to a fine of not more than \$1,000 or imprisonment for not more than a year, or to both. (Approved Feb. 14, 1917.)

"BONE DRY" PROHIBITION.

The postoffice appropriation bill, approved March 3, 1917, contained the following section (Sec. 5), popularly known as the "bone dry" prohibition amendment:

No letter, postal card, circular, newspaper, pamphlet or publication of any kind containing any advertisement of spirituous, vinous, malted, fermented or other intoxicating liquors of any kind, or containing a solicitation of an order or orders for said liquors, or any of them, shall be deposited in or carried by the mails of the United States, or be delivered by any postmaster or letter carrier, when addressed or directed to any person, firm, corporation or association, or other addressee, at any place or point in any state or territory of the United States at which it is by the law in force in the state or territory at that time unlawful to advertise or solicit orders for such liquors, or any of them, respectively.

If the publisher of any newspaper or other publication or the agent of such publisher, or if any dealer in such liquors or his agent, shall knowingly deposit or cause to be deposited, or shall knowingly send or cause to be sent, anything to be conveyed or delivered by mail in violation of the provisions of this section, or shall knowingly deliver or cause to be delivered by mail anything herein forbidden to be carried by mail, he shall be fined not more than \$1,000 or imprisoned not more than six months, or both; and for any subsequent offense shall be imprisoned not more than one year. Any person violating any provision of this section may be tried and punished, either in the district in which the unlawful matter or publication was mailed or to which it was carried by mail for delivery, according to direction thereon, or in which it was caused to be delivered by mail to the person to whom it was addressed. Whoever shall order, purchase or cause intoxicating liquors to be transported in interstate commerce, except for scientific, sacramental, medicinal and mechanical purposes, into any state or territory the laws of which state or territory prohibit the manufacture or sale therein of intoxicating liquors for beverage purposes shall be punished as aforesaid: Provided, that nothing herein shall authorize the shipment of liquor into any state contrary to the laws of such state: Provided further, that the postmaster-general is hereby authorized and directed to make public from time to time in suitable bulletins or public notices the names of states in which it is unlawful to advertise or solicit orders for such liquors.

PROHIBITION IN DISTRICT OF COLUMBIA.

On and after Nov. 1, 1917, no person or persons, or any house, company, association, club or corporation, his, its or their agents, officers, clerks or servants, directly or indirectly, shall, in the District of Columbia, manufacture for sale or gift, import for sale or gift, sell, offer for sale, keep for sale, traffic in, barter, export, ship out of the District of Columbia, or exchange for goods or merchandise, or solicit or receive orders for the purchase of, any alcoholic or other prohibited liquors for beverage purposes or for any other than scientific, medicinal, pharmaceutical, mechanical, sacramental or other nonbeverage purposes.

The act contains stringent regulations for the manufacture, receipt and distribution of liquors for nonbeverage purposes and provides heavy penalties for violations of the law. (Approved March 3, 1917.)

HOME FOR LEPERS.

The secretary of the treasury is authorized to obtain by purchase or otherwise a site suitable for the establishment of a home for the care and treatment of persons afflicted with leprosy,

to be administered by the United States public health service; and either the secretary of war, the secretary of the navy, the secretary of the interior, or the secretary of agriculture is authorized to transfer to the secretary of the treasury any abandoned military, naval or other reservation suitable for the purpose, with all buildings and improvements, to be used for the purpose of the home.

There shall be received into the home any person afflicted with leprosy who presents himself or herself for care, detention and treatment, or who may be apprehended under authority of the United States quarantine acts, or any person afflicted with leprosy duly consigned to the home by the proper health authorities of any state, territory or the District of Columbia. The surgeon-general of the public health service is authorized, upon request of such authorities, to send for any person afflicted with leprosy and to convey him or her to such home for detention and treatment.

Regulations shall be prepared by the surgeon-general of the public health service, with the approval of the secretary of the treasury, for the government and administration of the home and for the apprehension, detention, treatment and release of all persons who are inmates thereof.

The secretary of the treasury shall be, and he is hereby, authorized to cause the erection upon such site of suitable and necessary buildings for the purpose of this act at a cost not to exceed \$250,000. (Approved Feb. 3, 1917.)

CONTROL OF RIVER FLOODS.

For controlling the floods of the Mississippi river and continuing its improvement from the head of the passes to the mouth of the Ohio river the secretary of war is directed to carry on, by hired labor or otherwise, the plans of the Mississippi river commission, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate \$45,000,000. Not more than \$10,000,000 shall be expended in any one fiscal year.

All money appropriated shall be expended under the direction of the secretary of war in accordance with the plans and recommendations of the Mississippi river commission, as approved by the chief of engineers, for controlling the floods and for the general improvement of the Mississippi river, and for surveys, including the survey from the head of the passes to the headwaters of the river, and a survey of the Atchafalaya outlet so far as it may be necessary to determine the cost of protecting its basin from the flood waters of the Mississippi, either by its divorcement from the river or by other means, and for the salaries and other expenses of the Mississippi river commission.

No money appropriated under the act shall be expended in the construction or repair of any levee until assurances have been given that the local interests protected thereby will contribute for such construction a sum which the commission shall determine to be equitable, but which shall not be less than half of such sum as may have been allotted by the commission for such work. Such contributions shall be expended under the direction of the commission, but no contribution made by any state or levee district shall be expended in any other state or levee district except with the approval of the state or district so contributing.

Any funds which may hereafter be appropriated under the authority of this act for improving the Mississippi river between the head of the passes and the mouth of the Ohio river and which may be allotted to levees may be expended upon any part of the Mississippi between the head of the passes and Rock Island, Ill.

No money appropriated under the act shall be expended in payment for any right of way for any levee which may be constructed in cooperation with any state or levee district, but all such rights of way shall be provided free

of cost to the United States. No money paid or expense incurred by any state or levee district in securing such rights of way or in any temporary works of emergency during an impending flood, or for the maintenance of any levee line, shall be computed as a part of the contribution of such state or levee district toward the construction or repair of any levee.

The watercourses connected with the Mississippi river to such extent as may be necessary to exclude the flood waters from the upper limits of any delta basin, together with the Ohio river from its mouth to the mouth of the Cache river, may, in the discretion of the commission, receive allotments for improvements now under way or hereafter to be undertaken.

Upon the completion of any levee constructed for flood control under authority of this act, the levee shall be turned over to the levee district protected thereby for maintenance thereafter; but for all other purposes the United States shall retain such control over the same as it may have the right to exercise upon such completion.

For controlling the floods, removing the debris and continuing the improvement of the Sacramento river, California, in accordance with the plans of the California debris commission, the secretary of war is authorized and directed to carry on continuously, by hired labor or otherwise, the plan of the commission, approved by the chief of engineers of the United States army and the board of engineers for rivers and harbors, and in so far as said plan provides for the rectification and enlargement of river channels and the construction of weirs, to be paid for as appropriations may from time to time be made by law, not to exceed in the aggregate \$5,600,000. Not more than \$1,000,000 shall be expended therefor during any one fiscal year.

All money appropriated shall be expended under the direction of the secretary of war, in accordance with the plans, specifications and recommendations of the California debris commission, as approved by the chief of engineers, for the control of floods, removal of debris and the general improvement of the Sacramento river. No money shall be expended under authority of this section until assurances have been given satisfactory to the secretary of war (a) that the state of California will contribute annually for such work a sum equal to such sum as may be expended annually therefor by the United States; (b) that such equal contributions by the state of California will continue annually until the full equal share of the cost of such work shall have been contributed by the state; and (c) that the river levees contemplated in the report of the California debris commission, dated Aug. 10, 1910, will be constructed to such grade and section and within such time as may be required by said commission. The total contributions required from California shall not exceed in the aggregate \$5,600,000. Rights of way must be provided free of cost to the United States. Upon completion of the works for flood control they shall be turned over to California for maintenance.

All the provisions of existing law relating to examinations and surveys and to works of improvement of rivers and harbors shall apply, so far as applicable, to examinations and surveys and to works of improvement relating to flood control. And all expenditures of funds hereafter appropriated for works and projects relating to flood control shall be made in accordance with and subject to the law governing the disbursement and expenditure of funds appropriated for the improvement of rivers and harbors.

All examinations and surveys of projects relating to flood control shall include a comprehensive study of the watershed or watersheds, and the report thereon in addition to any other matter upon which a report is required shall give such data as it may be practicable to secure in regard to (a) the extent and character of the area to be affected by the proposed improvement; (b) the probable effect upon any navigable water or waterway; (c) the possible

economical development and utilization of water power; and (d) such other uses as may be properly related to or co-ordinated with the project. And the heads of the several departments of the government may, in their discretion, and shall upon the request of the secretary of war, detail representatives from their respective departments to assist the engineers of the army in the study and examination of such watersheds, to the end that duplication of work may be avoided and the various services of the government economically co-ordinated therein. All reports on preliminary examinations hereafter authorized, together with the report of the board of engineers for rivers and harbors thereon and the separate report of the representative of any other department, shall be submitted to the secretary of war by the chief of engineers, with his recommendations, and shall be transmitted by the secretary of war to the house of representatives.

Salary of the civilian members of the Mississippi river commission shall hereafter be \$5,000 per annum. (Approved March 1, 1917.)

MOUNT MCKINLEY NATIONAL PARK.

The act sets apart a tract of land in the territory of Alaska embracing Mount McKinley as a public park for the benefit and enjoyment of the people, under the name of Mount McKinley national park. It is bounded as follows: Beginning at a point on the summit of a hill between the two forks of the headwaters of the Toklat river, approximate latitude 63 degrees 47 minutes, longitude 150 degrees 20 minutes; thence south 6 degrees 20 minutes west nineteen miles; thence south 68 degrees west sixty miles; thence in a southeasterly direction approximately twenty-eight miles to the summit of Mount Russell; thence in a northeasterly direction approximately eighty-nine miles to a point twenty-five miles due south of a point due east of the point of beginning; thence due north twenty-five miles to said point, and thence due west twenty-eight and one-half miles to the point of beginning.

Nothing in the act affects any valid existing claim, location or entry under the land laws of the United States nor mineral land laws applicable to the lands in the park.

The park shall be under the executive control of the secretary of the interior, who shall publish rules and regulations for its care, protection, management and improvement, such rules being primarily aimed at the freest use of the park for recreation purposes by the public and for the preservation of animals, birds and fish, as well as of the natural curiosities and scenic beauties of the region. The park is established as a game refuge, and no person shall kill any game in the park except under an order from the secretary of the interior for the protection of persons or to protect or prevent the extermination of other animals or birds. Prospectors and miners engaged in prospecting or mining in the park may take and kill so much game or birds as may be needed for their actual necessities when short of food; but in no case shall animals or birds be killed in the park for sale or removal therefrom, or wantonly.

The secretary of the interior may execute leases to parcels of ground not exceeding twenty acres in extent for periods not to exceed twenty years whenever such ground is necessary for the erection of establishments for the accommodation of visitors; may grant such other necessary privileges and concessions as he deems wise for the accommodation of visitors, and may likewise arrange for the removal of such mature or dead or down timber as he may deem necessary and advisable for the protection and improvement of the park. No appropriation for the maintenance of the park in excess of \$10,000 annually shall be made unless the same shall have first been expressly authorized by law. (Approved Feb. 26, 1917.)

[This new reservation, which incloses an area of 2,200 square miles, lies in south central Alaska

and contains the loftiest mountain in America. Mount McKinley rises 20,300 feet above sea level. It is nearly 6,000 feet higher than Mount Whitney, the loftiest summit within the borders of the continental United States. There are a few loftier mountains in the world, notably in the Himalayas, but none which rises so far above the neighboring country. The valleys of the Himalayas are from 7,000 to 10,000 feet and more in altitude; the valleys of the Mount McKinley national park range from 1,800 to 3,000 feet in altitude. McKinley's elevation above the level of immediate observation, therefore, is thousands of feet higher than that of any other mountain, and the sublimity of the spectacle it presents is correspondingly greater.

The magnificence of the spectacle is further increased by the fact that the upper 14,000 feet of the mountain is covered with snow and ice. Some of the hugest glaciers in the world flow from McKinley's sides. The south side of Mount McKinley, which is the climax of the Alaskan range, is nearly impassable. It is covered by glaciers of enormous bulk; the annual snowfall in some places reaches a depth of sixty feet. On the north side, however, is a rolling country dotted with beautiful lakes and forests and inhabited by herds of caribou. In fact, the special reason why congress set apart the region at this time was to conserve the wild animal life in advance of the invasion of hunters which the new government railroad will bring into Alaska, the road as projected running within twenty miles of this greatest of nature's spectacles.]

GULFORD COURTHOUSE NATIONAL PARK.

In order to preserve for historical and military study one of the most remarkable battle fields of the revolutionary war, the battle field of Guilford Courthouse in the state of North Carolina is declared to be a national military park. The tracts of land which are described in the act consist of 125 acres in the county of Guilford, Morehead township, the property of the Guilford Battle Ground company, which is to deed the property over to the secretary of war, who is authorized to receive it. The area shall be known as the Guilford Courthouse National Military Park. The affairs of the park, subject to the supervision of the secretary of war, shall be in charge of three commissioners, one of whom shall be a resident of Guilford county, North Carolina, one a resident of Maryland and one a resident of Delaware. The resident commissioner shall serve as chairman and secretary of the commission and shall receive \$1,000 a year. The other commissioners are to receive \$100 a year and no other compensation. The duty of the commission is to open and maintain roads and mark with historical tablets or otherwise the lines of the troops engaged in the battle of Guilford Courthouse and other historical points of interest. (Approved March 2, 1917.)

[The battle of Guilford Courthouse was fought March 15, 1781, between the British under Cornwallis and the Americans under Greene. The British though nominally victors had the heaviest casualties and had to abandon the Carolinas.]

STOCK RAISING HOMESTEADS.

It shall be lawful for any person qualified to make entry under the homestead laws of the United States to make a stock raising homestead entry for not exceeding 640 acres of unappropriated unreserved public land in reasonably compact form. Land so entered must first have been designated by the secretary of the interior as "stock raising lands." The secretary is authorized to designate as subject to entry under the act lands the surface of which is chiefly valuable for grazing and raising forage crops, do not contain merchantable timber, are not susceptible of irrigation from any known source of water supply and are of such a character that 640 acres are reasonably required for the support of a family. Instead of cultivation as required by the homestead laws the entryman shall be required to make permanent improvements to the value of not less than \$1.25 an acre upon

the land, before final proof is submitted, tending to increase the value of the land for stock raising purposes, half of such improvements to be made within three years after the entry. (Approved Dec. 29, 1916.)

PROTECTION OF FLAG.

Hereafter any person who, within the District of Columbia, in any manner, for exhibition or display, shall place or cause to be placed any word, figure, mark, picture, design, drawing or any advertisement of any nature upon any flag, standard, colors or ensign of the United States of America, or shall expose or cause to be exposed to public view any such flag, standard, colors or ensign upon which shall have been printed, painted or otherwise placed, or to which shall be attached, appended, affixed or annexed any word, figure, mark, picture, design or drawing, or any advertisement of any nature; or who, within the District of Columbia, shall manufacture, sell, expose for sale or to public view or give away or have in possession for sale or to be given away or for use for any purpose, any article or substance being an article of merchandise, or a receptacle for merchandise or article or thing for carrying or transporting merchandise, upon which shall have been printed, painted, attached or otherwise placed a representation of any such flag, standard, colors or ensign, to advertise, call attention to, decorate, mark or distinguish the article or substance on which so placed; or who, within the District of Columbia, shall publicly mutilate, deface, defile or defy, trample upon or cast contempt, either by word or act, upon any such flag, standard, colors or ensign, shall be deemed guilty of a misdemeanor and shall be punished by a fine not exceeding \$100 or by imprisonment for not more than thirty days, or both, in the discretion of the court. The words "flag, standard, colors or ensign," as used herein, shall include any flag, standard, colors, ensign or any picture or representation of either, or of any part or parts of either, made of any substance or represented on any substance, of any size evidently purporting to be either of said flag, standard, colors or ensign of the United States of America or a picture or a representation of either, upon which shall be shown the colors, the stars and the stripes, in any number of either thereof, or of any part or parts of either, by which the average person seeing the same without deliberation may believe the same to represent the flag, colors, standard or ensign of the United States of America. (Approved Feb. 8, 1917.)

THREATS AGAINST PRESIDENT.

Any person who knowingly and willfully deposits or causes to be deposited for conveyance in the mail or for delivery from any postoffice or by any letter carrier any letter, paper, writing, print, missive or document containing any threat to take the life of or to inflict bodily harm upon the president of the United States or who knowingly and willfully otherwise makes any such threat against the president, shall upon conviction be fined not exceeding \$1,000, or imprisonment not exceeding five years, or both. (Approved Feb. 14, 1917.)

INCREASE OF MILITARY REVENUES.

(See "Work of 65th Congress" for later law.) Following is the full text of the "Act to provide increased revenue to defray the expenses of the increased appropriations for the army and navy and the extension of fortifications":

TITLE I.—SPECIAL PREPAREDNESS FUND.

Section 1. That the receipts from the tax imposed by Title II and one-third of the receipts from the tax imposed by Title III of this act shall constitute a separate fund in the treasury to be used only for the expenditures incurred under the act entitled "An act making appropriations for the support of the army for the fiscal year ending June 30, 1917, and for other purposes," approved Aug. 29, 1916; the act

entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes," approved Aug. 29, 1916; and the act entitled "An act making appropriations for fortifications and other works of defense, for the armament thereof, for the procurement of heavy ordnance for trial and service, and for other purposes," approved July 6, 1916, or any other act or acts subsequent thereto making appropriations for army, navy or fortification purposes. In addition to such receipts from the taxes imposed under Titles II and III of this act, there shall be credited annually, beginning with the fiscal year ending June 30, 1918, to such separate fund, the sum of \$175,000,000, such sum being the estimated additional revenue to be derived under the act entitled "An act to increase the revenue, and for other purposes," approved Sept. 8, 1916, in excess of the revenue to be derived under then existing laws: Provided, that the secretary of the treasury may use such fund for other purposes, but such fund shall be reimbursed for any portion thereof so used.

TITLE II.—EXCESS PROFITS TAX.

Sec. 200. That when used in this title—The term "corporation" includes joint stock companies or associations and insurance companies.

The term "United States" means only the states, the territories of Alaska and Hawaii, and the District of Columbia; and

The term "taxable year" means the twelve months ending Dec. 31, except in the case of a corporation or partnership allowed to fix its own fiscal year, in which case it means such fiscal year. The first taxable year shall be the year ending Dec. 31, 1917.

Sec. 201. That in addition to the taxes under existing laws there shall be levied, assessed, collected and paid for each taxable year upon the net income of every corporation and partnership organized, authorized or existing under the laws of the United States, or of any state, territory or district thereof, no matter how created or organized, excepting income derived from the business of life, health and accident insurance combined in one policy issued on the weekly premium payment plan, a tax of 8 per centum of the amount by which such net income exceeds the sum of (a) \$5,000 and (b) 3 per centum of the actual capital invested.

Every foreign corporation and partnership, including corporations and partnerships of the Philippine Islands and Porto Rico, shall pay for each taxable year a like tax upon the amount by which its net income received from all sources within the United States exceeds the sum of (a) 8 per centum of the actual capital invested and used or employed in the business in the United States, and (b) that proportion of \$5,000 which the entire actual capital invested and used or employed in the business in the United States bears to the entire actual capital invested; and in case no such capital is used or employed in the business in the United States the tax shall be imposed upon that portion of such net income which is in excess of the sum of (a) 3 per centum of that proportion of the entire actual capital invested and used or employed in the business which the net income from sources within the United States bears to the entire net income, and (b) that proportion of \$5,000 which the net income from sources within the United States bears to the entire net income.

Sec. 202. That for the purpose of this title, actual capital invested means (1) actual cash paid in, (2) the actual cash value, at the time of payment, of assets other than cash paid in, and (3) paid in or earned surplus and undivided profits used or employed in the business; but does not include money or other property borrowed by the corporation or partnership.

Sec. 203. That the tax herein imposed upon corporations and partnerships shall be computed upon the basis of the net income shown by their income tax returns under Title I of the

act entitled "An act to increase the revenue, and for other purposes," approved Sept. 8, 1916, or under this title, and shall be assessed and collected at the same time and in the same manner as the income tax due under Title I of such act of Sept. 8, 1916: Provided, that for the purpose of this title a partnership shall have the same privilege with reference to fixing its fiscal year as is accorded corporations under section 13 (a) of Title I of such act of Sept. 8, 1916: And provided further, that where a corporation or partnership makes return prior to March 1, 1918, covering its own fiscal year and includes therein any income received during the calendar year ending Dec. 31, 1916, the tax herein imposed shall be that proportion of the tax based upon such full fiscal year which the time from Jan. 1, 1917, to the end of such fiscal year bears to the full fiscal year.

Sec. 204. That corporations exempt from tax under the provisions of section 11 of Title I of the act approved Sept. 8, 1916, and partnerships carrying on or doing the same business shall be exempt from the provisions of this title, and the tax imposed by this title shall not attach to the incomes of partnerships derived from agriculture or from personal services.

Sec. 205. That every corporation having a net income of \$5,000 or more for the taxable year making a return under Title I of such act of Sept. 8, 1916, shall, for the purpose of this title, include in such return a detailed statement of the actual capital invested.

Every partnership having a net income of \$5,000 or more for the taxable year shall render a correct return of the income of the partnership for the taxable year, setting forth specifically the actual capital invested and the gross income for such year and the deductions hereinafter allowed. Such returns shall be rendered at the same time and in the same manner and form as is prescribed for income tax returns under Title I of such act of Sept. 8, 1916. In computing net income of a partnership for the purposes of this title, there shall be allowed like deductions as are allowed to individuals in sections 5 (a) and 6 (a) of such act of Sept. 8, 1916.

Sec. 206. That all administrative, special and general provisions of law, including the laws in relation to the assessment, remission, collection and refund of internal revenue taxes not heretofore specifically repealed and not inconsistent with the provisions of this title are hereby extended and made applicable to the provisions of Title I of such act of Sept. 8, 1916, relating to returns and payment of the tax therein imposed including penalties, are hereby made applicable to the tax required by this title.

Sec. 207. That the commissioner of internal revenue, with the approval of the secretary of the treasury, shall make all necessary regulations for carrying out the provisions of this title, and may require any corporation or partnership subject to the provisions of this title to furnish him with such facts, data and information as in his judgment are necessary to collect the tax provided for in this title.

TITLE III.—ESTATE TAX.

Sec. 300. That Sec. 201, Title II, of the act entitled "An act to increase the revenue, and for other purposes," approved Sept. 8, 1916, be, and the same is hereby, amended to read as follows:

"Sec. 201. That a tax (hereinafter in this title referred to as the tax) equal to the following percentages of the value of the net estate, to be determined as provided in section 203, is hereby imposed upon the transfer of the net estate of every decedent dying after the passage of this act, whether a resident or nonresident of the United States:

"One and one-half per centum of such estate not in excess of \$50,000;

"Three per centum of the amount by which such net estate exceeds \$50,000 and does not exceed \$150,000;

"Four and one-half per centum of the amount by which such net estate exceeds \$150,000 and does not exceed \$250,000;

"Six per centum of the amount by which such net estate exceeds \$250,000 and does not exceed \$450,000;

"Seven and one-half per centum of the amount by which such net estate exceeds \$450,000 and does not exceed \$1,000,000;

"Nine per centum of the amount by which such net estate exceeds \$1,000,000 and does not exceed \$2,000,000;

"Ten and one-half per centum of the amount by which such net estate exceeds \$2,000,000 and does not exceed \$3,000,000;

"Twelve per centum of the amount by which such net estate exceeds \$3,000,000 and does not exceed \$4,000,000;

"Thirteen and one-half per centum of the amount by which such net estate exceeds \$4,000,000 and does not exceed \$5,000,000; and

"Fifteen per centum of the amount by which such net estate exceeds \$5,000,000."

Sec. 301. That the tax on the transfer of the net estate of decedents dying between Sept. 8, 1916, and the passage of this act shall be computed at the rates originally prescribed in the act approved Sept. 8, 1916.

TITLE IV.—MISCELLANEOUS.

Sec. 400. That the secretary of the treasury is hereby authorized to borrow on the credit of the United States from time to time such sums as in his judgment may be required to meet public expenditures on account of the Mexican situation, the construction of the armor-plate plant, the construction of the Alaskan railway and the purchase of the Danish West Indies, or to reimburse the treasury for such expenditures, and to prepare and issue therefor bonds of the United States not exceeding in the aggregate \$100,000,000, in such form as he may prescribe, bearing interest payable quarterly at a rate not exceeding 3 per centum per annum; and such bonds shall be payable, principal and interest, in United States gold coin of the present standard of value, and both principal and interest shall be exempt from all taxes or duties of the United States as well as from taxation in any form by or under state, municipal or local authority, and shall not be receivable by the treasurer of the United States as security for the issue of circulating notes to national banks: Provided, that such bonds may be disposed of by the secretary of the treasury at not less than par, under such regulations as he may prescribe, giving all citizens of the United States an equal opportunity therefor, but no commissions shall be allowed or paid thereon; and a sum not exceeding one-tenth of 1 per centum of the amount of the bonds herein authorized is hereby appropriated, out of any money in the treasury not otherwise appropriated, to pay the expenses of preparing, advertising and issuing the same; And provided further, that in addition to such issue of bonds, the secretary of the treasury may prepare and issue for the purposes specified in this section any portion of the bonds of the United States now available for issue under authority of section 39 of the act entitled "An act to provide revenue, equalize duties and encourage the industries of the United States, and for other purposes," approved Aug. 5, 1909; And provided further, that the issue of bonds under authority of this act and any Panama canal bonds hereafter issued under authority of section 39 of the act entitled "An act to provide revenue, equalize duties and encourage the industries of the United States, and for other purposes," approved Aug. 5, 1909, shall be made redeemable and payable at such times within fifty years after the date of their issue as the secretary of the treasury, in his discretion, may deem advisable.

CERTIFICATES OF INDEBTEDNESS.

Sec. 401. That section 32 of an act entitled "An act providing ways and means to meet war

expenditures, and for other purposes," approved June 13, 1898, as amended by section 40 of an act entitled "An act to provide revenue, equalize duties and encourage the industries of the United States, and for other purposes," approved Aug. 5, 1909, be and the same is hereby amended to read as follows:

"Sec. 32. That the secretary of the treasury is authorized to borrow, from time to time, at a rate of interest not exceeding 3 per centum per annum, such sum or sums as, in his judgment, may be necessary to meet public expenditures, and to issue therefor certificates of indebtedness in such form and in such denominations as he may prescribe; and each certificate so issued shall be payable, with the interest accrued thereon, at such time, not exceeding one year from the date of its issue, as the secretary of the treasury may prescribe: Provided, that the sum of such certificates outstanding shall at no time exceed \$300,000,000, and the provisions of existing law respecting counterfeiting and other fraudulent practices are hereby extended to the bonds and certificates of indebtedness authorized by this act."

RETURNS OF DIVIDENDS.

Sec. 402. That Title I of the act entitled "An act to increase the revenue, and for other purposes," approved Sept. 8, 1916, be amended by adding to Part III a new section, as follows:

"Sec. 26. Every corporation, joint stock company or association, or insurance company subject to the tax herein imposed, when required by the commissioner of internal revenue, shall render a correct return, duly verified under oath, of its payments of dividends, whether made in cash or its equivalent or in stock, including the names and addresses of stockholders and the number of shares owned by each, in such form and manner as may be prescribed by the commissioner of internal revenue, with the approval of the secretary of the treasury." (Approved March 3, 1917.)

NAVAL APPROPRIATION ACT.

Following are the chief provisions of the naval appropriation act for the year ending June 30, 1918:

For aviation, including procuring, producing, constructing, storing and handling aircraft, rigid dirigibles and apparatuses, maintenance of aircraft stations and development of aviation for naval purposes, \$5,133,000.

For marine corps, \$13,358,137.78.

INCREASE OF NAVY.

Of the vessels authorized in the act of Aug. 29, 1916, the construction of the following vessels shall be begun as soon as practicable at a cost exclusive of armor and armament not to exceed the following amounts: Three battle ships, \$15,500,000 each; one battle cruiser, \$19,000,000; three scout cruisers, \$6,000,000 each; fifteen destroyers, \$1,300,000 each; one destroyer tender, \$2,300,000; one submarine tender, \$1,900,000; eighteen coast submarines to have a surface displacement of about 800 tons each, \$1,300,000 each, and the limits of cost for the four battle cruisers and for three scout cruisers authorized, but not yet contracted for, are increased to not to exceed \$19,000,000 each for the battle cruisers and \$6,000,000 each for the scout cruisers, exclusive of armor and armament, and the construction of these vessels shall be begun as soon as practicable.

On account of hulls and outfits and machinery of three battle ships, one battle cruiser, three scout cruisers, fifteen destroyers, one submarine tender, one destroyer tender and other vessels heretofore authorized, \$93,123,000.

On account of submarine torpedo boats heretofore authorized, \$16,816,110, and on account of eighteen additional coast submarine torpedo boats herein appropriated for, \$6,115,170; in all, submarine torpedo boats, \$22,931,280.

Toward the armor and armament of vessels heretofore authorized and additional vessels herein appropriated for, \$44,180,000.

Toward ammunition for the vessels heretofore appropriated for and for the additional vessels herein appropriated for, \$14,528,043.

Total increase of the navy heretofore authorized and herein appropriated for, \$174,762,323.

In the case of national emergency the president is authorized to suspend provisions of law prohibiting more than eight hours' labor in any one day of persons engaged upon work covered by contracts with the United States: Provided, that the wages of persons employed upon such contracts shall be computed on a basic day rate of eight hours' work, with overtime rates to be paid for at not less than time and one-half for all hours worked in excess of eight hours.

NAVAL EMERGENCY FUND.

To enable the president to secure the more economical and expeditious delivery of materials, equipment and munitions and secure the more expeditious construction of ships authorized and for the purchase or construction of such additional torpedo boat destroyers, submarine chasers and such other navy small craft, including aircraft, guns and ammunition for all of said vessels and aircraft and for each and every purpose connected therewith, as the president may direct, to be expended at the direction and in the discretion of the president, \$115,000,000, or so much thereof as may be necessary, and to be immediately available.

In addition to the eighteen submarines heretofore appropriated for, the secretary of the navy is hereby authorized and directed to proceed at once to cause to be constructed twenty coast submarines to have a surface displacement of about 800 tons each at a cost not to exceed \$1,800,000 each, exclusive of armor and armament, on the most approved lines according to plans and specifications to be provided or adopted by the secretary of the navy. The same may be let by contract to private builders or constructed by the government in navy yards, or both, as may be directed by the secretary of the navy.

Said twenty submarines shall be constructed on the Pacific coast: Provided, that the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation from the Atlantic to the Pacific. Eighteen million dollars is hereby appropriated toward the construction of said submarines.

In time of war, or of national emergency arising prior to March 1, 1918, to be determined by the president by proclamation, the president is hereby authorized and empowered, in addition to all other existing provisions of law:

1. Within the limits of the amounts appropriated therefor, to place an order with any person for such ships or war material as the necessities of the government, to be determined by the president, may require and which are of the nature, kind and quantity usually produced or capable of being produced by such person. Compliance with all such orders shall be obligatory on any person to whom such order is given, and such order shall take precedence over all other orders and contracts theretofore placed with such person. If any person owning, leasing or operating any factory equipped for the building or production of ships or war material for the navy shall refuse or fail to give the government such preference in the execution of such an order, or shall refuse to build, supply, furnish or manufacture the kind, quantity or quality of ships or war material so ordered at such reasonable price as shall be determined by the president, the president may take immediate possession of any factory of such person or any part thereof without taking possession of the entire factory, and may use the same at such times and in such manner as he may consider necessary or expedient.

2. Within the limits of the amounts appropriated therefor, to modify or cancel any existing contract for the building, production or purchase of ships or war material; and if any contractor shall refuse or fail to comply with the contract as so modified the president may take immediate possession of any factory of such contractor or any part thereof without taking possession of the entire factory and may use the same at such times and in such manner as he may consider necessary or expedient.

3. To require the owner or occupier of any factory in which ships or war material are built or produced to place at the disposal of the United States the whole or any part of the output of such factory and, within the limits of the amounts appropriated therefor, to deliver such output or parts thereof in such quantities and at such times as may be specified in the order at such reasonable price as shall be determined by the president.

4. To requisition and take over for use or operation by the government any factory or any part thereof without taking possession of the entire factory, whether the United States has or has not any contract or agreement with the owner or occupier of such factory.

All authority granted to the president in this paragraph, to be exercised in time of national emergency, shall cease on March 1, 1918.

Whenever the United States shall cancel or modify any contract, make use of, assume, occupy, requisition or take over any factory or part thereof or any ships or war material in accordance with the provisions of the act, it shall make just compensation therefor, to be determined by the president, and if the amount so determined is unsatisfactory to the person entitled to receive the same, such persons shall be paid 50 per centum of the amount so determined by the president and shall be entitled to sue the United States to recover such further sum as added to the said 50 per centum shall make up such amount as will be just compensation therefor. In the manner provided in section 145 of the judicial code.

The secretary of the navy shall build any of the vessels herein appropriated for in such navy yards as he may designate should it reasonably appear that the persons, firms or corporations,

or the agents thereof, bidding for the construction of any of the vessels, have entered into any combination, agreement or understanding, the effect, object or purpose of which is to deprive the government of fair, open and unrestricted competition in letting contracts for the construction of any of the vessels: Provided, that the secretary of the navy is hereby authorized to build any of the vessels herein authorized in such navy yards as he may designate.

In the event the secretary of the navy is unable to secure from the private shipbuilders contracts for the expeditious construction of the ships heretofore authorized at a fair and reasonable price, the sum of \$12,000,000, or so much thereof as may be necessary, is hereby appropriated to enable the secretary of the navy to equip the navy yards with suitable and necessary machinery, implements, building ways and equipment for the construction of such of said vessels as may be assigned to navy yards for construction.

If in the judgment of the secretary of the navy, the most rapid and economical construction of the battle cruiser herein appropriated for can be obtained thereby, he may contract for the construction of said battle cruiser upon the basis of actual cost, plus a reasonable profit to be determined by him.

That section 44 of the act entitled "An act to codify, revise and amend the penal laws of the United States," approved March 4, 1909, be, and the same is hereby, amended to read as follows:

"Sec. 44. Whoever shall willfully trespass upon, injure or destroy any of the works or property or material of any submarine mine or torpedo or fortification or harbor-defense system owned or constructed or in process of construction by the United States, or shall willfully interfere with the operation or use of any such submarine mine, torpedo, fortification or harbor-defense system, or shall knowingly, willfully or wantonly violate any duly authorized and promulgated order or regulation of the president governing persons or vessels within the limits of defensive sea areas, which defensive sea areas are hereby authorized to be established by order of the president from time to time as may be necessary in his discretion for purposes of national defense, shall be punished on conviction thereof in a District or Circuit Court of Appeals of the United States for the district or circuit in which the offense is committed, or into which the offender is first brought, by a fine of not more than \$5,000, or by imprisonment for a term not exceeding five years, or by both, in the discretion of the court."

Of each of the sums appropriated by this act, except such amounts as may be required to meet obligations authorized in previous acts and for which contracts have been made, no part shall be used to procure through purchase or contract any vessels, armament, articles or materials which the navy yards, gun factories or other industrial plants operated by the navy department are equalled to supply, unless such government plants are operated approximately at their full capacity for not less than one regular shift each working day, except when contract costs are less than costs in the government plants, and except when the government plants are unable to complete the work within the time required, and except in cases of emergency: Provided, that no part of the appropriations made in this act shall be available for the salary or pay of any officer, manager, superintendent, foreman or other person having charge of the work of any employee of the United States government while making or causing to be made with a stop watch or other time-measuring device a time study of any job of any such employee between the starting and completion thereof, or of the movements of any such employee while engaged upon such work; nor shall any part of the appropriations made in this act be available to pay any premium or bonus or cash reward to any employee in ad-

dition to his regular wages, except for suggestions resulting in improvements or economy in the operation of any government plant.

No part of any sum herein appropriated shall be expended for the purchase of structural steel, ship plates, armor, armament or machinery from any persons, firms or corporations who are parties to any existing combination or conspiracy to monopolize the interstate or foreign commerce or trade of the United States, or the commerce or trade between the states and any territory or the District of Columbia, in any of the articles aforesaid, and no purchase of structural steel, ship plates or machinery shall be made at a price in excess of a reasonable profit above the actual cost of manufacture. But this limitation shall in no case apply to any existing contract.

No part of any sum herein appropriated under "Increase of the Navy" shall be used for the payment of any clerical, drafting, inspection or messenger service, or for the pay of any of the other classified force under the various bureaus of the navy department, Washington, D. C.

No part of any sum appropriated by this act shall be used for any expense of the navy department at Washington, D. C., unless specific authority is given by law for such expenditure.

During the fiscal year 1918 all civilian employees in the naval establishment, including on the lump-sum rolls only those persons who are carried thereon at the close of the fiscal year ending June 30, 1917, shall receive increased compensation at the rate of 10 per centum per annum to such employees who receive salaries or wages in such establishment at the rate per annum of less than \$1,200, and increased compensation at the rate of 5 per centum per annum to such employees who receive salaries or wages in such establishment at a rate of not more than \$1,800 per annum.

MORE MIDSHIPMEN.

Hereafter, in addition to the appointment of midshipmen to the United States naval academy, as now prescribed by law, the secretary of the navy is allowed 100 appointments annually, instead of twenty-five as now prescribed by law, to be appointed from the enlisted men of the navy who are citizens of the United States and not more than 20 years of age on the date of entrance to the naval academy, and who shall have served not less than one year as enlisted men on the date of entrance: Provided, that such appointments shall be made in the order of merit from candidates who have, in competition with each other, passed the mental examination now or hereafter required by law for entrance to the naval academy and who passed the physical examination before entrance under existing laws.

The president, in his discretion, is authorized to reduce the course of instruction at the naval academy from four to three years for a period of two years from the date of the approval of this act, and may during said two years graduate classes which have completed a three year course. (Approved March 4, 1917.)

FOR EMERGENCY EXPENDITURES.

Joint resolution.

The secretary of the treasury is authorized to borrow on the credit of the United States from time to time such sums as may be necessary to meet emergency expenditures directed by the president for naval construction or the expediting thereof, as may be authorized by law, not exceeding \$150,000,000, or to reimburse the treasury for such expenditures and to prepare and issue therefor bonds of the United States in such form and subject to such terms and conditions as the secretary of the treasury may prescribe: Provided, that the secretary of the treasury is hereby authorized to issue serial bonds of the United States maturing in equal amounts from date of issue to twenty years from date of issue, bearing interest payable

semiannually at a rate not exceeding 3 per centum per annum: Provided further, that such bonds shall be issued at not less than par, shall bear interest not exceeding 3 per centum per annum, shall not have the circulation privilege attached and that all citizens of the United States shall be given an equal opportunity to subscribe therefor, but no commission shall be allowed or paid thereon; both principal and interest shall be payable in United States gold coin of the present standard of value and shall be exempt from all taxes or duties of the United States, as well as from taxation in any form by or under state, municipal or local authority. In order to pay the necessary expenses connected with said issue of bonds a sum not exceeding one-tenth of 1 per centum of the amount of bonds herein authorized is hereby appropriated, out of any money in the treasury not otherwise appropriated, to be expended as the secretary of the treasury may direct. (Approved March 4, 1917.)

FORTIFICATIONS AND OTHER WORKS OF DEFENSE.

Included in the act (approved Feb. 14, 1917), making appropriations for fortifications and other works of defense, for the armament thereof and for the procurement of heavy ordnance for trial and service were the following items:

- Construction of gun and mortar batteries, \$2,500,000.
- Modernizing older emplacements, \$102,000.
- Construction of fire control stations and accessories, \$608,796.
- Electric light and power plants, \$110,000.
- Searchlights, \$250,000.
- Sites for fortifications, \$100,000.

WEBB-KENYON LIQUOR LAW HELD VALID.

In a decision announced Jan. 8, 1917, the United States Supreme court declared valid and constitutional the Webb-Kenyon law prohibiting the shipments of liquor from wet to dry states. It also sustained a recent West Virginia law prohibiting importations in interstate commerce of liquor for personal use. Following is the official digest prepared by the court of the majority opinion (from which Justices Holmes and Van Devanter dissented):

"1. That the West Virginia law, besides prohibiting the manufacture and sale of all intoxicants except as to that which is permitted for medical, sacramental and manufacturing purposes, also forbids all transportation of liquor and all receipt and possession of liquor transported in the state, whether originating in or outside of the state, and, although it does not prohibit personal use, puts serious restrictions upon the power to obtain for such use.

"The court holds that, in view of the well established police authority of the state over intoxicants, there is no reason to think that this law was in any wise repugnant to the due process clause of the fourteenth amendment to the constitution of the United States. It, however, decides that unless the state authority has an exceptional application to shipments of interstate commerce as the result of the act of congress known as the Webb-Kenyon law the provisions of the state law restricting shipments of intoxicants into the state from other states would be unconstitutional, because interfering with the power of congress to regulate commerce among the states, and consequently would be a direct burden upon such commerce.

"2. Considering the Webb-Kenyon act, the court

Purchase, manufacture, maintenance, operation and repair of airships and other aerial machines, buildings for equipment and other accessories necessary in the aviation section for use in connection with the seacoast defenses of the United States, \$3,600,000.

Purchase, manufacture and test of mountain, field and siege cannon, including their equipment, and machinery necessary for their manufacture at the arsenals, \$6,900,000.

Purchase, manufacture and test of ammunition for the foregoing, \$7,310,000.

Purchase, manufacture and test of seacoast cannon, \$9,231,000.

Purchase, manufacture and test of ammunition for seacoast cannon, for modernizing projectiles on hand and for necessary experiments in connection therewith, \$10,940,000.

Purchase, manufacture and test of ammunition, subcaliber guns and other accessories for seacoast artillery practice, \$572,000.

Alteration and maintenance of mobile artillery, \$1,000,000.

Purchase, manufacture and test of ammunition, subcaliber guns and other accessories for mountain, field and siege artillery practice, \$1,000,000.

Alteration and maintenance of seacoast artillery, \$700,000.

Airships at coast defenses of Philippines, \$600,000; Hawaiian islands, \$600,000.

Ordnance department: Seacoast cannon for coast defenses, \$617,000; ammunition for seacoast cannon, \$2,229,000; alteration and maintenance of seacoast artillery, \$494,510.

All of the material purchased shall be of American manufacture, except in cases when, in the judgment of the secretary of war, it is to the manifest interest of the United States to make purchases in limited quantities abroad.

holds that there is no foundation for the contention that the act only applies to shipments from one state into another for a use prohibited by the state to which the liquor is shipped. On the contrary, it is decided that the Webb-Kenyon act, to use the words of the act, applies to shipments of liquor 'intended to be received, possessed, sold, or in any manner used' in violation of the laws of the state. As this conclusion causes every prohibition of the West Virginia law to be embraced and come under the right conferred by congress by the Webb-Kenyon act, it is decided that the West Virginia law was not in conflict with the commerce clause of the constitution and the power of congress to regulate commerce if congress had power to enact the Webb-Kenyon law.

"3. Disposing of that question, it is decided that congress had the power under the constitution to adopt the Webb-Kenyon law, whether considered from the point of view of original reasoning or in the light of the previous legislation by congress and the decisions of the court holding that legislation valid. It is therefore decided that by virtue of the Webb-Kenyon law there is no power to ship intoxicants from one state into another in violation of the prohibitions of the law of the state into which the liquor is shipped. In other words, it is decided that since the enactment of the Webb-Kenyon law the channels of interstate commerce may not be used to convey liquor into a state against the prohibitions of its laws, or to use interstate commerce as the basis for a right to receive, possess, sell, or in any manner use liquor contrary to the state prohibition."

TUNGSTEN DEPOSITS IN CALIFORNIA.

Exploitation of the tungsten deposits in Inyo county, California, was begun in 1916, when by midsummer two mills having a daily capacity of 400 tons were in operation. The ore bodies that were then mined were from twenty to sixty feet wide and from 150 to 260 feet long. The

area in which scheelite-bearing deposits were found formed, so far as then explored, a belt about twenty miles long. Scheelite forms one of the principal ore minerals of tungsten, which is extensively used in the steel and aluminum industries.

*To each depositor. †Included with state banks.

NOTE.—Returns from the banking departments of ten states include stock savings banks with commercial banks. It is estimated that 300 stock savings banks with \$15,000 depositors and \$250,000 deposits are included with the figures furnished by the state banking departments for state banks. This estimate includes the so called stock savings banks of Michigan. Savings deposits in savings departments of banks and banks and trust companies were reported officially on June 23, 1915, at \$294,594,096.83, and on June 30, 1916, at \$326,156,216.75.

NATIONAL WEALTH OF THE UNITED STATES.

The national wealth of the United States is estimated by the United States census bureau at \$187,739,000,000, or \$1,965 for each man, woman and child in the country. The total includes the value of all kinds of real, personal and other property, taxable and exempt, in the United States exclusive of Alaska, Hawaii, Porto Rico and the Philippines. Omitting the value of property exempt from taxation for the reason that it was not included in the figures for 1850, 1860 and 1870, the wealth for the several census years is as follows:

	Total.	Per cap.
1912.....	\$175,426,000,000	\$1,836
1904.....	100,273,000,000	1,234
1900.....	82,305,000,000	1,083

Year.	Total.	Per cap.
1890.....	\$61,204,000,000	\$975
1880.....	41,642,000,000	836
1870.....	24,055,000,000	624
1860.....	16,160,000,000	514
1850.....	7,136,000,000	308

Including exempt and all other classes of property the estimated national wealth in each of the census years, 1880 to 1912, was:

Year.	Total.	Per cap.
1912.....	\$187,739,000,000	\$1,965
1904.....	107,104,000,000	1,318
1900.....	83,517,000,000	1,165
1890.....	65,037,000,000	1,036
1880.....	43,642,000,000	870

SUEZ CANAL TRAFFIC.

The total receipts of transit tonnage tolls of

the Suez canal in 1913 amounted to \$22,443,643, a decrease of \$1,886,189 as compared with 1912. The decrease was owing to the reduction of the toll rate which went into effect Jan. 1, 1913. The total toll-paying tonnage for 1913 was 19,165,000 tons, or 456,000 tons in excess of that for 1912.

In 1913 the total number of vessels passing through the Suez canal was 5,085 as against 5,373 in 1912. The average time of vessels going through the canal in 1913 was 16 hours 19 minutes. Freight traffic in 1914, 1915 and 1916 was greatly diminished by the war in Europe, but no detailed statistics were published.

THE CAPITOL IN WASHINGTON.

The corner stone of the original capitol building was laid by President Washington Sept. 18, 1793. The north wing was finished in 1810 and the south wing in 1811, a wooden passageway connecting them. The original designs of the structure were made by Dr. William Thornton. The two wings were burned by the British in 1814, but were immediately restored. In 1827 the original building was completed at a cost of \$2,433,844.13. Extensions of the wings were be-

gun in 1851 and completed in 1859. The dome, which is 287 feet 5 inches in height, was completed in 1865. The capitol stands in latitude 38 degrees 53 minutes 20.4 seconds north and longitude 77 degrees 00 minutes 35.7 seconds west from Greenwich. The area covered by the building is 153,112 square feet. Value of building and grounds: Building, \$15,000,000; grounds, \$10,400,000; total, \$25,400,000.

STORAGE SPACE REQUIRED FOR DIFFERENT MATERIALS.

Example—A steamer has a capacity of 180,000 cubic feet for carrying coal. How many tons will she carry?

From the table, average American coal stows 43 cubic feet per ton of 2,240 pounds, so $180,000 \div 43 = 4,186$ tons—the number she would carry.

NOTE—The following table is based on a ton of 2,240 pounds. If the cubic feet per ton of 2,000 pounds is required, multiply the figures given by .892.

DEFINITIONS.

Displacement is the amount of water displaced by a vessel. If a vessel is floating in equilibrium in still water, the weight of the water she displaces equals the weight of the vessel herself with everything on board.

The displacement in cubic feet when floating in salt water divided by 35 (36 if in fresh water) gives the total weight of a ship and her cargo in tons, as 35 cubic feet of salt water weighs one ton (2,240 pounds) and 36 of fresh water the same amount.

The displacement of a steel vessel is calculated to the molded lines (that is, to the outside of the frames) and no allowance is made as a rule for the thickness of the shell plating. For wooden vessels (motor boats, tugs, lighters, etc.) the displacement is calculated to the outside of the planking.

Dead weight is the carrying capacity of a vessel and includes the tons of cargo and coal.

Register ton measurement is the measurement based on a ton of 2,240 pounds occupying 100 cubic feet.

Gross tonnage is the measurement in register tons of the interior capacity of the entire ship.

Net tonnage is the measurement in register tons upon which payment is made, and is the volume of the space available for cargo and passengers.

Block coefficient is the ratio of the volume of the displacement to the volume of a block having the same length, breadth and draft as the vessel. Cargo vessels have block coefficients ranging from .75 to .85, while fast passenger steamers have block coefficients of about .65.

If the length, width and draft of a vessel are multiplied by the block coefficient and this product divided by the weight of water per ton (36 cubic feet for fresh and 35 for salt water per ton of 2,240 pounds) the displacement of the vessel will be obtained.

SHIPPING TERMS.

f. o. b. steamer (free on board steamer); goods to be delivered on board steamer by seller at no extra charge to purchaser.

f. a. s. steamer (free at side steamer); goods to be delivered at side of steamer by seller.

f. l. a. steamer (free from alongside steamer); the seller pays lighterage charges in the port of destination from the steamer.

c. i. f. (cost, insurance and freight); the goods are delivered to the purchaser with the insurance and freight paid by the seller.

c. f. (cost and freight); the goods are delivered to the purchaser with the freight paid by the seller, but no insurance.

f. o. (free over side); the goods are delivered over the side of a vessel; that is, to a lighter or on to a pier, without any extra charge to the purchaser.

Bill of lading (b. l.) is a receipt for goods delivered to a carrier for transportation. The bills of lading of some steamship companies contain the following clause: "Freight is to be considered earned at time of receipt of shipment and is to be paid whether vessel or goods are lost or not." In foreign trade bills of lading are generally made out in triplicate, one for the shipper, one for the consignee and one for the captain of the vessel.

"With exchange" on a draft means that the party on whom the draft is drawn is to pay the cost of collection.

Demurrage—A charge for delay in loading or unloading a vessel.

Lay days are the days agreed upon by the shipper and captain or agent of a vessel for loading and discharging a cargo, beyond which a demurrage will be paid to the owners of the vessel. Sundays and legal holidays do not count unless the term "running days" is inserted, in which case all days are included.

Manifest—A document signed by the captain of a vessel containing a list of the goods and merchandise on board with their destination, for the use of the custom house officials. By United States Revised Statutes 2807 it is required to contain the names of the ports of loading and destination, a description of the vessel and her port, names of owners and master, names of consignees and of passengers and lists of the passengers' baggage and of the sea stores.

Clearance papers—When ready for sea the customs officials must be provided with a detail manifest of the ship's cargo. If the port charges have been paid and her cargo is properly accounted for, then the collector of the port will furnish the captain with clearance papers, without which the vessel must not leave port.

Drawback—A refund of duties paid on imported material that is used in the manufacture of goods that are exported. The United States government allows the exporter the import duty paid, less 1 per cent.

Salvage—The reward granted by law for saving life and property at sea.

Jettison—The throwing overboard of a part of the cargo or any article on board of a ship for the purpose of lightening the ship in case of necessity.

Bill of health—A certificate stating that the vessel comes from a port where no contagious disease prevails, and that none of the passengers (if carried) nor the crew at the time of departure was infected with any disease.

MARINE INSURANCE.

A contract of marine insurance is a contract of indemnity whereby the insurer undertakes to indemnify the insured in the manner and to the extent agreed against marine losses; i. e., the losses incident to marine adventure.

Unless specially mentioned in the policy, goods are not insured until they are on board of the vessel which is to carry them. Below are brief

outlines of clauses and terms occurring in policies.

General average—Suppose a vessel springs a leak and to save her from sinking the captain throws overboard a portion of her cargo. The last shipment loaded on board is generally the first to come out.

If the shipment is fully insured the underwriters will pay the amount assessed against the goods, but whether the goods are insured or not the general average will make good to the owner the value of the goods which were jettisoned less the assessment which the owner is called upon to pay. It is safe to figure that all policies of insurance on goods cover and protect the merchant against assessments in general average.

Thus a merchant can suffer considerable loss by reason of assessment levied against his goods in general average, although the goods arrive at their destination in a perfectly sound condition—but such losses can be fully covered by insurance.

Free of particular average (f. p. a.)—Under American conditions it is understood that no claim for partial loss or damage will be allowed by the underwriters unless the loss or damage is caused by the vessel's having been burned, stranded, sunk or in collision.

With average (w. a.)—This means that no claim will be made on the underwriters for partial loss caused by sea perils unless the damage amounts to 5 per cent or more of the value of the shipment.

Free of all average (f. a. a.)—This, as the clause signifies, means free of all average.

Collision or ruling or running down clause (r. d. c.)—This is a clause in which the underwriters take a burden of a proportion, usually three-quarters, of the damage inflicted on other vessels by collision for which the insured vessel is held to blame. Sometimes this clause is extended to cover the whole of the assured's liabilities arising out of the damage done to property by the collision of the insured vessel with another and the clause is then known as the "four-fourths running down clause."

Inchmaree clause—This clause covers loss of or damage to hull and machinery through the negligence of master, mariners, engineers and pilots, or through explosions, bursting of boilers, breakage of shafts or through any latent defect in the machinery or hull, provided such loss or damage has not resulted from want of due diligence by the owners of the ship or by the manager.

LITHOGRAPHIC STONE INDUSTRY.

In 1916, on account of the war's stopping the importation of Bavarian lithographic stone, there was a production in the United States of about 40,000 pounds of finished stone suitable for lithographic uses. All of this amount was obtained from quarries at Brandenburg, Ky., and sold by a Louisville company at prices ranging from 2½ to 27 cents a pound. The Brandenburg quarries contain three distinct beds from which lithographic stone may be obtained. Two of these beds are about three feet thick and are nine to ten feet thick. They are separated by beds of limestone of other varieties and make up only about 20 per cent of the stone that must be removed. The remaining 80 per cent, however, is available for crushed and pulverized limestone, chicken grit and other uses, and considerable quantities were marketed for these purposes in 1916. It is thought by the United States geological survey that through the sale of these by-products the lithographic stone can be produced as cheaply as the Bavarian article.

• COTTON FIBER FOR EXPLOSIVES.

In the calendar year 1915 there were 244,003 bales of bleached cotton fiber of 500 pounds each used in the United States in the manufacture of gun cotton and other explosives. In 1916 the amount increased to 533,710 bales. The loss in preparing linters and hull fiber for use in nitration is from 30 to 40 per cent according to the condition of the raw fiber, some stock being quite clean and some very trashy.

FUNCTIONS AND DUTIES.

Under an act of congress approved Jan. 23, 1915, it was provided that in lieu of the then existing revenue cutter service and life saving service there should be established an organization to be known as the coast guard which was to constitute a part of the military forces of the United States, operating under the secretary of the navy in time of war and under the treasury department in time of peace. The revenue cutter service had existed since 1790, while the life saving service had its beginning in 1848, although it was not made into a separate establishment until June 18, 1878. The consolidation of the two services was completed in 1915. The coast guard being a part of the military forces of the government, the military system of the former revenue cutter service was utilized as a basis for the organization of the coast guard. The transfer of the personnel of the former life saving service to the coast guard was accomplished by issuing appointments as commissioned officers, warrant officers and petty officers to the district superintendents, keepers and No. 1 surfmen, respectively, and regularly enlisting the surfmen. The total authorized complement of warrant officers, petty officers and men is 3,886. The pay of the commissioned personnel, except for the grade of district superintendent, corresponds with the pay and allowances of like rank in the army. The pay of warrant officers and enlisted men remains the same as before the consolidation of the services. Warrant officers are appointed by the secretary of the treasury and hold their appointments during good behavior. Petty officers and other men are enlisted for periods of one year. Warrant and petty officers receive 10 per cent increase for every five years of service, not to exceed 40 per cent in all. Enlisted men receive an increase for each three years of continuous service up to and including fifteen years.

The authorized commissioned personnel of the coast guard is 255, divided into the following grades: One captain commandant, 6 senior captains, 31 captains, 37 first lieutenants, 42 second lieutenants, 42 third lieutenants, 1 engineer in chief, 6 captains of engineers, 28 first lieutenants of engineers, 22 second lieutenants of engineers, 24 third lieutenants of engineers, 2 constructors with rank of first lieutenant, 1 district superintendent with relative rank of captain, 3 district superintendents with relative rank of first lieutenant, 4 district superintendents with rela-

tive rank of second lieutenant, and 5 district superintendents with relative rank of third lieutenant. A coast guard academy is maintained in New London, Conn. June 30, 1915, there were seven cadets of the line and six cadets engineers at the academy. The school course extends over three years and embraces instruction in professional and academic subjects. Admission is by competitive examination and candidates must be not less than 18 nor more than 24 years of age. Candidates for the engineer corps must be not less than 21 nor more than 26 years of age.

By law the officers of the revenue cutter service rank as follows:

Captain commandant, with colonel in army and captain in navy.
 Senior captain and engineer in chief, with lieutenant-colonel in army and commander in the navy.
 Captain and captain of engineers, with major in army and lieutenant-commander in navy.
 First lieutenant and first lieutenant of engineers, with captain in army and senior lieutenant in navy.
 Second lieutenant and second lieutenant of engineers, with first lieutenant in army and junior lieutenant in navy.
 Third lieutenant and third lieutenant of engineers, with second lieutenant in army and ensign in navy.

DUTIES OF COAST GUARD.

In general the duties of the coast guard may be classified as follows:

1. Rendering assistance to vessels in distress and saving life and property.
2. Destruction or removal of wrecks, derelicts and other floating dangers to navigation.
3. Extending medical aid to United States vessels engaged in deep sea fisheries.
4. Protection of the customs revenue.
5. Operating as a part of the navy in time of war or when the president shall direct.
6. Enforcement of law and regulations governing anchorage of vessels in navigable waters.
7. Enforcement of law relative to quarantine and neutrality.
8. Suppression of mutinies on merchant vessels.
9. Enforcement of navigation and other laws governing merchant vessels and motor boats.
10. Enforcement of law to provide for safety of life on navigable waters during regattas and marine parades.
11. Protection of game and the seal and other fisheries in Alaska, etc.
12. Enforcement of sponge fishing law.

In addition to the foregoing the services of the coast guard include many other things, such as warning vessels running into danger, medical and surgical aid to the sick and injured, recovery and burial of bodies cast up by the waters, extinguishing fires, maintenance of public order, acting as pilots in emergencies and furnishing transportation to other branches of the public service.

EQUIPMENT.

The equipment of the coast guard consists of twenty-four cruising cutters, eighteen harbor cutters and 279 coast stations. The stations are distributed as follows: First district (Maine and New Hampshire), 15; second district (Massachusetts), 32; third district (Rhode Island and Fishers Island), 10; fourth district (Long Island), 20; fifth district (New Jersey), 41; sixth district (coast between Delaware and Chesapeake bays), 19; seventh district (Virginia south of Chesapeake bay), 34; eighth district (South Carolina, Georgia and east coast of Florida), 9; ninth district (coast of United States on Gulf of Mexico), 8; tenth district (Lakes Erie and Ontario and Louisville, Ky.), 12; eleventh district (Lakes Huron and Superior), 19; twelfth district (Lake Michigan), 31; thirteenth district (California, Oregon, Washington and Nome, Alaska), 19.

Following are the names, dates of construction (in parentheses), chief dimensions, tonnage, arma-

ment, speed and headquarters of the vessels of the coast guard:

CRUISING CUTTERS.

Acushnet (1908)—Length, 152 feet; beam, 29 feet; draft, 13 feet 9 inches; displacement, 800 tons; two one-pounder guns; speed, 12½ knots; Woods Hole, Mass.

Algonquin (1898)—Length, 205 feet 6 inches; beam, 32 feet; draft, 13½ feet; displacement, 1,181 tons; four six-pounder guns; speed, 16 knots; San Juan, P. R.

Androscoggin (1908)—Length, 210 feet; beam, 35 feet 2 inches; draft, 17½ feet; displacement, 1,600 tons; four six-pounder guns; Portland, Me.

Apache (1891)—Length, 188 feet; beam, 29 feet; draft, 9 feet 3 inches; displacement, 700 tons; three three-pounder guns; Baltimore, Md.

Bear (1874)—Length, 198 feet; beam 28½ feet; draft, 13 feet 2 inches; displacement, 1,700 tons; speed, 8 knots; three six-pounder guns; San Diego, Cal.

Gresham (1897)—Length, 205½ feet; beam, 32 feet; draft, 12½ feet; displacement, 1,090 tons; speed, 17 knots; four six-pounder guns; Boston, Mass.

Itasca (1893)—Length, 189½ feet; beam, 32 feet; draft, 13 feet 10 inches; displacement, 980 tons; speed, 14½ knots; four six-pounder guns; practice ship.

Manning (1897)—Length, 205 feet; beam, 32 feet; draft, 13 feet 9 inches; displacement, 1,150 tons; speed, 17 knots; four six-pounder guns; Astoria, Ore.

Mohawk (1902)—Length, 205½ feet; beam, 32 feet; draft, 12 feet 7 inches; displacement, 1,150 tons; four six-pounder guns; New York, N. Y.

Morrill (1889)—Length 145 feet 3 inches; beam, 24 feet; draft, 9½ feet; displacement, 420 tons; one three-pounder gun; Detroit, Mich.

Onondaga (1898)—Length, 205½ feet; beam, 32 feet; draft, 13 feet 2 inches; displacement, 1,190 tons; four six-pounder guns; Norfolk, Va.

Ossipee (1915)—Length, 165 feet 10 inches; beam, 32 feet; draft, 11 feet 6 inches; displacement, 908 tons; four rapid-fire six-pounder guns; speed 12½ knots; Portland, Me.

Pamlico (1907)—Length, 153 feet; beam, 30 feet; draft, 5 feet 8 inches; displacement, 450 tons; two three-pounder guns; Newbern, N. C.

Seminole (1900)—Length, 138 feet; beam, 29½ feet; draft, 11 feet 8 inches; displacement, 845 tons; nominal speed, 16½ knots; four six-pounder guns; Wilmington, N. C.

Seneca (1908)—Length, 204 feet; beam, 34 feet; draft, 17 feet 3 inches; displacement, 1,445 tons; speed, 12½ knots; four six-pounder guns; used exclusively as a derelict destroyer; New York, N. Y.

Shohomish (1907)—Length, 152 feet; beam, 29 feet; draft, 15 feet 5 inches; displacement, 880 tons; two one-pounder guns; used chiefly for life sav-

ing purposes on north Pacific coast; Port Angeles, Wash.

Tallapoosa (1915)—Length, 165 feet 10 inches; beam, 32 feet; draft, 11 feet 6 inches; displacement, 912 tons; speed, 12½ knots; oil burner; four rapid-fire six-pounders; Mobile, Ala.

Tampa (1912)—Length, 190 feet; beam, 32½ feet; draft, 14 feet 1 inch; displacement, 1,300 tons; three six pounder guns; speed, 12½ knots; Key West, Fla.

Tuscarora (1902)—Length, 178 feet; beam, 30 feet; draft, 10 feet 11 inches; displacement, 740 tons; one three-pounder gun; Milwaukee, Wis.

Unalga (1912)—Length, 190 feet; beam, 32½ feet; draft, 14 feet 1 inch; displacement, 1,180 tons; speed, 12½ knots; three six-pounder guns; Seattle, Wash.

Yamacraw (1909)—Length, 191 feet 8 inches; beam, 32½ feet; draft, 13 feet; displacement, 1,030 tons; four six-pounders; Savannah, Ga.

HARBOR CUTTERS AND LAUNCHES.

Alert (1907)—Launch; length, 61½ feet; Mobile, Ala.

Arcata (1903)—Tug; length, 85 feet; displacement, 140 tons; Port Townsend, Wash.

Calumet (1894)—Harbor boat; length, 94½ feet; displacement, 170 tons; New York, N. Y.

Davey (1908)—Harbor vessel; length, 92½ feet; displacement, 180 tons; New Orleans, La.

Golden Gate (1896)—Harbor vessel; length, 110 feet; displacement, 240 tons; San Francisco, Cal.

Guard (1914)—Harbor craft; length, 67½ feet; Mare Island navy yard.

Guide (1907)—Motor boat; length, 70 feet; New York, N. Y.

Guthrie (1895)—Harbor vessel; length, 88 feet; displacement, 150 tons; Baltimore, Md.

Hartley (1875)—Harbor vessel; length, 64½ feet; displacement, 65 tons; San Francisco, Cal.

Hudson (1893)—Harbor vessel; length, 96½ feet; displacement, 180 tons; New York, N. Y.

Mackinac (1903)—Harbor vessel; length, 110 feet; displacement, 240 tons; Sault Ste. Marie, Mich.

Manhattan (1873)—Harbor vessel; length, 102 feet; displacement, 145 tons; New York, N. Y.

Penrose (1883)—Launch; length, 67 feet; Pensacola, Fla.

Scout (1896)—Steam launch; length, 63 feet; Seattle, Wash.

Vigilant (1910)—Motor launch; length, 45 feet; Sault Ste. Marie, Mich.

Winnisimmet (1903)—Harbor vessel; length, 96½ feet; displacement, 180 tons; Boston, Mass.

Wissahickon (1904)—Harbor vessel; length, 96½ feet; displacement, 195 tons; Philadelphia, Pa.

There are in addition a number of minor vessels used for various purposes.

STATION SHIP.

Colfax—Length, 179 feet 5 inches; beam, 25 feet; draft, 10 feet; displacement, 486 tons; used as station ship at service depot, Arundel Cove, Md.

MANUFACTURE OF AUTOMOBILES IN THE UNITED STATES.

[From U. S. census report, 1916.]

In 1914 there were in the United States 338 establishments manufacturing complete automobiles, their output being 573,114 machines, valued at \$465,642,474, as compared with 315 establishments in 1909 with an output of 127,287 machines valued at \$165,069,404. Following is a comparative summary of the various kinds of machines made in 1914 and 1909 with the percentage of increase. Only two establishments made steam automobiles in 1914, and to avoid disclosing their operations the statistics for these companies were consolidated with those for gasoline machines.

MOTORCYCLES AND BICYCLES.

There were manufactured in 1914 62,793 motorcycles valued at \$12,306,447, and 398,899 bicycles, valued at \$5,361,229. In 1909 the output was 18,628 motorcycles, valued at \$3,015,988, and 233,777 bicycles, valued at \$3,228,189. The number of establishments reporting in 1914 was 94 as compared with 122 in 1909.

PRODUCTION OF SULPHURIC ACID.

Returns made to the geological survey in Washington, D. C., show that in 1916 the production in the United States of sulphuric acid of strengths of 50, 60 and 66 degrees, expressed in terms of 50 degree acid, was 4,475,000 tons, or about 600,000 tons more than in 1915. The

most notable feature in the industry was the great increase in the production of acids of strengths greater than 66 degrees. More than 500,000 tons of such acids were made in 1916 as compared with less than 200,000 tons in 1915.

MINES AND QUARRIES IN THE UNITED STATES.

[From reports of census bureau, 1912 and 1913.]

In 1909 in the United States, exclusive of Alaska, Hawaii, Porto Rico and other outlying noncontiguous territory, 23,682 operators conducted 27,240 mines and quarries and 166,448 petroleum and natural gas wells. Of the operators 3,749 were engaged solely in development work, upon which in 1909, the sum of \$31,548,735 was expended. In Alaska in 1909 there were 673 operators, who employed 8,025 persons, in the mining industry. The total expenses of these operators amounted to \$13,220,200, while the capital invested was reported as \$47,749,164. The total value of products was \$16,933,427, of which amount \$16,327,752 consisted of gold and silver. In Hawaii and Porto Rico the total value of product for the eighteen operators reported was only \$26,414.

The total number of persons engaged in connection with producing mines, quarries and wells, as reported on Dec. 15, 1909, or nearest representative day, was 1,139,332, of whom wage earners numbered 1,065,233, proprietors and firm members 29,922 and salaried employees 44,127. In mines, quarries and wells for which development work only was carried on there was a total of 27,616 persons, of whom 21,499 were wage earners. Of the total number of persons, 1,166,918, employed in productive and nonproductive mines, 1,158,775 were men 16 years of age and over, and 8,173 were boys under 16 years of age. Distributed by sex, 1,162,840 were male and 4,103 female, the latter being employed in supervisory and clerical capacities.

The total capital invested in all mining enterprises on Dec. 31, 1909, as reported, was \$3,662,527,064, of which \$3,380,525,841 was invested in productive enterprises and \$282,001,223 in those in which development work only was carried on.

NOTE—Estimates of population are required primarily for use in the census bureau in calculating death rates and per capita averages for years other than the census year. The so called arithmetical method was adopted for computing these estimates. It is the simplest and it has been shown by experience to come nearer in accuracy in the majority of cases than any other formula. It rests on the assumption that the increase in population each year since the enumeration is equal to the annual increase from 1900 to 1910.

Y.; Cleveland, O.; Omaha, Neb.; Minneapolis, Minn.; Milwaukee, Wis., and St. Paul, Minn., having a comparatively small negro population. The negro population of all large cities in 1910 is given elsewhere in this volume.

METROPOLITAN DISTRICTS IN THE UNITED STATES (1910).

Statistics have been compiled by the bureau of the census showing the population of the chief cities of the United States together with their suburbs, comprising what may be termed "metropolitan districts." A district of this character is defined as consisting of the city together with the urban portion of the territory lying within ten miles of the city limits. The following table shows the metropolitan districts of cities having a population of 200,000 or more in 1910:

CENTER OF POPULATION AND MEDIAN LINES.

The center of population, according to the bureau of the census, may be said to represent the center of the gravity of the population. If the surface of the United States be considered as a rigid plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight, and each, therefore, to exert a pressure on any supporting pivotal point directly proportional to his

distance from the point, the pivotal point on which the plane balances would, of course, be its center of gravity, and this is the point referred to by the term "center of population" as used by the census bureau in its reports.

The median point, which may be described as the numerical center of population, is in no sense a center of gravity. In determining the median point distance is not taken into account.

and the location of the units of population is considered only in relation to the intersecting median lines—as being north or south of the median parallel and east and west of the meridian.

The position of the center of population and its movement during each decade since 1790 are shown in the following table:

MEDIAN LINES.

In connection with the definition of the median point another method of presenting facts with regard to the geographical distribution of the population has been noted. Involving the location of median lines. A parallel of latitude is determined which evenly divides the population so that the population north of that parallel is the same as that south. Similarly, a meridian of longitude is determined which divides the population evenly as between east and west. In calculating these median lines it is necessary, in the case of the square degrees of latitude and longitude which are traversed by the lines themselves, to assume that the population is evenly distributed through these square degrees or to make an estimated adjustment where this is obviously not the case.

The eastern terminus of the median parallel, according to the census of 1910, is on the New Jersey coast near Seagirt. In its course west this line passes through central New Jersey, leaving the state near Burlington and entering Pennsylvania a few miles north of Philadelphia, thence passing through Norristown and continu-

ing through southern Pennsylvania and across the northern extremity of West Virginia, leaving the latter state at a point a few miles north of Wheeling. It nearly bisects Ohio, Indiana and Illinois, crossing about ten miles north of Columbus, O.; twenty-five miles north of Indianapolis, Ind.; and about twenty miles north of Springfield, Ill. Through Missouri it runs about thirty miles south of the Iowa and Missouri line, thence passing through Nebraska about ten miles north of its southern boundary, and across the northern part of Colorado, passing about five miles north of Boulder City. Its location in Utah is about forty-five miles south of Salt Lake City. There are no large towns near its course across the northern part of Nevada and California. The western terminus of the median parallel is on the Pacific coast, in Humboldt county, California, about five miles north of Point Delgada and twenty miles south of Cape Mendocino, the point of continental United States extending farthest west.

The median meridian starts at Whitefish point, on the northern peninsula of Michigan, near the eastern end of Lake Superior, thence passing

south about twenty-five miles west of Lansing and through Indiana about ten miles west of the Indiana-Ohio boundary and twenty-five miles west of Cincinnati. South of the Ohio river it bisects Kentucky, crosses eastern Tennessee and leaves that state twenty miles east of Chattanooga. Through Georgia it passes close to the Georgia-Alabama line, about two miles west of Columbus, Ga., leaving the state near the intersection of the Alabama, Georgia and Florida boundary lines. It then crosses the northwestern part of Florida and terminates in the Gulf of Mexico at the city of Apalachicola. The following table shows the movement of the median lines from 1880 to 1910, inclusive:

Census year.	Median parallel, north latitude.			Median meridian, west longitude.			Movement in miles, 8. north 'rd. westward		
	D.	M.	S.	D.	M.	S.	8. north 'rd.	westward

MEDIAN POINT.

The exact location of the median point is indicated by the median lines already shown; in the following table its approximate location with reference to certain towns is described:

NOTE—The total population includes persons born in the United States, state of birth not reported, persons born in outlying possessions or at sea under the United States flag, and American citizens born abroad. Their combined number was only 360,961, or 0.4 per cent of the total population.

MOTHER TONGUE OF FOREIGN WHITE STOCK (1910).

In the following tables, prepared by the federal census bureau, the foreign white stock referred to is the aggregate white population of the United States which is foreign either by birth or by parentage. It embraces all foreign born whites and all native whites having one or both parents foreign born. It must be remembered that the foreign stock as here defined only includes the first and second generations—immigrants and native children of immigrants—and does not include the grandchildren or great-grandchildren of immigrants. In other words, the figures do not include the exact relative importance of the several ethnic stocks in the total population.

The eight major mother-tongue stocks in the United States, arranged in the order of their importance, are shown in the following table:

Mother tongue.	Number.	Per cent.
English and Celtic*	10,937,420	31.1
German	8,817,271	27.3
Italian	2,151,422	6.7

DWELLINGS AND FAMILIES IN THE UNITED STATES (1910).

In census usage a "dwelling" is any building in which one or more persons reside. A mere cabin, or room in a warehouse, occupied by a single person, is a census dwelling, while, on the other hand, an apartment house containing many families constitutes only one dwelling. Only occupied dwellings are included in the following tables. The term "family" as used in census reports means a household or group of persons, whether related by blood or not, who share a common abode, usually also sharing the same table. If one person lives alone he constitutes a family, while, on the other hand, those who dwell in a hotel or institution in which many people live are also treated as forming a single family. There is, however, no considerable difference between the average size of all families under the census usage and the average size of what are commonly termed families or households in popular speech. In 1900 the difference for the United States as a whole was only 0.1 per cent.

At each census from 1850 to 1910 a decrease was shown in the average number of persons per dwelling and the average number per family. The decrease in the average number per dwelling has been due to the decrease in the average per family, the influence of which has been partly offset by the increased construction of tenements and other dwellings containing more than one family.

In 1910 there were 7,254,242 dwellings and 9,499,765 families in urban communities, while there were 10,551,603 dwellings and 10,755,790 families in rural communities. For urban communities the number of persons to a dwelling averaged 5.9 and to a family 4.5; for rural communities the number of persons to a dwelling averaged 4.7 and to a family 4.6.

EARTHQUAKE DAMAGES SAN SALVADOR

San Salvador, capital of Salvador, was visited by a series of earthquake shocks beginning at 7 o'clock on the evening of June 7, 1917, and continuing throughout the night. Though hundreds of houses were made uninhabitable and damage estimated at several million dollars was caused, no lives were lost. Santa Tecla and other villages in the vicinity were also damaged.

FLAG OF THE UNITED STATES.

Executive order of May 29, 1916.

It is hereby ordered that national flags and union jacks for all departments of the government, with the exception noted under (a), shall conform to the following proportions:

Hoist (width) of flag, 1.

Fly (length) of flag, 1.9.

Hoist (width) of union, 7-13.

Fly (length) of union, 76.

Width of each stripe, 1-13.

(a). Exception: The colors carried by troops and camp colors shall be the sizes prescribed for the military service (army and navy).

Limitation of the number of sizes: With the exception of colors under note (a) the sizes of flags manufactured or purchased for the government departments will be limited to those with the following hoists:

(1). 20 feet; (2). 19 feet (standard); (3). 14.35 feet; (4). 12.19 feet; (5). 10 feet; (6). 8.94 feet; (7). 5.14 feet; (8). 5 feet; (9). 3.52 feet; (10). 2.90 feet; (11). 2.37 feet; (12). 1.31 feet.

Union jacks: The size of the jack shall be the size of the union of the national flag with which it is flown.

The national flag of the United States now consists of thirteen alternate red and white stripes, representing the original thirteen states, and a blue field on which are forty-eight white stars arranged in six rows of eight stars each, representing the forty-eight states now constituting the union. The last two stars were added in 1912 when New Mexico and Arizona were officially admitted as states.

Laws are in force in some of the states forbidding the desecration or mutilation of the flag or its use in any way for advertising purposes. A federal law forbids the use of the national flag on trade-marks.

The national flag was officially adopted by congress June 14, 1777. Accordingly June 14 is now generally observed as Flag day.

APPEARANCE OF RADIUM.

[From geological survey report.]

Radium is a metal, and has a white metallic luster; it has been isolated only once or twice, and few people have seen it. Radium is ordinarily obtained in the form of salts, and is usually so sold and used. These salts are all white or nearly white substances whose appearance is no more remarkable than that of common salt or baking powder. Radium is found in nature in quantities so exceedingly small that it is never visible even when the material is examined with a powerful microscope. Ordinarily radium ore carries only a small fraction of a grain of radium per ton of material, and radium will never be found in

large masses, because it is formed by the decay of uranium, a process that is wonderfully slow, and radium itself decays and changes to other elements so rapidly that it is impossible for it to accumulate naturally in visible masses. Radium and radium minerals are not generally luminescent. Tubes containing radium glow from impurities present which the radiations from the radium cause to give light.

Minerals that carry radium are fairly easy to determine, for they affect photographic films in the same way as ordinary light, and they can also be identified by their effect upon an electroscope.

THE SOURCE OF BORAX.

According to the geological survey the volcanic deposits on the east side of the Calico mountains, at the edge of the Mojave desert of California, include clays containing colemanite, a crystalline borate of lime. Colemanite contains 50.9 per cent of boric acid, 27.2 per cent of lime, and 21.9 per cent of water. The deposits near the Calico mountains are believed to have been formed by replacement of limy beds that were laid down locally during the evaporation of lake waters at intervals between some of the great outbursts of volcanic ejecta which formed so large a part of the tertiary deposits. The boric acid was undoubtedly derived from fresh volcanic materials and carried to its present position by underground waters. The deposits are in two principal beds, each 5 feet thick and about 50 feet apart. These beds have been mined to a depth of 500 feet. All the borax produced in the United States is obtained from California mines, mainly from Lang, north of Los Angeles, and Death Valley. The value of borate ores produced in 1915 was nearly \$1,700,000. The borax is made by heating the pulverized colemanite with a solution of sodium carbonate, forming the soluble sodium borate, which crystallizes.

ILLITERACY IN THE UNITED STATES (1910).

The following statistics, except where otherwise specified, relate only to persons 10 years of age or over. The bureau of the census classifies as illiterate all persons 10 years of age or over who are unable to write, regardless of their ability to read.

PERCENTAGE OF ILLITERACY.

The following table shows the total population 10 years of age and over and the number and percentage of illiterate by color or race, nativity and parentage:

Class.	Population.	Illiterate.	Pct.

SHORTAGE IN 1916 WORLD'S POTATO CROP.

[From agricultural department report.]

The average potato crop of the world is estimated to be some 5,200,000,000 bushels. Of this amount the undermentioned countries produce on an average 2,925,000,000 bushels. Complete statistics for the world's crop of 1916 are not available, but from those received it is estimated that the countries named below produced in 1916 only 1,753,500,000 bushels, or 34 per cent of the world's average crop.

AMERICAN AND WORLD CROPS COMPARED.

[From U. S. monthly crop report.]

The United States produces on an average about three-fourths of the world's corn crop, one-fifth of the wheat crop, one-fourth of the oats crop, one-eighth of the barley crop, one-thirtieth of the rye crop, one-sixteenth of the potato crop, three-fifths of the cotton crop, one-fourth of the flaxseed crop, one-third of the

tobacco crop, one-fourth of the hops crop and one-tenth of the sugar crop. In rank of production the United States is first for corn, wheat, oats, cotton, tobacco and hops; second for barley and flaxseed; fourth for sugar, and fifth for rye and potatoes.

THE METRIC SYSTEM.

The metric system is in general use in all the principal nations of Europe and America with the exception of Great Britain, Russia and the United States, where it is authorized but not compulsory. Its use for scientific purposes is common throughout the world.

WEIGHTS.

Milligram (.001 gram)	= .00154 grain.
Centigram (.01 gram)	= .01543 grain.
Decigram (.1 gram)	= .15432 grains.
Gram	= 15.432 grains.
Decagram (10 grams)	= 352.7 ounce.
Hectogram (100 grams)	= 3,527.4 ounces.
Kilogram (1,000 grams)	= 2,204.6 pounds.
Myriagram (10,000 grams)	= 22,046 pounds.
Quintal (100,000 grams)	= 220.46 pounds.
Millier or tonneau-ton (1,000,000 grams)	= 2,204.6 lbs.

DRY.

Milliliter (.001 liter)	= .061 cubic inch.
Centiliter (.01 liter)	= .6102 cubic inch.
Deciliter (.1 liter)	= 6.1022 cubic inches.
Liter	= .908 quart.
Decaliter (10 liters)	= 9.08 quarts.
Hectoliter (100 liters)	= 2.38 bushels.
Kiloliter (1,000 liters)	= 1.308 cubic yards.

LIQUID.

Milliliter (.001 liter)	= .0088 fluid ounce.
Centiliter (.01 liter)	= .338 fluid ounce.
Deciliter (.1 liter)	= .345 gill.
Liter	= 1.0567 quarts.
Decaliter (10 liters)	= 2.6418 gallons.
Hectoliter (100 liters)	= 26.417 gallons.
Kiloliter (1,000 liters)	= 264.18 gallons.

LENGTH.

Millimeter (.001 meter)	= .0394 inch.
Centimeter (.01 meter)	= .3937 inch.
Decimeter (.1 meter)	= 3.937 inches.
Meter	= 39.37 inches.
Decameter (10 meters)	= 39.7 inches.
Hectometer (100 meters)	= 328 feet 1 inch.
Kilometer (1,000 meters)	= .62137 mile (3,280 ft. 10 inches).
Myriameter (10,000 meters)	= 6,213.7 miles.

SURFACE.

Centare (1 square meter)	= 1.550 sq. inches.
Are (100 square meters)	= 119.6 sq. yards.
Hectare (10,000 sq. meters)	= 2.471 acres.

METRIC EQUIVALENTS.

1 grain	= .06480 gram.
1 ounce	= 28.3495 grams.

1 pound	= 0.45359 kilogram.
1 dram (apoth.)	= 3.8867 grams.
1 scruple (apoth.)	= 1.2322 grams.
1 quart (dry)	= 1.1012 liters.
1 peck (dry)	= 8.8098 liters.
1 bushel	= 0.35239 hectoliter.
1 quart (liq.)	= 0.94636 liter.
1 gallon	= 3.78549 liters.
1 inch	= 25.4001 millimeters.
1 line	= 2.54001 centimeters.
1 inch	= 0.0254 meter.
1 foot	= 0.3048 meter.
1 yard	= 0.9144 meter.
1 mile	= 1.6093 kilometers.
1 sq. inch	= 645.16 sq. millimeters.
1 sq. foot	= 0.0929 sq. meter.
1 sq. yard	= 0.8361 sq. meter.
1 sq. mile	= 2.5900 sq. kilometers.
1 acre	= 0.1017 hectare.
1 cubic inch	= 16.387 cubic millimeters.
1 cubic foot	= 0.02832 cubic meter.
1 cubic yard	= 0.7645 cubic meter.

ELECTRICAL UNITS DEFINED.

Ohm—Unit of resistance; represents resistance offered to an unvarying electric current by a column of mercury at the temperature of ice, 14.5421 grams in mass, of a cross-sectional area of 1.00003 square millimeters and of the length of 106.3 centimeters.

Ampere—Unit of current; decomposes .0009324 of a gram of water in one second or deposits silver at the rate of .001118 of a gram per second, when passed through a solution of nitrate of silver in water.

Volt—Unit of electromotive force; one volt equals one ampere of current passing through a substance having one ohm resistance.

Coulomb—Unit of quantity; amount of electricity transferred by a current of one ampere in one second.

Farad—Unit of capacity; capacity of a condenser charged to a potential of one volt by one coulomb. A microfarad is one-millionth of a farad.

Joule—Unit of work; equivalent to energy expended in one second by one ampere current in one ohm resistance.

Watt—Unit of power; equivalent to work done at the rate of one joule per second. A kilowatt is 1,000 watts.

THERMOMETERS COMPARED.

There are three kinds of thermometers, with varying scales, in general use throughout the world—the Fahrenheit, Reaumur and Centigrade. The freezing and boiling points on their scales compare as follows:

Thermometer.	Freezing pt.	Boiling pt.
Fahrenheit	32 degrees	212 degrees
Reaumur	zero	80 degrees
Centigrade	zero	100 degrees

The degrees on one scale are reduced to their equivalents on another by these formulas:

Fahrenheit to Reaumur—Subtract 32, multiply by four-ninths.
 Fahrenheit to Centigrade—Subtract 32, multiply by five-ninths.
 Reaumur to Fahrenheit—Multiply by nine-fourths, add 32.
 Reaumur to Centigrade—Multiply by five-fourths.
 Centigrade to Fahrenheit—Multiply by nine-fifths, add 32.
 Centigrade to Reaumur—Multiply by four-fifths.

WEIGHTS OF DIAMONDS AND FINENESS OF GOLD.

The weight of diamonds and other precious stones is expressed in metric carats. The unit is the international carat of 200 milligrams, which has been officially adopted by the United States and most of the countries in Europe. Until July 1, 1913, there were three different standards in use in the United States, although the one generally accepted was 205.3 milligrams. This was usually subdivided on the binary system, the smallest subdivision being 1-64 of the carat. The new carat is subdivided on the decimal system.

The fineness of gold is also expressed in carats. Pure gold is said to be twenty-four carats fine. If it contains eight parts of a baser metal or alloy it is only sixteen carats fine. The carats therefore indicate the proportion of pure gold to alloy. Most of the gold used by jewelers is about fourteen carats fine, having ten parts of alloy.

Zoological—Park in Washington, D. C., devoted to the zoological collection of the government; adjoins Rock Creek park.

PRESERVATION OF AMERICAN ANTIQUITIES.

By law approved June 8, 1906, entitled "An act for the preservation of American antiquities," the president of the United States is authorized, in his discretion, to declare by proclamation historic landmarks, historic and prehistoric structures and other objects of historic or scientific interest that are situated upon lands owned or controlled by the United States, to be national monuments. Under such authority the following monuments have been created:

Name and state.	Year.	Acres.
Bandelier, N. M.	1916	
Big Hole battle field, Mont.	1910	8
Cabrillo, Cal.	1913	15
Capulin mountain, N. M.	1916	680
Chaco canyon, N. M.	1907	20,629
Cinder cone, Cal.	1907	5,120
Colorado, Col.	1911	13,883
Devil's tower, Wyo.	1906	1,152

Name and state.	Year.	Acres.
Devil postpile,* Cal.	1911	800
Dinosaur, Utah.	1915	
El Morro, N. M.	1906	160
Gila cliff dwellings,* N. M.	1907	160
Gran Quivira, N. M.	1909	160
Grand canyon,* Ariz.	1908	806,400
Jewel cave,* S. D.	1908	1,280
Lassen peak,* Cal.	1907	1,280
Lewis and Clark cavern, Mont.	1908	160
Montezuma castle, Ariz.	1906	160
Mount Olympus,* Wash.	1909	608,840
Muir Woods, Cal.	1908	293
Mukuntuweap, Utah	1909	15,840
Natural bridges, Utah	1909	2,740

NOTES ON NATIONAL MONUMENTS.

Bandelier—Prehistoric aboriginal ruins in Sandoval and Santa Fe counties, New Mexico, with cliff dwellings, ceremonial caves and other relics of a vanished people.

Big Hole battle field—Scene of fight at Big Hole pass on Big Hole or Wisdom river, Aug. 9, 1877, between Nez Perce Indians under Chief Joseph and a small force of soldiers commanded by Col. John Gibbon; in Silver Bow county, Montana; reached from Melrose.

Cabrillo statue—At Point Loma, Cal.; land first sighted by Juan Rodriguez Cabrillo, discoverer of California, when he approached San Diego bay, Sept. 28, 1542; site of about 1½ acres set aside for heroic statue of Cabrillo.

Capulin mountain—Striking example of recent extinct volcanoes in Union county, New Mexico, near town of Des Moines.

Chaco canyon—Located in San Juan and McKinley counties, New Mexico; contains extensive prehistoric communal or pueblo ruins.

Cinder cone—An elevation in Lassen county in northern California; is of importance as illustrating volcanic activity in the vicinity 200 years ago.

Colorado—Extraordinary examples of erosion in Mesa county, western Colorado; reached from Grand Junction.

Devil postpile—Natural formations, including Rainbow waterfalls, within the Sierra national forest in California; area set aside is on middle fork of San Joaquin river.

Devil's tower—A lofty and isolated rock in Crook county, Wyoming; is an extraordinary example of the effect of erosion in the higher mountains.

Dinosaur—Section in eastern Utah containing an extraordinary deposit of dinosaurian and other gigantic reptilian remains of the Jurassic period, which are of great scientific interest and value.

El Morro—An elevation near Wingate station on the Santa Fe railroad in New Mexico; contains prehistoric ruins and interesting rock inscriptions.

Gila cliff dwellings—In the Mogollon mountains, New Mexico; known also as the Gila Hot Springs cliff houses; are among the best preserved remains of the cliff dwellers of the southwest.

Gran Quivira—Ruined town not far from Manzano in the central part of New Mexico; remains of large cathedral and chapel and of many houses thought to date from prehistoric times.

Grand canyon—In northwestern Arizona; great-est eroded canyon within the United States. Jewel cave—A natural formation of scientific interest within the Black Hills national forest in Custer county, South Dakota.

Lassen peak—In natural forest of same name in Shasta county, northern California; marks the southern terminus of the long line of extinct volcanoes in the Cascade range, from which one of the greatest volcanic fields in the world extends.

Lewis and Clark cavern—An extraordinary limestone cavern near Limespur, Jefferson county, Montana.

Montezuma castle—Large prehistoric ruin or cliff dwelling on Beaver creek, Arizona.

Mount Olympus—Mountain in the state of Washington; has extensive glaciers and on its slopes are the breeding grounds of the Olympic elk.

Muir woods—In Marin county, California; an extensive growth of redwood trees of great age and size; land presented to the government by William Kent, formerly of Chicago.

Mukuntuweap—Canyon in southwestern Utah through which flows the north fork of the Rio Virgin or Zion river; an extraordinary example of canyon erosion.

Natural bridges—Rock formations in southeastern Utah extending over streams or chasms; have loftier heights and greater spans than any other similar formations known; reserved as extraordinary examples of stream erosion.

Navajo—Within the Navajo Indian reservation in Arizona; includes a number of prehistoric cliff dwellings and pueblo ruins new to science.

Oregon caves—Within the Siskiyou national forest in Oregon; caves are of natural formation and of unusual scientific interest and importance.

Petrified forest—Deposits of fossilized or mineralized wood in Gila and Apache counties, Arizona. Pinnacles—A series of natural formations of rock with a number of caves underlying them; located within Pinnacles national forest in California.

Rainbow bridge—An extraordinary natural bridge in southeastern Utah, having an arch which in form and appearance is much like a rainbow; is 309 feet high and 278 feet span; of scientific interest as an example of eccentric stream erosion.

Shoshone cavern—A cave in Big Horn county, Wyoming, of unknown extent, but of many windings and ramifications and containing vaulted chambers of large size, magnificently decorated with sparkling crystals and beautiful stalactites, and containing pits of unknown depth.

Sieur de Monts—Lands on Mount Desert island, Maine, which island was discovered by Samuel de Champlain and upon which he first landed when, acting under the authority of Sieur de Monts, he explored and described the present New England coast; the geology, fauna and flora on the island are of great scientific interest.

Sitka—Tract of about fifty-seven acres within public park, near Sitka, Alaska; battle ground of Russian conquest of Alaska in 1804; site of former village of Kiki-Siti tribe, the most warlike of Alaska Indians; contains numerous totem poles constructed by the Indians, recording the genealogical history of their several clans.

Tonto—Comprises two prehistoric ruins of ancient cliff dwellings in Gila county, Arizona.

Tumacacori—Ruin of an ancient Spanish mission of brick, cement and mortar in Santa Cruz county, Arizona.

Walnut canyon—Canyon eight miles southeast of Flagstaff; contains ruins of cliff dwellings of great ethnographic, scientific and educational interest.

Wheeler—Volcanic formations illustrating erratic erosion; in Rio Grande and Cochetopa national forests in southwestern Colorado.

The national holidays, such as July 4, New Year's, etc., are such by general custom and observance and not because of congressional legislation. Congress has passed no laws establishing holidays for the whole country. It has made Labor day a holiday in the District of Columbia, but the law is of no effect elsewhere. It has also designated the second Sunday in May as Mothers' day. President Wilson issued a proclamation May 30, 1916, requesting that June 14, the anniversary of the day on which the national emblem was adopted by congress, be observed as Flag day throughout the nation.

DEATH OF MAJ.-GEN. FREDERICK FUNSTON.

Maj.-Gen. Frederick Funston, commander of the department of the southwest and in charge of all the troops along the Mexican border, died suddenly in the lobby of a hotel in San Antonio, Tex., on the evening of Feb. 19, 1917, from angina sclerosis of the arteries. He was born in New Carlisle, O., Nov. 9, 1865, and lived the greater part of his life in Kansas. As a special agent of the department of agriculture he traveled much in Alaska and Mexico, but it was as an artillery captain in the Cuban insurgent army in 1896 that he gained fame and promotion by his skill and daring as a fighter. In the Spanish-American war he led the 20th Kansas volunteers in the Philippines,

winning many engagements. One of his feats was his capture of the Filipino leader, Aguinaldo, March 23, 1901. On his return to the United States he was in command of various departments until 1914, when he had charge of the military expedition which occupied Vera Cruz, Mexico. In that year he was promoted from brigadier-general to major-general. After the withdrawal of the troops from Mexico he was made commander of the southern department and in March, 1916, was placed in command of all the troops along the Mexican border and of the movements of the expedition led by Gen. Pershing into northern Mexico in pursuit of the Villa bandits.

AMERICAN BIRTH AND DEATH RATES.

The following table prepared by the federal census bureau shows for the birth registration area of the United States the number of births in the calendar year 1915, the birth rate, the death rate, the number of deaths of infants under 1 year of age and the infant mortality rate. The states in the registration area had in 1915 an estimated population of 31,150,000, representing 31 per cent of the total for the United States. In the table stillbirths are excluded, and by infants are meant all children under 1 year of age.

INCREASE IN DEATHS FROM CANCER.

According to a special report issued by the government census bureau in 1917 the mortality from cancer and other malignant tumors in the death registration area of the United States has been increasing almost continuously for the

last fifteen years. It is greater in urban than in rural localities; among females than among males; among whites than among negroes; and among persons in middle life and old age than among those in early life. Deaths due to cancer of the stomach and liver represent more than three-eighths of the total.

The death rate for whites throughout the registration states in 1914 was 80 per 100,000, as against only 56.2 for the colored population. The death rate from cancer among women, 96.8 per 100,000, was more than 50 per cent greater than the corresponding rate for men, 52.4. For persons under 25 years of age the death rate was only 2.8 per 100,000 corresponding population; but for the higher ages it is very much greater, increasing rapidly from each age group to the one next above. Thus, for persons 25 to 34 years of age, it was 13.9 in 1914; for those 35 to 39, 42; 40 to 44, 78.6; 45 to 49, 128.6; 50 to 54, 199.7; 55 to 59, 305.9; 60 to 64, 333.1; 65 to 69, 516; 70 to 74, 672.3; 75 to 79, 766.8; 80 to 84, 889.6; and 85 and over, 875.6.

Among both males and females, cancer of the stomach, liver, pharynx and esophagus accounted for a greater proportion of the total deaths from cancer—approximately 47 per cent among males and 32 per cent among females—than is shown for any other group. The death rates from this class of cancers were 29.6 per 100,000 for males and 30.7 for females.

CAUSES OF DEATH BY OCCUPATION.

[From U. S. census bureau report.]

Based upon 94,269 deaths of male and 102,467 deaths of female industrial policyholders, 35 years of age and over, as recorded in 1911, 1912 and 1913 by the Metropolitan Life Insurance company, tuberculosis caused the death of 20.5 per cent of the former and 14.4 per cent of the latter, while organic diseases of the heart were responsible for 12 per cent of the deaths of males and 14.8 per cent of the deaths of females. The average age of men dying from tuberculosis was 37.1 years and of women 34.1 years. Of males the lowest average age at

death, 31.1 years, was among those who died from typhoid fever, and of females the lowest average age at death, 29 years, was among those who died at childbirth. By occupation, the lowest average age at death was 36.5 years among bookkeepers and office assistants, and the highest average age was 58.5 years among farmers and farm laborers.

Tuberculosis was responsible for the largest number of deaths among clerks, bookkeepers and office assistants (35 per cent); compositors and printers (34.1 per cent); gas fitters and steam fitters (31.6 per cent); longshoremen and stevedores (29.2 per cent); teamsters, drivers and chauffeurs (28.2 per cent); saloonkeepers and bartenders (26 per cent); machinists (25 per cent); cigarmakers and tobacco workers (24.1 per cent); textile mill workers (22 per cent); iron molders (21.9 per cent); painters, paperhangers and varnishers (21.9 per cent); masons and bricklayers (19 per cent); bakers (18.3 per cent); laborers (16.4 per cent); blacksmiths (14 per cent). Accidental violence was responsible for the largest number of deaths among railway engineers and trainmen (42.3 per cent); railway track and yard workers (20.8 per cent); and coal miners (20.4 per cent); while the largest number of farmers and farm laborers (16.4 per cent) died from organic diseases of the heart, due to the facts that the prevalence of these diseases increases with age and that the average age at death of those in this group is higher than in any other group.

Similarly, among women the largest number of housewives and housekeepers (15.2 per cent) died from organic diseases of the heart for the same reasons stated above, while tuberculosis took the largest proportion of clerks, bookkeepers and office assistants (42.4 per cent); clerks and saleswomen (38.7 per cent); textile mill workers (35.5 per cent); dressmakers and garment workers (27.3 per cent), and domestic servants (15.9 per cent). The average age at death was 26.1 years among clerks, bookkeepers and office assistants, and 53.3 years among housewives and housekeepers.

RACE RIOTS IN EAST ST. LOUIS, ILL.

On May 28, 1917, a delegation numbering more than 500 persons called upon the mayor of East St. Louis, Ill., and demanded that the influx of southern negroes, of whom about 8,000 had arrived within the last two years, be stopped. The speeches made on that occasion were inflammatory and at least one orator advocated mob violence. Immediately after this meeting negroes were attacked in the streets of East St. Louis, and in the course of that day and the succeeding day nearly fifty negroes and a dozen white men had been injured. Following this and through the month of June agitators were busy stirring up ill feeling between the whites and the blacks, and on July 1 and 2 there was a reign of mob violence in which nearly 100 persons were killed and 245 buildings burned. These are the figures given in the report of the grand jury which subsequently investigated the outbreak. It was, in the language of that report, "one of the worst race riots in history—a reign of murder, brutality, arson and other crimes of such a character as to challenge belief."

Indictments were returned Aug. 14 by the grand jury, after five weeks of investigation, against 105 persons, of whom eighty-two were white and twenty-three negroes. The indictments and the crimes charged were as follows:

Nine indictments for murder, naming thirty-three persons.

Eleven indictments for conspiracy, naming sixty-four persons.

Five indictments for arson, naming twenty-seven persons.

Thirteen indictments for rioting, naming sixty-nine persons.

Twenty-six indictments for assault to murder, naming sixty-three persons.

One indictment for malicious mischief, naming four persons.

Two indictments for burglary, naming four persons.

One indictment for burning for purpose of defrauding, naming one person.

Among those indicted for murder were three police officers and Dr. Leroy Bundy, a well known negro agitator. Included among those indicted for conspiracy were Cornelius Hickey, police lieutenant, and Richard Brockway, a railroad inspector. The grand jury expressed the belief that the riots were deliberately planned and that the city officials had been inactive in enforcing the law or were "overawed by cowardly inclinations." It recommended the establishment of a permanent state constabulary force of 1,000 or more trained policemen, partly mounted, to be on constant guard against outbreaks of this kind.

RACE RIOTS IN CHESTER, PA.

Four men were shot and sixty were arrested as the result of race riots between blacks and whites in Chester, Pa., July 25. On the following evening the rioting was renewed, two white men and a negro being killed and about twenty persons being injured. The disturbances, which were caused by the influx of negroes from the south, were stopped by state troops.

LOSS OF THE KRISTIANIAFJORD.

The Norwegian-American line steamer Kristianfjord, a 10,665-ton vessel, with passengers from New York for Norway, went on the rocks near Cape Race, N. E., in a fog July 15, 1917. The sea was moderate and the passengers, numbering about 900, were safely landed and brought to St. John's. It was at first thought that the ship might be saved, but a storm came up before she could be floated and dashed her in pieces.

POTASH PRODUCTION IN 1916.

The total production of potash salts and potash products in the United States in 1916 was close to 10,000 tons, with a net value at the shipping point of at least \$3,500,000, according to the geological survey. This was ten times the value reported in 1915, and it was expected that the production for 1917 would show an even greater rate of increase. Potash comes from mineral and organic sources, such as natural salts or brines, alunite and silicate rocks, kelp and pearlsh. The production from organic sources is about half that from mineral sources. The largest output in 1916 came from the Nebraska alkaline lakes.

NEW SOURCE OF SUPPLY.

In the extreme northwestern section of San Bernardino county, California, near the Death Valley country, a new field of potash production was developed in 1917. Two coast companies began operations at Seales Marsh with a plant capable of producing about 1,000 tons a month of muriate of potash, 30 per cent or better pure potash. The product is used mainly for fertilizing purposes, and before the war was imported mainly from Germany. The price since August, 1914, has risen from \$40 a ton to about \$400.

The Academie Francaise, or French academy, was instituted in 1635. It is a part of the Institute of France and its particular function is to conserve the French language, foster literature and encourage genius.

THE SHERMAN ANTITRUST LAW.

Passed by the first congress and approved July 2, 1890.

Section 1. Every contract, combination in the form of trust or otherwise or conspiracy in restraint of trade or commerce among the several states or with foreign nations is hereby declared to be illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 2. Every person who shall monopolize or attempt to monopolize or combine or conspire with any person or persons to monopolize any part of the trade or commerce among the several states or with foreign nations shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 3. Every contract, combination in form of trust or otherwise or conspiracy in restraint of trade or commerce in any territory of the United States or of the District of Columbia, or in restraint of trade or commerce between any such territory and another, or between any such territory or territories and any state or states or the District of Columbia or with foreign nations, or between the District of Columbia and any state or states or foreign nations, is hereby declared illegal. Every person who shall make any such contract or engage in any such combination or conspiracy shall be deemed guilty of a misdemeanor, and on conviction thereof shall be punished by fine not exceeding \$5,000 or by imprisonment not exceeding one year, or by both said punishments, in the discretion of the court.

Sec. 4. The several Circuit courts of the United States are hereby invested with jurisdiction to prevent or restrain violations of this act; and it shall be the duty of the several district attorneys of the United States, in their respective districts, under the direction of the attorney-general, to institute proceedings in equity to prevent and restrain such violations. Such proceedings may be by way of petition

setting forth the case and praying that such violation shall be enjoined or otherwise prohibited. When the parties complained of shall have been duly notified of such petition the court shall proceed as soon as may be to the hearing and determination of the case; and pending such petition and before final decree the court may at any time make such temporary restraining order or prohibition as shall be deemed just in the premises.

Sec. 5. Whenever it shall appear to the court before which any proceeding under section 4 of this act may be pending that the ends of justice require that other parties should be brought before the court, the court may cause them to be summoned, whether they reside in the district in which the court is held or not; and subpoenas to that end may be served in any district by the marshal thereof.

Sec. 6. Any property owned under any contract or by any combination or pursuant to any conspiracy (and being the subject thereof) mentioned in section 1 of this act and being in the course of transportation from one state to another or to a foreign country shall be forfeited to the United States and may be seized and condemned by like proceedings as those provided by law for the forfeiture, seizure and condemnation of property imported into the United States contrary to law.

Sec. 7. Any person who shall be injured in his business or property by any other person or corporation by reason of anything forbidden or declared unlawful by this act may sue therefor in any Circuit court of the United States in the district in which the defendant resides or is found, without respect to the amount in controversy, and shall recover threefold the damages by him sustained and the cost of suit, including a reasonable attorney's fee.

Sec. 8. That the word "person" or "persons" wherever used in this act be deemed to include corporations and associations existing under or authorized by the laws of either the United States, the laws of any of the territories, the laws of any state or the laws of any foreign country.

THE MONROE AND DRAGO DOCTRINES.

The "Monroe doctrine" was enunciated by President Monroe in his message to congress Dec. 2, 1823. Referring to steps taken to arrange the respective rights of Russia, Great Britain and the United States on the northwest coast of this continent, the president went on to say:

"In the discussions to which this interest has given rise, and in the arrangements by which they may terminate, the occasion has been deemed proper for asserting, as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European power."

"We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere. But with the governments who have declared their independence and maintain it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them or controlling in any other manner their destiny by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States."

DRAGO DOCTRINE.

When in the winter of 1902-03 Germany, Britain and Italy blockaded the ports of Ven-

ezuela in attempt to make the latter country settle up its debts Dr. L. F. Drago, a noted jurist of Argentina, maintained that force cannot be used by one power to collect money owing to its citizens by another power. Prominence was given to the contention by the fact that it was officially upheld by Argentina and favored by other South American republics. The principle embodied has become generally known as the "Drago doctrine."

LODGE RESOLUTION.

In connection with the reported attempt of Japan to obtain land for the establishment of a naval base in Magdalena bay, on the western coast of Mexico, the senate of the United States adopted the following resolution Aug. 2, 1912:

"Resolved, That when any harbor or other place in the American continents is so situated that the occupation thereof for naval or military purposes might threaten the communications or the safety of the United States, the government of the United States could not see without grave concern the possession of such harbor or other place by any corporation or association which has such relation to another government, not American, as to give that government practical power of control for national purposes."

LONG RUSSIAN RAILWAY BRIDGE.

The railway bridge over the Amur river at Khabarovsk, Siberia, is 7,593 miles long and cost \$9,270,000. It was opened for traffic Nov. 13, 1916, its completion marking also the completion of the Amur railroad from Kuenga to Khabarovsk, a distance of 1,247 miles.

*Marriages may be annulled for causes making them void from the beginning.

†No divorce allowed, but marriages may be annulled.

NOTE.—The above table presents only the principal causes for divorce in the various states. The words "Yes" and "No" are not always to be taken without qualification, but as being applicable under certain conditions. The word "Void" may indicate that a marriage may be absolutely void for the cause named, that it may be voidable or that it may be annulled by court proceedings. Bigamy, it may be added, is a cause for divorce or annulment of marriage in practically all of the states.

DEATH OF WILLIAM F. CODY.

William F. Cody, scout, plainsman and showman, widely known as "Buffalo Bill," died in Denver, Col., Jan. 10, 1917, at the age of 71. A native of Iowa, he sought the plains at an early age and became one of the famous band of pony express riders who carried mail to and beyond the Rocky mountains. In the civil war he served as scout and guide and also as a member of the 7th Kansas cavalry. Later he became a hunter on the plains, supplying the early railroad builders with buffalo meat. It was in this way that he gained his sobriquet of "Buffalo Bill." He took part in a great many Indian battles and was personally known to all

the leading army officers in the Indian wars. In the later years of his life he was at the head of a "wild west show."

LOSS OF THE UNITED STATES CRUISER MILWAUKEE.

While trying to salvage the submarine H-3, which went ashore Dec. 14, the United States protected cruiser Milwaukee was itself driven ashore on the Samoa beach near Eureka, Cal., Jan. 13, 1917. The disaster was caused in part by a strong shoreward current and in part by the weight of a steel hawser, the other end of which had been attached to the submarine. The navy tug Ironclads and the monitor Cheyenne came near meeting the same fate as the Milwaukee, as both had lines to the cruiser while were trying to hold it away from the surf. All the men aboard the Milwaukee were brought ashore by the coast guard by means of surf boats and a breeches buoy. A heavy sea was running and the cruiser was gradually pounded to pieces. The loss to the government was estimated at \$7,000,000. The Milwaukee was of 9,700 tons displacement, 424 feet long, 66 feet beam and 25½ feet draft. The ship was built at San Francisco in 1904-1906.

FORTYMILE GOLD DISTRICT.

The earliest placer mining in the Alaska part of the Yukon river was done on the bars of Fortymile river in 1886, and during the next two years hundreds of miners came to the scene of the discovery. This event opened up inland Alaska and led to the discovery of the famous Klondike placers, on the Canadian side of the boundary, some ten years later. More than \$200,000,000 worth of gold has been taken out of the Klondike and the Alaska Yukon placer camps in the thirty years since Fortymile was discovered. Of this about \$6,500,000 worth of gold has come from the Fortymile district.

LARGEST TELESCOPES IN THE WORLD.

The largest reflecting telescope in the world is that at the Canadian government laboratory on Little Sanich hill, six miles from Victoria, B. C., the objective having a measurement of seventy-two inches. The largest refracting telescope is that at the Yerkes observatory at Williams Bay, Wis. It has an object glass measuring forty inches. The glass for the Canadian telescope was made in Belgium and polished in Pittsburgh, Pa.

COPYRIGHT LAWS OF THE UNITED STATES.

The act to amend and consolidate the acts respecting copyright, in force July 1, 1909, as amended by the act approved Aug. 24, 1912, provides that any person entitled thereto, upon complying with the provisions of the law, shall have the exclusive right (a) to print, reprint, publish, copy and vend the copyrighted work; (b) to translate the copyrighted work or make any other version of it if it be a literary work; to dramatize it if it be a nondramatic work; to convert it into a novel or other nondramatic work if it be a drama; to arrange or adapt it if it be a musical work; to finish it if it be a model or design for a work of art; (c) to deliver or authorize the delivery of the copyrighted work if it be a lecture, sermon, address or similar production; (d) to perform the copyrighted work publicly if it be a drama or, if it be a dramatic work and not reproduced in copies for sale, to vend the manuscript or any record thereof; to make or to procure the making of any transcription or record thereof by which it may in any manner be exhibited, performed or produced, and to exhibit, perform or produce it in any manner whatsoever; (e) to perform the copyrighted work publicly for profit if it be a musical composition and for the public performance or performance for profit and to make any arrangement or setting of it in any system of notation or any form of record in which the thought of an author may be read or reproduced.

So far as it secures copyright controlling the parts of instruments serving to reproduce mechanically the musical work the law includes only compositions published after the act went into effect; it does not include the works of a foreign author or composer unless the country of which he is a citizen or subject grants similar rights to American citizens. Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the part of instruments serving to reproduce mechanically the musical work, any other person may make a similar use of the work upon the payment to the owner of a royalty of 2 cents on each such part manufactured. The reproduction or rendition of a musical composition by or upon coin-operated machines shall not be deemed a public performance for profit unless a fee is charged for admission to the place where the reproduction occurs.

The works for which copyright may be secured include all the writings of an author.

The application for registration shall specify to which of the following classes the work in which copyright is claimed belongs:

- (a) Books, including composite and cyclopedic works, directories, gazetteers and other compilations.
- (b) Periodicals, including newspapers.
- (c) Lectures, sermons, addresses, prepared for oral delivery.
- (d) Dramatic or dramatic-musical compositions.
- (e) Musical compositions.
- (f) Maps.
- (g) Works of art; models or designs for works of art.
- (h) Reproductions of a work of art.
- (i) Drawings or plastic works of a scientific or technical character.
- (j) Photographs.
- (k) Prints and pictorial illustrations.
- (l) Motion picture photo plays.
- (m) Motion pictures other than photo plays.

These specifications do not, however, limit the subject matter of copyright as defined in the law nor does any error in classification invalidate the copyright protection secured.

Copyright extends to the work of a foreign author or proprietor only in case he is domiciled in the United States at the time of the first publication of his work or if the country of which he is a citizen grants similar copyright protection to citizens of the United States.

Any person entitled thereto by the law may secure copyright for his work by publication thereof with the notice of copyright required by the act, and such notice shall be affixed to each copy published or offered for sale in the United

States. Such person may obtain registration of his claim to copyright by complying with the provisions of the act, including the deposit of copies, whereupon the register of copyrights shall issue to him a certificate as provided for in the law. Copyright may also be had of the works of an author of which copies are not reproduced for sale by the deposit with claim of copyright of one complete copy, if it be a lecture or similar production, or a dramatic or musical composition; of a title and description, with one print taken from each scene or act, if the work be a motion picture photo play; of a photographic print if it be a photograph; of a title and description, with not less than two prints taken from different sections of a complete motion picture, if the work be a motion picture other than a photo play, or of a photograph or other identifying reproduction thereof if it be a work of art or a plastic work or drawing.

After copyright has been secured there must be deposited in the copyright office in Washington, D. C., two complete copies of the best edition thereof, which copies, if the work be a book or periodical, shall have been produced in accordance with the manufacturing provisions of the act, or if such work be contained in a periodical for which contribution special registration is requested one copy of the issue or issues containing such contribution. Failure to deposit the copies within a given time after notice from the register of copyrights makes the proprietor of the copyright liable to a fine of \$100 and twice the retail price of the work, and the copyright becomes void.

The text of all books and periodicals specified in paragraphs (a) and (b) above, except the original text of a book of foreign origin in a language other than English, must in order to secure protection be printed from type set within the limits of the United States, either by hand, machinery or other process, and the printing of the text and the binding of the books must also be done within the United States. An affidavit of such manufacture is required.

The notice of copyright required consists either of the word "copyright" or the abbreviation "copr.," accompanied by the name of the copyright proprietor, and if the work be a printed literary, musical or dramatic work, the notice must also include the year in which the copyright was secured by publication. In the case, however, of copies of works specified in paragraphs (f) to (k) inclusive (given above) the notice may consist of the letter C inclosed within a circle, accompanied by the initials, monogram, mark or symbol of the copyright proprietor, provided his name appears elsewhere on the copies. In the case of a book or other printed publication the notice shall be applied on the title page or on the page immediately following, or if a periodical either upon the title page or upon the first page of text of each separate number or under the title heading; or if a musical work upon its title page or the first page of music.

Where the copyright proprietor has sought to comply with the law with respect to notice, the omission of such notice by mistake from a particular copy or copies shall not invalidate the copyright or prevent recovery for infringement against any person who, after actual notice of the copyright, begins an undertaking to infringe it, but shall prevent the recovery of damages against an innocent infringer who has been misled by the omission of the notice.

In the case of a book in English published abroad before publication in this country, the deposit in the copyright office within thirty days of one copy of the foreign edition, with a request for the reservation of the copyright, secures for the author or owner an ad interim copyright for thirty days after such deposit is made.

The copyright secured by the act endures for twenty-eight years from the date of the first publication. In the case of any posthumous work, periodical, encyclopedic or other composite work upon which the copyright was originally secured by the proprietor thereof, or of any work

copyrighted by a corporate body, or by an employer for whom such work is made for hire, the proprietor of such copyright shall be entitled to a renewal of the copyright in such work for the further term of twenty-eight years when application for such renewal shall have been made within one year prior to the expiration of the original term. In the case of any other copyrighted work, including a contribution by an individual author to a periodical or to a cyclopedic or other composite work when such contribution has been separately copyrighted, the author of such work, if living, or the heirs, executors or next of kin, if the author be dead, shall be entitled to a renewal of the copyright for a further term of twenty-eight years. In default of such application for renewal the copyright in any work shall end at the expiration of twenty-eight years.

If any person shall infringe the copyright in any work protected under the copyright laws of the United States, such person shall be liable:

(a) To an injunction restraining such infringement.

(b) To pay to the copyright proprietor such damages as the copyright proprietor may have suffered due to the infringement, as well as all the profits which the infringer shall have made from such infringement, and in proving profits the plaintiff shall be required to prove sales only and the defendant shall be required to prove every element of cost which he claims, or in lieu of actual damages or profits such damages as to the court shall appear to be just, and in assessing such damages the court may, in its discretion, allow the amounts as hereinafter stated (in numbered paragraphs), but in the case of a newspaper reproduction of a copyrighted photograph such damages shall not exceed the sum of \$200 nor be less than \$50, and such damages shall in no other case exceed the sum of \$250 and shall not be regarded as a penalty. In the case of the infringement of an undramatized or nondramatic work by means of motion pictures, where the infringer shows that he was not aware that he was infringing, the damages shall not exceed \$100 in the case of the infringement under like circumstances of a copyrighted dramatic or dramatic-musical work the entire sum recoverable shall not exceed \$5,000 nor be less than \$250.

1. In the case of a painting, statue or sculpture, \$10 for every infringing copy made or sold by or found in the possession of the infringer or his agents or employees.

2. In the case of any work enumerated in the list (given above) of works for which copyright may be asked, except a painting, statue or sculpture, \$1 for every infringing copy.

3. In the case of a lecture, sermon or address, \$50 for every infringing delivery.

4. In the case of dramatic or dramatic-musical or a choral or orchestral composition, \$100 for the first and \$50 for every subsequent infringing performance; in the case of other musical compositions, \$10 for every infringing performance.

(c) To deliver up on oath all articles alleged to infringe a copyright.

(d) To deliver up on oath for destruction all the infringing copies or devices, as well as all plates, molds, matrices or other means for making such infringing copies, as the court may order.

(e) Whenever the owner of a musical copyright has used or permitted the use of the copyrighted work upon the parts of musical instruments serving to reproduce mechanically the musical work, then in case of infringement by the unauthorized manufacture, use or sale of interchangeable parts, such as disks, rolls, bands or cylinders for use in mechanical music-producing machines, no criminal action shall be brought, but in a civil action an injunction may be granted upon such terms as the court may impose and the plaintiff shall be entitled to recover in lieu of profits and damages a royalty as provided in the act.

Any person who shall willfully and for profit infringe any copyright, or willfully aid or abet such infringement, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall

be punished by imprisonment for not exceeding one year or by a fine of not less than \$100 nor more than \$1,000, or both, in the discretion of the court. It is provided, however, that nothing in the act shall prevent the performance of religious or secular works, such as oratorios, cantatas, masses or octavo choruses by public schools, church choirs or vocal societies, provided the performance is for charitable or educational purposes and not for profit.

Any person who shall fraudulently place a copyright notice upon any uncopyrighted article, or shall fraudulently remove or alter the notice upon any copyrighted article, shall be deemed guilty of a misdemeanor and shall be subject to a fine of not less than \$100 nor more than \$1,000. Any person who shall knowingly sell or issue any article bearing a notice of United States copyright which has not been copyrighted in this country, or who shall knowingly import any article bearing such notice, shall be liable to a fine of \$100.

During the existence of the American copyright in any book the importation of any piratical copies thereof or of any copies not produced in accordance with the manufacturing provisions of the copyright law, or of any plates of the same not made from type set in this country, or any copies produced by lithographic or photo-engraving process not performed within the United States, is prohibited. Except as to piratical copies this does not apply:

(a) To works in raised characters for the blind;

(b) To a foreign newspaper or magazine, although containing matter copyrighted in the United States printed or reprinted by authority of the copyright owner, unless such newspaper or magazine contains also copyright matter printed without such authorization;

(c) To the authorized edition of a book in a foreign language of which only a translation into English has been copyrighted in this country;

(d) To any book published abroad with the authorization of the author or copyright proprietor under the following circumstances:

1. When imported, not more than one copy at a time, for individual use and not for sale, but such privilege of importation shall not extend to a foreign reprint of a book by an American author copyrighted in the United States;

2. When imported by or for the use of the United States;

3. When imported for use and not for sale, not more than one copy of any such book in any one invoice, in good faith, by or for any society or institution incorporated for educational, literary, philosophical, scientific or religious purposes, or for the encouragement of the fine arts, or for any college, academy, school or seminary of learning, or for any state school, college, university or free public library in the United States;

4. When such books form parts of libraries or collections purchased en bloc for the use of societies, institutions or libraries, or form parts of the library or personal baggage belonging to persons or families arriving from foreign countries and are not intended for sale.

No criminal actions shall be maintained under the copyright law unless the same be begun within three years after the cause of action arose.

Copyright may be assigned, mortgaged or bequeathed by will.

There shall be appointed by the Librarian of Congress a register of copyrights at a salary of \$4,000 a year and an assistant register at \$3,000 a year.

These with their subordinate assistants shall perform all the duties relating to the registration of copyrights. The register of copyrights shall keep such record books in the copyright office as are required to carry out the provisions of the law, and whenever deposit has been made in the copyright office of any work under the provisions of the act he shall make entry thereof.

In the case of each entry the person recorded as the claimant of the copyright shall be entitled to a certificate of registration under seal of the copyright office.

The register of copyrights shall receive and the persons to whom the services designated are rendered shall pay the following fees: For the registration of any work subject to copyright, \$1, which sum is to include a certificate of registration under seal; Provided, That in the case of photographs the fee shall be 50 cents where a certificate is not demanded, For every additional certificate of registration made, 50 cents, For recording and certifying any instrument of writing for the assignment of copyright or license, or for any copy of such certificate or license, duly certified, if not over 300 words in length, \$1; if more than 300 and less than 1,000, \$2; if more than 1,000 words in length, \$1 additional for each 1,000 words or fraction thereof over 300 words, For recording the notice of user or acquiescence specified in the act, 25 cents for each notice of not over fifty words and an additional

25 cents for each additional 100 words, For comparing any copy of an assignment with the record of such document in the copyright office and certifying the same under seal, \$1, For recording the extension or renewal of the copyright, 50 cents, For recording the transfer of the proprietorship of copyrighted articles, 10 cents for each title of a book or other article in addition to the fee for recording the instrument of assignment, For any requested search of copyright office records, indexes or deposits, 50 cents for each full hour consumed in making such search, Only one registration at one fee shall be required in the case of several volumes of the same book deposited at the same time.

APPLICATIONS FOR PATENTS.

[Condensed from rules of practice

Business with the patent office should be transacted in writing. All office letters must be sent in the name of the "commissioner of patents." On the propriety of making an application for a patent the inventor must judge for himself. The office is open to him and its records and models may be inspected either by himself or by any attorney or expert he may call to his aid. Pending applications are preserved in secrecy, but after a patent has issued the model, specification, drawings and all documents relating to the case are subject to general inspection, and copies, except of the model, are furnished at rates specified hereinafter.

An applicant may prosecute his own case, but he is advised, unless familiar with such matters, to employ a competent patent attorney, as the value of patents depends largely upon the skillful preparation of the specification and claims.

A patent may be obtained by any person who has invented or discovered any new and useful art, machine, manufacture or composition of matter, or any new and useful improvement thereof, not known or used by others in this country before his invention or discovery thereof, and not patented or described in any printed publication in this or any foreign country before his invention or discovery thereof, or more than two years prior to his application, and not patented in a country foreign to the United States, on an application filed by him or his legal representatives or assigns more than twelve months before his application, and not in public use or on sale in the United States for more than two years prior to his application, unless the same is proved to have been abandoned, upon payment of the fees required by law and other due proceedings had.

In the case of the death of the inventor, the application will be made by and the patent issue to his executor or administrator.

Applications for patents must be made to the commissioner of patents and must be signed by the inventor or in case of his death by his executor or administrator. A complete application comprises the first fee of \$15, a petition, specification and oath, all of which must be in the English language, and drawings when required. Papers for permanent record must be legibly written or printed in permanent ink. The application must be completed and prepared for examination within one year. The petition must be addressed to the commissioner of patents and must state the name, residence and postoffice address of the petitioner, designate by title the invention sought to be patented, contain a reference to the specification for a full disclosure of such invention and must be signed by the inventor.

The specification is a written description of the invention or discovery and of the manner and process of making, constructing, compounding and using the same, and is required to be in such full, clear, concise and exact terms as to enable any person skilled in the art or science to which the invention or discovery appertains,

in the United States patent office.]

or with which it is most nearly connected, to make, construct, compound and use the same. In case of a mere improvement the specification must particularly point out the parts to which the improvement relates, distinguishing clearly between what is old and what is claimed as new. The following order of arrangement should be observed in framing the specification: (a) Preamble stating the name and residence of the applicant and the title of the invention. (b) General statement of the object and nature of the invention. (c) Brief description of the several views of the drawing (if the invention admit of such illustration). (d) Detailed description. (e) Claim or claims. (f) Signature of applicant.

Two or more independent inventions cannot be claimed in one application; but where several distinct inventions are dependent upon each other and mutually contribute to produce a single result they may be claimed in one application. The applicant, if the inventor, must make oath or affirmation that he does verily believe himself to be the original and first inventor or discoverer of the art, machine, manufacture, composition or improvement for which he solicits a patent; that he does not know and does not believe that the same was ever known or used before his invention or discovery thereof, and shall state of what country he is a citizen and where he resides and whether he is a sole or joint inventor of the invention claimed in his application. In every original application the applicant must distinctly state under oath that to the best of his knowledge and belief the invention has not been in public use or on sale in the United States for more than two years prior to his application or patented or described in any printed publication in any country before his invention or more than two years prior to his application, or patented in any foreign country on an application filed by himself or his legal representatives or assigns more than twelve months prior to his application in this country. If any application for patent has been filed in any foreign country by the applicant in this country, or by his legal representatives or assigns, prior to his application in this country, he shall state the country or countries in which such application has been filed, giving the date of such application, and shall also state that no application has been filed in any other country or countries than those mentioned, and if no application for patent has been filed in any foreign country he shall so state. This oath must be subscribed to by the affiant.

The oath or affirmation may be made before any person within the United States authorized by law to administer oaths, or, when the applicant resides in a foreign country, before any minister, charge d'affaires, consul or commercial agent of the United States, or by any official authorized to administer oaths in the country in which the applicant may be.

Drawings must be made upon pure white paper of a thickness corresponding to a two-sheet or three-sheet Bristol board. The surface of

the paper must be calendered and smooth. India ink alone must be used to secure perfectly black and solid lines. The size of the sheet on which a drawing is made must be exactly ten by fifteen inches. One inch from its edges a single marginal line is to be drawn, leaving the "sight" precisely eight by thirteen inches. Within this margin all work and signatures must be included.

A model will be required or admitted as a part of the application only when on examination of the case in its regular order the primary examiner shall find it to be necessary or useful.

A design patent may be obtained by any person who has invented any new, original and ornamental design for an article of manufacture, not known or used by others in this country before his invention thereof, and not patented or described in any printed publication in this or any foreign country before his invention thereof, or more than two years prior to his application, and not caused to be patented by him in a foreign country on an application filed more than four months before his application in this country and not in public use or on sale in this country for more than two years prior to his application, unless the same is proved to have been abandoned, upon payment of the fees required by law and other due proceedings had, the same as in cases of inventions or discoveries.

Patents for designs are granted for three and one-half years, seven years or fourteen years as the applicant may elect. The proceedings in applications for patents for designs are substantially the same as in applications for other patents. The design must be represented by a drawing made to conform to the rules laid down for drawings of mechanical inventions.

A reissue is granted when the original patent is inoperative or invalid by reason of a defective or insufficient specification, or by reason of the patentee claiming as his invention or discovery more than he had a right to claim as new, provided the error has arisen through accident or mistake.

[For rules as to interferences, reconsideration of cases, appeals, hearings, motions, testimony, briefs and other technical or legal data, inventors are referred to the "Rules of practice," which may be obtained free from the United States patent office.]

Every patent shall issue within a period of three months from the date of the payment of the final fee. A patent will not be antedated. Every patent will contain a short title of the invention or discovery indicating its nature and object, and a grant to the patentee, his heirs and assigns, for the term of seventeen years, of the exclusive right to vend the invention or discovery throughout the United States and its territories.

Under the law passed by congress Feb. 20, 1905, and effective April 1, 1905, citizens of the United States, or foreigners living in countries affording similar privileges to citizens of the United States, may obtain registration of trade-marks used in commerce with foreign nations, or among the several states, or with Indian tribes, by complying with the following requirements: First, by filing in the patent office an application therefor in writing, addressed to the commissioner of patents, signed by the applicant, specifying his name, domicile, location and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used. With this statement shall be filed a drawing of the trade-mark, signed by the applicant or his attorney, and such number of specimens of the trade-mark as may be required by the commissioner of patents. Second, by paying into the treasury of the United States the sum of \$10 and otherwise complying with the require-

ments of the law and such regulations as may be prescribed by the commissioner of patents.

REGISTRATION OF TRADE-MARKS.

ments of the law and such regulations as may be prescribed by the commissioner of patents.

The application must be accompanied by a written declaration to the effect that the applicant believes himself to be the owner of the trade-mark sought to be registered and that no other person or corporation has the right to use it; that such trade-mark is in use and that the description and drawing presented are correct. Trade-marks consisting of or comprising immoral or scandalous matter, the coat of arms, flag or other insignia of the United States or of any state or foreign nation cannot be registered. Fees for renewal of trade-marks and for filing opposition to registration are \$10 each; for appeals from examiners to the commissioner of patents, \$15 each.

Further information may be had by applying to the commissioner of patents, Washington, D. C.

ACCIDENT TO WHALEBACK STEAMER CHRISTOPHER COLUMBUS.

Sixteen lives were lost by a peculiar accident to the whaleback excursion steamer Christopher Columbus in the river at Milwaukee, Wis., June 30, 1917. The craft was starting on its return trip to Chicago when it became unmanageable and ran into the river bank, where it struck one of the supports of a large steel water tank on top of a tower 100 feet high. The tank fell and hit the Columbus, carrying away part of the pilot house and the two upper decks and flooding the ship with water. There were some 400 excursionists and pupils in Chicago summer schools. In addition to the sixteen killed a number of other persons were severely injured.

PRODUCTION OF FUEL BRIQUETS.

The production of fuel briquets in the United States in 1916 was 295,155 net tons, valued at \$1,445,662, an increase compared with 1915 of 73,613 tons, or 33 per cent. in quantity, and \$409,946, or 40 per cent. in value. The production in 1916 was the greatest recorded, exceeding that of 1914, the previous high record, by 44,530 tons. This increase in the production of fuel briquets in 1916 was attributed to the improvement in

trade conditions arising from the unusual demand for coal and to a greater general appreciation of the value of briquets for use as household fuel. During the last two years the production of many of the plants has been so much improved that it gives off less of the heavy, tarry smoke that domestic consumers have found so objectionable.

Wyoming.....	122,393.64	183,805.78

Total.....9,700,000.00 14,550,000.00

Before making the apportionment, the secretary of agriculture, in accordance with the provisions of the act, deducted 3 per cent of the appropriation to meet the cost of administering the act. The remaining amounts were divided among the states as the act prescribes—one-third in the ratio of area, one-third in the ratio of population and one-third in the ratio of mileage of rural delivery routes and star routes. These are the second and third apportionments to be made under this act. For the fiscal year ending June 30, 1917, the appropriation was \$5,000,000. For succeeding years the total appropriation was as follows:

1918.....	\$10,000,000	1920.....	20,000,000
1919.....	15,000,000	1921.....	25,000,000

These sums do not include the \$1,000,000 which is appropriated each year for ten years for the development of roads and trails within or partly within the national forests.

PRODUCTION OF FURNACE FLUX.

The greatly increased activity in the iron and steel industries in 1916 caused an enormous increase in the quantity of limestone marketed for furnace flux, which amounted to 23,603,508 long tons, valued at \$13,936,882, an increase in quantity of 4,604,785 tons, or 24 per cent, and in value of \$4,264,535, or 44 per cent, compared with 1915. The average price per ton, according to returns made to the United States geological survey, department of the interior, increased from 51 to 59 cents. Pennsylvania, the leading state, increased its quantity from 8,625,636 to 10,019,046 long tons and its value from \$4,799,546

to \$6,768,374. Ohio was second, increasing its quantity from 2,698,321 to 3,281,324 long tons and its value from \$1,321,921 to \$1,636,991. Michigan was third, increasing its quantity from 2,254,984 to 3,033,155 long tons and its value from \$763,029 to \$1,207,326. West Virginia ranked fourth, increasing its quantity from 976,044 to 1,451,700 long tons and its value from \$518,827 to \$966,031. Illinois ranked fifth in quantity and sixth in value, with 1,120,175 long tons, valued at \$427,058, and Alabama ranked sixth in quantity and fifth in value, with 867,785 long tons, valued at \$807,344.

SOAPSTONE AND ITS PRODUCTION.

Soapstone is a massive rock so rich in talc as to have a soapy feel. It is more extensively quarried and used in the United States than in any other country. Its most important application, depending on its resistance to heat, acids and electricity, is in the manufacture of laundry tubs, laboratory table tops, tanks, sinks, fume hoods and switchboards and in general insulation, besides many smaller uses growing out

of its slow radiation of heat. There was a small production of soapstone in California in 1916, according to the United States geological survey, but almost the entire output of the United States came from Virginia, where there were four producing quarries. The total yield for 1916, including that of California, was 19,652 short tons.

GOV. FERGUSON OF TEXAS IMPEACHED.

Gov. James E. Ferguson of Texas was impeached by the Texas state senate sitting as a high court of impeachment Sept. 22, 1917, and was removed from office. His place was taken by William P. Hobby, whose tenure of office will extend to January, 1919. Twenty-one charges were contained in the bill returned against Gov. Ferguson by the house committee of the whole and ten of these were sustained by the senate. The

vote on the first article—that he used \$5,000 of the state funds to settle a personal obligation—was sufficient to convict. The ballot was 27 yeas to 4 nays. The other charges related to additional official misconduct, financial and otherwise, one being that he sought to coerce and influence the board of regents of the University of Texas and another that he sought to violate the law by removing regents without adequate cause.

EMERGENCY REVENUE.

The act of March 3, 1917, was to provide additional revenue to defray the expenses of increased appropriations for the army and navy and for other purposes. The revenue collected under this act and the prior act of Sept. 8, 1916, and also the act of Oct. 22, 1914, as extended by the joint resolution approved Dec. 17, 1915, amounted to \$85,297,553.88, which is included in the total of ordinary receipts, the sources from which and amounts realized being as follows:

Wines, champagnes, liqueurs, cordials, etc.	\$5,164,075.03
Grape brandy used in fortification of sweet wines	384,188.89
Fermented liquors (additional 50 cents per barrel)	30,365,168.73
Special taxes relating to manufacture and sale of tobacco, cigars and cigarettes	971,386.80
Special taxes, including corporations, bankers, brokers, theaters, bowling alleys, etc.	15,708,732.87
Schedule A (documentary stamps, etc.)	8,254,341.88
Schedule B (perfumery, cosmetics, etc.)	671,968.42
Excess profits tax	37,176.37
Estate tax	6,076,575.26
Munition manufacturers' tax	27,663,939.63
Total	95,297,553.88

A comparison of these receipts with those for the previous fiscal year cannot be advantageously made, as by the act of Sept. 8, 1916, various changes occurred in the wine schedule of taxes and in many of the special taxes. The rate of 55 cents on grape brandy used in fortifying sweet wines was reduced to 10 cents per proof gallon and some new taxes were added and others repealed, the changes taking effect at different times.

INDIVIDUAL INCOME TAX.

The receipts of income tax from individuals as classified to conform to provisions of the acts of Oct. 3, 1913, and Sept. 8, 1916, were as follows:

SPECIAL PROVISIONS.

TRADE AGREEMENTS.

For the purpose of readjusting the present duties on importations into the United States and at the same time to encourage the export trade of this country, the president of the United States is authorized and empowered to negotiate trade agreements with foreign nations wherein mutual concessions are made looking toward freer trade relations and further reciprocal expansion of trade and commerce: Provided, however, That said trade agreements before becoming operative shall be submitted to the congress of the United States for ratification or rejection.

MARKING AND BRANDING.

All articles of foreign manufacture or production which are capable of being marked, stamped, branded or labeled, without injury, shall be marked, stamped, branded or labeled in

legible English words, in a conspicuous place that shall not be covered or obscured by any subsequent attachments or arrangements, so as to indicate the country of origin. All packages containing imported articles shall be marked, stamped, branded or labeled so as to indicate legibly and plainly in English words the country of origin and the quantity of their contents.

DISCRIMINATING DUTIES.

A discriminating duty of 10 per centum ad valorem, in addition to the duties imposed by law, shall be levied, collected and paid on all goods, wares or merchandise which shall be imported in vessels not of the United States, or which, being the production or manufacture of any foreign country not contiguous to the United States, shall come into the United States from such contiguous country; but this discriminating duty shall not apply to goods, wares or merchandise which shall be imported in vessels not of the United States entitled at the time of such importation by treaty or convention or act of congress to be entered in the ports of the United States on payment of the same duties as shall then be payable on goods, wares and merchandise imported in vessels of the United States, nor to such foreign products or manufactures as shall be imported from such contiguous countries in the usual course of strictly retail trade.

No goods, wares or merchandise unless in cases provided for by treaty, shall be imported into the United States from any foreign port or place, except in vessels of the United States, or in such foreign vessels as truly and wholly belong to the citizens or subjects of that country of which the goods are the growth, production or manufacture, or from which such goods, wares or merchandise can only be, or most usually are, first shipped for transportation. All goods, wares or merchandise imported contrary to this section, and the vessel wherein the same shall be imported, shall be forfeited to the United States.

The preceding subsection shall not apply to vessels or goods, wares or merchandise imported in vessels of a foreign nation which does not maintain a similar regulation against vessels of the United States.

DISCOUNT FOR AMERICAN SHIPS.

A discount of 5 per centum on all duties imposed by this act shall be allowed on such goods, wares and merchandise as shall be imported in vessels admitted to registration under the laws of the United States: Provided, That nothing in this subsection shall be so construed as to abrogate or in any manner impair or affect the provisions of any treaty concluded between the United States and any foreign nation.

SYNOPSIS OF TARIFF LEGISLATION SINCE 1884.

Morrison Bills—First bill presented to 49th congress during Chester A. Arthur's administration; proposed a horizontal reduction of 20 per cent with free iron ore, coal and lumber; defeated in house April 15, 1884, by vote of 159 to 155; house heavily democratic and senate republican. Second bill presented to 49th congress during Grover Cleveland's first administration; similar to first bill, proposing free wool, salt and lumber; defeated in house June 17, 1886, by a vote of 157 to 149; house democratic, senate republican.

Mills Bill—Presented to 50th congress during Cleveland's first administration; provided for free lumber and wool, reduction on pig iron and abolition of specific duties on cotton; passed by house July 21, 1888, by vote of 162 to 149, but failed in senate; house democratic, senate republican.

McKinley Bill—Passed by 51st congress during Benjamin Harrison's administration; became law Oct. 6, 1890; high protective measure, though removing duties on sugar and providing for reciprocity treaties; both houses of congress republican.

Wilson Bill—Passed by 53d congress during Cleveland's second administration; became law Aug. 17, 1894, without the president's signature; both houses democratic; measure reduced duties in some cases and made additions to free list, notably wool.

Dingley Bill—Passed by 54th congress during McKinley's administration; approved July 24, 1897; passed by house 205 yeas to 122 nays, 27 members not voting; passed by senate 38 yeas to 28 nays, 23 not voting; house contained 206 republicans and 134 democrats and senate 46 republicans and 34 democrats; measure raised rates to produce more revenue, but was similar in many respects to the McKinley act.

Payne-Aldrich Bill—Passed at extra session of 61st congress in first year of President William H. Taft's administration; approved Aug. 5, 1909; passed the house by a vote of 217 to 161 and the senate by a vote of 45 to 34. The conference vote in the house was 195 yeas to 133 nays, twenty republicans voting in the negative and two democrats in the affirmative. In the senate the vote on the final conference report was 47 to 31, seven republicans voting against it. In general the revision of the Dingley act was in the direction of lower duties, but there were some increases.

Underwood-Simmons Bill—Passed by 63d congress at extra session called immediately after President Wilson's inauguration in 1913; house and senate democratic. The bill made many reductions in the tariff duties as fixed by the Payne-Aldrich law and placed numerous articles on the free list. It also contained a section establishing a tax on incomes.

DESCRIPTION OF CANAL.

The entire length of the Panama canal from
 deep water in the Atlantic to deep water in the
 Pacific is 50.5 miles. Its length on land is 40.5
 miles. In passing through the canal from the
 Atlantic to the Pacific a vessel enters a channel
 with a bottom width of 500 feet in Limon bay
 and follows this for about seven miles to Gatun,
 where it enters a series of three locks in flight
 and is lifted eighty-five feet to the level of the
 Gatun lake. It sails at full ocean speed through
 this lake, in a channel varying from 1,000
 to 500 feet in width, for a distance of about
 twenty-four miles, to Bas Obispo, where it en-
 ters the Culebra cut, which on April 28, 1915, was
 by executive order named the Gaillard cut in
 honor of Col. D. D. Gaillard, who died from
 disease contracted while a member of the isthmi-
 an canal commission. It sails through the cut
 a distance of about nine miles, in a channel
 with a bottom width of 300 feet, to Pedro Mi-
 guel. There it enters a lock and is lowered 30½
 feet to a small lake at an elevation of 54½
 feet above sea level, and sails through this for
 about ¼ mile to Miraflores. There it enters
 two locks in series and is lowered to sea level,
 passing out into the Pacific through a channel
 3½ miles in length, with a bottom width of 500

feet. The depth of the approach channel on the Atlantic side, where the tidal oscillation does not exceed 1½ feet, is 41 feet at mean tide, and on the Pacific side, where the maximum oscillation is 23 feet, the depth is 45 feet at mean tide.

GATUN DAM.

The Gatun dam, which forms Gatun lake by impounding the waters of the Chagres river and other streams, is nearly 1½ miles long measured on its crest, nearly half a mile wide at its base, about 400 feet wide at the water surface, about 100 feet wide at the top and its crest is at an elevation of 115 feet above mean sea level, or 30 feet above the normal level of the lake. The top and upstream slope are riprapped. The spillway is a concrete lined opening 1,200 feet long and 300 feet wide, cut through a hill of rock nearly in the center of the dam, the bottom of the opening being ten feet above sea level. It is fitted with gates and machinery for regulating the water level of the lake.

The water level of Gatun lake, extending through the Gaillard cut, is maintained at the south end by an earth dam connecting the locks at Pedro Miguel with the high ground to the westward, about 1,700 feet long, with its crest at an elevation of 105 feet above mean tide. A small lake between the locks at Pedro Miguel and Miraflores is formed by dams connecting the walls of Miraflores locks with the high ground on either side. The dam to the westward is of earth, about 2,700 feet long, having its crest about 15 feet above the water in Miraflores lake. The east dam is of concrete, about 500 feet long, and forms a spillway for Miraflores lake, with crest gates similar to those at the spillway of the Gatun dam.

GATUN LAKE.

Gatun lake covers an area of 164 square miles, with a depth in the ship channel varying from 35 to 45 feet. Throughout the first 16 miles from Gatun the width of the channel is 1,000 feet; then for 4 miles it is 800 feet and for 4 miles more 500 feet, when the entrance to Culebra cut, at Bas Obispo, is reached. The water level in the cut is that of the lake and the bottom width of the channel is 300 feet.

THE LOCKS.

There are twelve locks in the canal, all in duplicate: three pairs in flight at Gatun, with a combined lift of 85 feet; one pair at Pedro Miguel, with a lift of 30½ feet, and two pairs at Miraflores, with a combined lift of 54½ feet at mean tide. The dimensions of all are the same—a usable length of 1,000 feet and a usable width of 110 feet. Each lock is a chamber, with walls and floors of concrete and water tight gates at each end.

RULES FOR VESSELS.

Prior to sending a vessel through the Panama canal its owner or agent must make a deposit with the government to cover its canal expenses. Usually this deposit is made with an assistant United States treasurer. When the ship enters the harbor at either terminal port it is boarded by officers who examine its bill of health and clearance, see that its certificate of canal measurement is properly made out and ascertain what it needs in matters of fuel, supplies, extra men to handle the lines during the passage of the locks, etc. In all stages of its transit of the canal the vessel must have on board a government pilot. There is no charge for this service. As soon as the vessel starts on its transit of the canal the fact is telephoned to all the stations along the course so that there is exact knowledge at each station all the time of the status of the traffic. The course is equipped with all requisite signals and facilities for mooring, like sidings.

The transit of the canal requires about ten hours, of which approximately three hours are spent in the locks. In the sea level channels and the Gaillard cut the speed is limited to six knots; through Gatun lake vessels may make ten, twelve and fifteen knots, according to the width of the channel. In the locks the vessels are under control of the lock-operating force.

They are towed through the lock chambers by electric locomotives operating on tracks on the side walls. Six locomotives are used for the larger vessels, three on each wall. Two keep forward of the vessel, pulling and holding her head to the center of the chamber; two aft, holding the vessel in check, and two slightly forward of amidships, which do most of the towing. Except in the locks towing is not required and vessels proceed under their power. Tug service for sailing ships is at the rate of \$15 per hour.

TOLLS.

On merchant vessels carrying passengers or cargo, \$1.20 per net vessel ton—each 100 cubic feet—of actual earning capacity.

On vessels in ballast without passengers or cargo, 40 per cent less than the rate of tolls for vessels with passengers or cargo.

Upon naval vessels other than transports, colliers, hospital ships and supply ships, 50 cents per displacement ton.

Upon army and navy transports, colliers, hospital ships and supply ships, \$1.20 per net ton, the vessels to be measured by the same rules as are employed in determining the net tonnage of merchant vessels.

LABOR FORCE.

June 27, 1917, the actual working force of the Panama canal was 24,146, of whom 3,842 were employees of the Panama railroad. Of the total number, 20,597 were silver and 3,549 gold employees, the latter being composed almost exclusively of white Americans.

TRAFFIC THROUGH CANAL IN FISCAL YEAR 1917.

The total number of ships making the transit of the canal during the fiscal year ended June 30, 1917, in seagoing traffic was 1,876. In the fiscal year 1916 the total was 787; in 1915 it was

1,088. The aggregate gross and net tonnages of the 1,876 ships in the year 1917, according to the rules of measurement for the Panama canal, were 8,630,121 and 6,009,358 tons, respectively.

The cargo carried through the canal amounted to 7,229,255 tons of 2,240 pounds.

Ships making the passage of the canal without cargo, including naval ships and pleasure craft which did not carry cargo, as well as merchant ships in ballast, aggregated 284. Of these, 187 were in transit from the Atlantic to the Pacific, and 97 from the Pacific to the Atlantic; net tonnages were 574,881 and 219,907, respectively.

The average net tonnage of all ships was 3,203 tons. The average net tonnage of the ships carrying cargo was 3,275 tons. The average loading of the ships with cargo was 4,541 tons of 2,240 pounds.

The ratio of tons of cargo to net tonnage of ships with cargo was 1.386. As distributed over the aggregate of traffic, for each of the 6,009,358 net tons that passed through the canal there were handled 1.2 tons of cargo.

NATIONALITY OF VESSELS USING CANAL.

By nationality the vessels making the transit of the Panama canal in the fiscal year ended

June 30, 1917, were: United States, 464; British, 780; Chilean, 90; Costa Rican, 23; Cuban, 6; Danish, 43; Dutch, 74; French, 9; German, 6; Italian, 2; Japanese, 72; Mexican, 13; Nicaraguan, 2; Norwegian, 150; Panaman, 7; Peruvian, 86; Russian, 2; Spanish, 20; Swedish, 18; total, 1,876.

CANAL ZONE.

The Canal Zone contains about 448 square miles and in June, 1917, had a total population of 23,295. It begins at a point three marine miles from mean low water mark in each ocean and extends for five miles on each side of the center line of the route of the canal. It includes the group of islands in the Bay of Panama, named Perico, Naos, Culebra and Flamenco. The cities of Panama and Colon are excluded from the zone, but the United States has the right to enforce sanitary ordinances and maintain public order there in case the republic of Panama should not be able to do so.

PANAMA RAILROAD.

The Panama railroad and the steamships run in connection with it between New York and Colon are owned and operated by the United States government. It practically parallels the canal nearly the whole distance. It is 46½ miles long and runs between the cities of Colon and Panama.

ARCTIC AND ANTARCTIC EXPLORATION.

MAC MILLAN CROCKER LAND EXPEDITION.

Donald B. MacMillan and the other members of the arctic expedition organized under the auspices of the American Museum of Natural History and the American Geographical society arrived at Sydney, N. S., Aug. 26, 1917, after four years spent in the polar regions. As previously announced the explorers found that Crocker Land, which Peary thought he saw on his last expedition, had no existence, the conqueror of the north pole having evidently been deceived by a mirage. MacMillan and his companions did much surveying and exploring work in Finlay Land and other localities in the far north. Incidentally the route taken by Dr. Frederick Cook was retraced in company with one of his Eskimo companions on that famous trip, and it was proved that he had not come within many days of the pole. MacMillan also found some relics of the Elisha Kent Kane expedition at Rensselaer harbor.

SHACKLETON EXPEDITION.

Sir Ernest Shackleton returned to England in 1917 after having rescued seven members of his party who were stranded near Ross Barrier in the antarctic. These men, with three others, were left when the ship Aurora was forced by stormy weather to return to New Zealand in 1916. Capt. Mackintosh and V. G. Hayward perished in a blizzard in May that year near Cape Evans, while another member of the party, A. P. Spencer-Smith, died of scurvy. On his return to England Sir Ernest resumed active duty with the British navy.

KATMAI CRATER.

Word was received from the Griggs expedition to Mount Katmai, Alaska, in September, 1917, that it had returned to civilization after making some important discoveries in the great volcanic area. The Katmai crater was found to be more than nine miles in circumference and 3,600 feet deep. The party discovered a mud river seventeen miles long and mapped 1,600 square miles of territory. In the volcanic area there were found to be millions of active vents in the space of 100 square miles. The Katmai eruption in June, 1912, was one of the greatest in the history of the world.

INDUSTRIAL WORKERS OF THE WORLD TROUBLES.

Disturbances caused by the labor organization known as the Industrial Workers of the World, of which William D. Haywood of Chicago is the secretary-treasurer, were numerous and serious in 1917. The members of the society, who are believers in "syndicalism" and "direct action" and who seek to substitute labor rule for the police state, made themselves extremely obnoxious by organizing strikes on all sorts of pretexts, especially in the mining centers throughout the west. In Bisbee, Ariz., 1,286 of the I. W. W. were forcibly deported, July 12, by an organization calling itself the "Citizens' Protective league." The men were rounded up and placed on a train bound for Columbus, N. M. They were not wanted there and were kept on the cars until the Washington authorities ordered the troops on the Mexican border to see that they were given shelter and food. There were deportations of I. W. W. members from other towns in Arizona, New Mexico and Nevada.

Trouble was also caused by the organization in the lumber camps of Oregon, Washington and northern Idaho, in the Michigan copper mines and elsewhere. In Butte, Mont., where the mines were made almost entirely idle by the machinations of the I. W. W., one of the leaders of the organization, Frank Little, was hanged by a secret posse of six or seven men. It was charged that he had been extremely violent in his denunciation of the United States government and that in a public speech he had called United States soldiers "Uncle Sam's scabs in uniform."

CHRISTIAN SCIENCE CHURCH

The Christian Science church was founded in 1872 by Mary Baker Eddy, the discoverer of Christian Science and author of its textbook, "Science and Health, with Key to the Scriptures." The church was organized "to commemorate the word and works of our Master, which should restate primitive Christianity and its lost element of healing" (Church Manual). In 1892 the church was reorganized as the First Church of Christ, Scientist, known as the Mother

Church, in Boston, Mass. The present officers of the Mother Church are:

President—William D. McCrackan.

Clerk—Charles E. Jarvis.

Treasurer—Bliss Knapp.

Directors—Allison V. Stewart, James A. Neal, John V. Dittmore, Adam H. Dickey, Edward A. Merritt.

All Christian Science churches and societies in the United States and in foreign countries are branches of the Mother Church. Lesson-sermons compiled from the bible and "Science and Health, with Key to the Scriptures" are read at the services in Christian Science churches.

Mrs. Edy founded the Christian Science Journal, Sentinel, Quarterly, Der Herold der Christian Science and the Christian Science Monitor (a daily newspaper), all of which are published by the Christian Science Publishing society in Boston.

There is in connection with the Christian Science movement an official board of lecturership designed to furnish the public correct information concerning the fundamental teachings of Christian Science. Lectures given by members of this board are free to the public.

DEEP SALT BEDS.

In Kansas a deep well struck rock salt at 690 feet below the surface and penetrated 600 feet of rock salt in beds from five to sixty feet thick, according to the United States geological survey. A large area in this state is underlain by salt, which is mined by many shafts and

obtained by pumping brine. Drilling for oil in Texas and Louisiana has revealed the presence of tremendously thick deposits of rock salt at a depth of a few hundred feet. Thicknesses of 2,000 feet are common, and one drill hole passed through more than 3,000 feet of rock salt.

Commanderies have been established in twenty-one states. Total membership about 1,200.

The order is a military organization with patriotic objects, having for its scope the period of American history since national independence. It stands for the needed and honorable principle of national defense against foreign aggression. The principal feature of the order is the perpetuating of the names as well as the services of commissioned officers who served in either the war of the revolution, the war with Tripoli, the war of 1812, the Mexican war or the war with Spain or shall serve in future campaigns recognized by the United States government as war with foreign powers. Veteran companionship is conferred upon such officers and hereditary companionship upon their direct lineal descendants in the male line.

POSTAL INFORMATION.

DOMESTIC RATES.

FIRST-CLASS MATTER.

Rates of postage—Letters and other first-class matter, 3 cents for each ounce or fraction thereof. Postcards and postal cards, 2 cents each.

"Drop letters," addressed for delivery at the office where mailed, 2 cents for each ounce or fraction thereof when deposited at postoffices where letter carrier service is not established. There is no drop rate on mail other than letters.

The limit of weight of first-class matter is four pounds.

First-class matter includes written matter, namely, letters, postal cards, postcards (private mailing cards) and all matter wholly or partly in writing, whether sealed or unsealed (except manuscript copy accompanying proof sheets or corrected proof sheets of the same and the writing authorized by law on matter of other classes). Also matter sealed or otherwise closed against inspection.

Letters written and mailed by soldiers, sailors and marines assigned to foreign duty engaged in the present war may be mailed free of postage.

SECOND-CLASS MATTER.

Rate of postage—Newspapers and periodical publications of the second class, when sent unsealed by others than the publisher or a news agent, 1 cent for each four ounces or fraction thereof on each separately addressed copy or package of unaddressed copies. To be entitled to this rate the copies must be complete. Incomplete copies are third-class matter.

Second-class matter includes newspapers and periodicals bearing notice of entry as second-class matter. No limit of weight is prescribed.

On and after July 1, 1918, the rates of postage on publications entered as second-class matter, when sent by the publisher or a news agent to subscribers or to other agents for the purpose of sale, on the portion of a publication devoted to other matter than advertisements, shall be 1½ cents per pound or fraction thereof until July 1, 1919; after that 1½ cents per pound or fraction thereof; on the portion of a publication devoted to advertisements the rates per pound or fraction thereof for delivery within the several zones devoted to fourth-class matter shall be: From July 1, 1918, to July 1, 1919, for the 1st and 2d zones, 1½ cents; 3d zone, 1½ cents; 4th zone, 2 cents; 5th zone, 2½ cents; 6th zone, 2½ cents;

7th zone, 3 cents; 8th zone, 3½ cents; between July 1, 1919, and July 1, 1920, for 1st and 2d zones, 1½ cents; 3d zone, 2 cents, 4th zone, 3 cents; 5th zone, 3½ cents; 6th zone, 4 cents; 7th zone, 5 cents; 8th zone, 5½ cents; from July 1, 1920, to July 1, 1921, for 1st and 2d zones, 1½ cents; 3d zone, 2½ cents; 4th zone, 4 cents; 5th zone, 4½ cents; 6th zone, 5½ cents; 7th zone, 7 cents; 8th zone, 7½ cents; after July 1, 1921, for the 1st and 2d zones, 2 cents; 3d zone, 3 cents; 4th zone, 5 cents; 5th zone, 6 cents; 7th zone, 9 cents; 8th zone, 10 cents.

In the case of newspapers entitled to be entered as second-class matter and published in the interest of religious, educational, scientific, philanthropic, agricultural, labor or fraternal organizations, not organized for profit, the rates, irrespective of the zone in which delivered (except where the same are deposited in a letter carrier office for delivery by its carrier, in which case the old rate prevails), shall be 1½ cents a pound or fraction thereof between July 1, 1918, and July 1, 1919, and after that 1½ cents.

THIRD-CLASS MATTER.

Rate of postage—On unsealed third-class matter the rate is 1 cent for each two ounces or fraction thereof on each individually addressed piece or package.

Third-class matter embraces circulars, newspapers and periodicals not admitted to the second class, nor embraced in the term "book," miscellaneous printed matter on paper not having the nature of an actual personal correspondence, proof sheets, corrected proof sheets and manuscript copy accompanying the same, and matter in point print or raised characters used by the blind. (Books are included in fourth-class or parcel post mail.)

The limit of weight of third-class matter is four pounds.

FOURTH-CLASS MATTER (DOMESTIC PARCEL POST).

Fourth-class matter embraces that known as domestic parcel post mail and includes farm and factory products (and-books), not now embraced by law in either the first or second class or (with the exception of books) in the third class, not exceeding fifty pounds in weight (when mailed for delivery within the first or second zones, nor exceeding twenty pounds in weight when mailed for delivery within any of the other zones), nor greater in size than 8½ inches in length and girth combined, nor in form or

kind likely to injure the person of any postal employe or damage the mail equipment or other mail matter and not of a character perishable within a period reasonably required for transportation and delivery.

Rates of postage—To be fully prepaid—unsealed—are as follows:

(a) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance.

(b) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(c) Parcels weighing more than 8 ounces, containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are chargeable, according to distance or zone, at the pound rates shown in the following table, a fraction of a pound being considered a full pound.

ZONES—PARCEL POST GUIDE AND MAPS.

For parcel post purposes the United States is divided into units of area thirty minutes square. Such units form the basis of the eight postal zones. To ascertain in which zone a postoffice is located from the office of mailing, a parcel post guide, costing 55 cents, and map, costing 20 cents, are jointly used. The guide applies to all offices, but a separate map is required for each unit. A zone key is furnished with the guide for use in the units of area in which some of the largest postoffices are located, and makes the map for those units unnecessary. The guide and maps may be purchased by sending a money order to the third assistant postmaster-general, Washington, D. C. Stamps are not accepted.

INSURANCE OF FOURTH-CLASS MAIL.

Fees and conditions.—Fourth-class or domestic parcel post mail (but no other) may not be registered but may be insured against loss in an amount equivalent to its actual value, but not to exceed \$5 in any one case, on payment of a fee of 3 cents; not to exceed \$25 on payment of a fee of 5 cents; not to exceed \$50 on payment of a fee of 10 cents, or not to exceed \$100 on

payment of a fee of 25 cents, in addition to the postage, both to be prepaid by stamps affixed.

COLLECT-ON-DELIVERY SERVICE.

Conditions and fee.—Parcels of fourth-class or parcel post matter (but no other) may be sent C. O. D. from one domestic money order postoffice to another, including those in the Canal Zone, on payment of a fee of 10 cents in addition to the postage, both to be prepaid with stamps affixed. The amount to be collected and remitted to the sender must not exceed \$100. The remittance is made by postoffice money order, the fee therefor being included in the amount collected from the addressee. A C. O. D. tag furnished by the postmaster must be filled in by the sender and attached to the parcel. The C. O. D. fee also covers insurance against loss up to \$50.

POSTAL CARDS.

Postal cards are furnished at the postage value represented by the stamp impressed thereon; single postal cards for domestic and foreign correspondence at 2 cents and 3 cents each, respectively, and reply (double) postal cards at 3 cents and 5 cents each, respectively.

SPECIAL DELIVERY SERVICE.

Special delivery service is the prompt delivery of mail by messenger during prescribed hours to persons who reside within the carrier limits of city delivery offices, to patrons of rural service who reside more than one mile from postoffices but within one-half mile of rural routes, and to residents within one mile of any postoffice.

This service is obtained by placing on any letter or article of mail a special delivery stamp or 10 cents' worth of ordinary stamps in addition to the lawful postage. When ordinary stamps are used the words "Special Delivery" must be placed on the envelope or wrapper, directly under, but never on the stamps; otherwise the letter or article will not be accorded special delivery service.

REGISTRY SYSTEM.

Any matter, properly addressed and bearing the name and address of the sender, admissible to the domestic mails (except fourth-class mail, which may be insured), or to the postal union mails (except foreign "parcel post" packages for Barbados, Curaçao, Dutch Guiana, France, Great Britain, Guadeloupe, Martinique, the Netherlands and Uruguay), may be registered. Foreign "parcel post" mail must be taken to the postoffice to be registered, but other mail may be registered at any postoffice or postoffice station by rural carriers, and, when sealed and not cumbersome, by city carriers in residential districts.

The registry fee for each separate article, foreign or domestic, is 10 cents in addition to the postage, both to be fully prepaid.

Indemnity for lost registered mail will be paid as follows:

Domestic mail, first class (sealed), up to \$50, actual value; third class (unsealed), up to \$25, actual value.

Foreign mail, amount claimed within limit of 50 francs (\$9.65), for total loss (not partial loss or rifling) of a registered article exchanged between the United States and a postal union country, except foreign parcel post matter, and losses beyond control ("force majeure").

Application for a money order must be made on a form furnished for that purpose and be presented at the money order window of the postoffice or one of its stations. Money orders are issued for any desired amount from 1 cent to \$100, and when a larger sum than \$100 is to be sent any number of additional orders may be obtained. Applications may be made through rural carriers, who will furnish the necessary forms and give receipts for the amounts.

International money orders, payable in almost any part of the world, may be obtained at all of the larger postoffices and at many of the smaller ones.

Fees for money orders payable in the United

States (which includes Hawaii, Porto Rico and the Virgin islands) and its possessions, comprising the Canal Zone, Guam, the Philippines and Tutuila, Samoa; also for orders payable in Bermuda, British Guiana, British Honduras, Canada, Cuba, Mexico, Newfoundland, at the United States postal agency at Shanghai (China), in the Bahama islands and in certain other islands in the West Indies:

For orders from \$0.01 to \$2.50.....	3 cents
For orders from 2.51 to 5.00.....	5 cents
For orders from 5.01 to 10.00.....	8 cents
For orders from 10.01 to 20.00.....	10 cents
For orders from 20.01 to 30.00.....	12 cents
For orders from 30.01 to 40.00.....	15 cents
For orders from 40.01 to 50.00.....	18 cents
For orders from 50.01 to 60.00.....	20 cents
For orders from 60.01 to 75.00.....	25 cents
For orders from 75.01 to 100.00.....	30 cents

The fees for foreign money orders payable in any country on which a money order may be drawn, other than those named above, may be ascertained upon inquiry at the postoffice.

UNITED STATES CIVIL SERVICE.

Civil service act approved Jan. 16, 1883.

Officers—Three commissioners are appointed by the president to assist him in classifying the government offices and positions, formulating rules and enforcing the law. Their office is in Washington, D. C. The chief examiner is appointed by the commissioners to secure accuracy, uniformity and justice in the proceedings of the examining boards. The secretary to the commission is appointed by the president.

General Rules—The fundamental rules governing appointments to government positions are found in the civil service act itself. Based upon these are many other regulations formulated by the commission and promulgated by the president from time to time as new contingencies arise. The present rules were approved March 20, 1903, and went into effect April 15, 1903. In a general way they require that there must be free open examinations of applicants for positions in the public service; that appointments shall be made from those graded highest in the examinations; that appointments to the service in Washington shall be apportioned among the states and territories according to population; that there shall be a period (six months) of probation before any absolute appointment is made; that no person in the public service is for that reason obliged to contribute to any political fund or is subject to dismissal for refusing to so contribute; that no person in the public service has any right to use his official authority or influence to coerce the political action of any person. Applicants for positions shall not be questioned as to their political or religious beliefs and no discrimination shall be exercised against or in favor of any applicant or employee on account of his religion or politics. The classified civil service shall include all officers and employees in the executive civil service of the United States except laborers and persons whose appointments are subject to confirmation by the senate.

Examinations—These are conducted by boards of examiners chosen from among persons in government employ and are held twice a year in all the states and territories at convenient places. In Illinois, for example, they are usually held at Cairo, Chicago and Peoria. The dates are announced through the newspapers or by other means. They can always be learned by applying to the commission or to the nearest postoffice or custom house. Those who desire to take examinations are advised to write to the commission in Washington for the "Manual of Examinations," which is sent free to all applicants. It is revised semiannually to Jan. 1 and July 1. The January edition contains a schedule of the spring examinations and the July edition contains a schedule of the fall examinations. Full information is given as to the methods and rules governing examinations, manner of making application, qualifications required, regulations for rating examination papers, certification for and chances of appointment, and as far as possible it outlines the scope of the different subjects of general and technical examinations. These are practical in character and are designed to test the relative capacity and fitness to discharge the duties to be performed. It is necessary to obtain an average percentage of 70 to be eligible for appointment, except that applicants entitled to preference because of honorable discharge from the military or naval service for disability resulting from wounds or sickness incurred in the line of duty need obtain but 65 per cent. The period of eligibility is one year.

Qualifications of Applicants—No person will be examined who is not a citizen of the United States; who is not within the age limitations prescribed; who is physically disqualified for the service which he seeks; who has been guilty of criminal, infamous, dishonest or disgraceful conduct; who has been dismissed from the public

service for delinquency and misconduct or has failed to receive absolute appointment after probation; who is addicted to the habitual use of intoxicating liquors to excess, or who has made a false statement in his application. The age limitations in the more important branches of the public service are: Postoffice, 18 to 45 years; rural letter carriers, 17 to 55; internal revenue, 21 years and over; railway mail, 18 to 35; light-house, 18 to 50; life saving, 18 to 45; general departmental, 20 and over. These age limitations are subject to change by the commission. They do not apply to applicants of the preferred class. Applicants for the position of railway mail clerk must be at least 5 feet 6 inches in height, exclusive of boots or shoes, and weigh not less than 135 pounds in ordinary clothing and have no physical defects. Applicants for certain other positions have to come up to similar physical requirements.

Method of Appointment—Whenever a vacancy exists the appointing officer makes requisition upon the civil service commission for a certification of names to fill the vacancy, specifying the kind of position vacant, the sex desired and the salary. The commission thereupon takes from the proper register of eligibles the names of three persons standing highest of the sex called for and certifies them to the appointing officer, who is required to make the selection. He may choose any one of the three names, returning the other two to the register to await further certification. The time of examination is not considered, as the highest in average percentage on the register must be certified first. If after a probationary period of six months the name of the appointee is continued on the roll of the department in which he serves the appointment is considered absolute.

Removals—No person can be removed from a competitive position except for such cause as will promote the efficiency of the public service and for reasons given in writing. No examination of witnesses nor any trial shall be required except in the discretion of the officer making the removal.

Salaries—Entrance to the department service is usually in the lowest grades, the higher grades being generally filled by promotion. The usual entrance grade is about \$900, but the applicant may be appointed at \$840, \$760 or even \$600.

LAKES UNDER NEVADA DESERTS.

In an investigation made by O. E. Meinzer of the United States geological survey in Big Smoky valley and adjacent areas near Tonopah, Nev., the character of the vegetation and other surface criteria showed that ground water stands within ten feet of the surface over an area of 130,000 acres. The measurements made indicate that tens of thousands of acre-feet of water are annually contributed by mountain streams and by rainfall to the underground reservoir and that about the same quantity of ground water is annually discharged into the atmosphere through the soil and the plants in the shallow water areas. It was estimated that in an area of 240,000 acres the ground water lies within fifty feet of the surface, and that in an area of 335,000 acres it lies within 100 feet of the surface.

Many prominent beach ridges and other shore features were discovered, showing that at one time the valley contained two large lakes. One of these ancient lakes, which has been named Lake Tonopah, was about twenty-two miles long, covered about eighty-five square miles and had a maximum depth of about seventy feet; the other, which has been named Lake Toiyabe, was about forty miles long, covered about 225

square miles and had a maximum depth of about 170 feet. The greater part of the areas that were submerged by these lakes are now occupied by barren and desolate alkali flats, beneath which, however, a great quantity of water lies hidden.

COST OF LIVING IN THE UNITED STATES.

RETAIL PRICES OF FOOD.

The following table is from the Monthly Review of the bureau of labor statistics, Washington, D. C. It shows the average money retail prices and relative retail prices of food on the dates specified. The relative price shows the per cent that the average price on July 15 of each year was of the average price for the year 1916:

*16 ounces, weight of dough.

In the year from July 15, 1916, to July 15, 1917, prices of food as a whole advanced 32 per cent. Onions was the only article which was lower. Flour made the greatest jump—91 per cent. Potatoes were 83 per cent higher in July, 1917, than in the same month of the previous year. Cornmeal was 81 per cent higher, and beans were 67 per cent higher. Of the meats, pork advanced more than beef.

Comparing prices on July 15, 1914, just prior to the present war, with prices on July 15, 1917, food as a whole advanced 42 per cent. In July, 1917, flour was 125 per cent higher—that is, two and one-fourth times the price in July, 1914. Cornmeal was 89 per cent higher, lard was 78 per cent higher, sugar 75 per cent higher and potatoes and bread each 59 per cent higher.

WHOLESALE COMMODITY PRICES.

The mounting cost of living in the United States is also reflected in statistics of wholesale prices collected by the bureau of labor statistics for the first six months of 1917. Notable increases during this period are shown for the principal farm products, foodstuffs and metals and metal products. For all commodities included in the bureau's investigation, aggregating 294 distinct articles or price series, the increase for June over January was 23 per cent.

In the following table are shown the bureau's weighted index numbers for the first six months of 1917 by groups of commodities. The table also shows the number of articles or price series in each group, together with the per cent of increase for June as compared with January. Aggregate value of commodities exchanged in 1916 =100.

The New York Annalist's "Curve in the Cost of Living," or index number, which shows the fluctuations in the average wholesale price of twenty-five food commodities selected and arranged to represent a theoretical family's food budget, indicated that prices rose steadily from September and October in 1915 to May, 1917, when there was a decline, followed by another rise in August. The index number published Sept. 24, 1917, showed:

In five states in 1892 the electoral vote was divided: California gave 8 electoral votes for Cleveland and 1 for Harrison and Ohio gave 1 for Cleveland and 22 for Harrison; in Michigan, by act of the legislature, each congressional district voted separately for an elector; in Oregon 1 of the 4 candidates for electors of the people's party ticket was also on the democratic ticket; in North Dakota 1 of the 2 people's party electors cast his vote for Cleveland, this causing the electoral vote of the state to be equally divided

among Cleveland, Harrison and Weaver. In 1896 California gave 8 electoral votes to McKinley and 1 to Bryan; Kentucky gave 12 to McKinley and 1 to Bryan. In Maryland in 1904 7 of the presidential electors chosen were democrats and 1 republican. In 1908 Maryland elected 6 democratic and 2 republican electors. In 1912 California elected 11 progressive and 2 democratic electors. In 1916 West Virginia elected 1 democratic and 7 republican electors.

HOMESTEAD LAWS OF THE UNITED STATES.

For full information as to the method of acquiring homesteads on unappropriated public lands of the United States apply at the nearest federal land office or write to the general land office in the department of the interior, Washington, D. C. In general, it may be said that any person who is the head of a family or is 21 years old and a citizen of the United States, or has declared his intention to be such, and who is not the proprietor of more than 160 acres of land, is entitled to enter 160 acres of public land as a homestead. He is obliged to pay certain fees and commissions, ranging from \$7 to \$18, according to the amount of land entered and its location, to live upon the land for a certain length of time and to cultivate a certain amount of it. Recent laws provide for enlarged homesteads of 320 acres in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico,

North Dakota, South Dakota, Oregon, Utah, Washington and Wyoming, on nonmineral, nonirrigable and non timbered land; also for stock raising homesteads of 640 acres on land fit only for grazing or forage growing purposes.

UNITED STATES ARSENALS.

The largest of the United States arsenals are located at Rock Island, Ill., and Springfield, Mass. Others are at Pittsburgh, Pa.; Augusta, Ga.; Benicia, Cal.; Columbia, Tenn.; Fort Monroe, Va.; Philadelphia, Pa.; Indianapolis, Ind.; Governor's island, N. Y.; Jefferson barracks, Mo.; Sandy Hook, N. Y.; San Antonio, Tex.; Dover, N. J.; Watertown, Mass., and Watervliet, N. Y. Some of the above are merely powder depots, the principal manufacturing plants being at Rock Island, Springfield and Watervliet. The navy yards are also arsenals.

The residence requirement is continuous residence immediately prior to election day.

CITIZENSHIP IN THE UNITED STATES.

All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. (Fourteenth amendment to the constitution.)

All persons born in the United States and not subject to any foreign power, excluding Indians not taxed, are declared to be citizens of the United States. (Sec. 1992, U. S. Revised Statutes.)

All children heretofore born or hereafter born out of the limits and jurisdiction of the United States, whose fathers were or may be at the time of their birth citizens thereof, are declared to be citizens of the United States; but the rights of citizenship shall not descend to children whose fathers never resided in the United States. (Sec. 1993, U. S. Revised Statutes.)

Any woman who is now or may hereafter be married to a citizen of the United States and who might herself be lawfully naturalized shall be deemed a citizen. (Sec. 1995, U. S. Revised Statutes.)

Children born in the United States of alien parents are citizens of the United States.

When any alien who has declared his intention to become a citizen of the United States dies before he is actually naturalized the widow and minor children of such alien may, by complying with the other provisions of this act (June 29, 1906), be naturalized without making any declaration of intention. If a widow files an application for citizenship based on her husband's declaration of intention, the children who are under the age of 21 at the time she is naturalized will be citizens through her naturalization, but if the children are past the age of 21 and were born in a foreign country, it will be necessary for them to file petitions for naturalization in their own right, using their deceased

father's declaration of intention, provided they were under the age of 21 at the time of his death.

Children of Chinese parents who are themselves aliens and incapable of becoming naturalized are citizens of the United States.

Children born in the United States of persons engaged in the diplomatic service of foreign governments are not citizens of the United States.

Children born of alien parents on a vessel of a foreign country while within the waters of the United States are not citizens of the United States, but of the country to which the vessel belongs.

Children born of alien parents in the United States have the right to make an election of nationality when they reach their majority.

Minors and children are citizens within the meaning of the term as used in the constitution.

Deserters from the military or naval service of the United States are liable to loss of citizenship.

Any alien being a free white person, an alien of African nativity or of African descent may become an American citizen by complying with the naturalization laws.

"Hereafter no state court or court of the United States shall admit Chinese to citizenship; and all laws in conflict with this act are repealed." (Sec. 14, act of May 6, 1882.)

The courts have held that neither Chinese, Japanese, Hawaiians, Burmese nor Indians can be naturalized.

The naturalization laws apply to women as well as men. An alien woman who marries a citizen, native or naturalized, becomes a naturalized citizen of the United States.

Aliens may become citizens of the United States by treaties with foreign powers, by conquest or by special acts of congress.

In an act approved March 2, 1907, it is provided that any American citizen shall have expatriated himself when he has been naturalized in any foreign state in conformity with its laws, or when he has taken an oath of allegiance to any foreign state.

When any naturalized citizen shall have resided for two years in the foreign state from which he came, or five years in any other foreign state, it shall be presumed that he has ceased to be an American citizen, and the place of his general abode shall be deemed his place

of residence during said years: Provided, however, that such presumption may be overcome on the presentation of satisfactory evidence to a diplomatic or consular officer of the United States, under such rules and regulations as the department of state may prescribe; and provided also, that no American citizen shall be allowed to expatriate himself when this country is at war.

Any American woman who marries a foreigner shall take the nationality of her husband. At the termination of the marital relation she may resume her American citizenship, if abroad, by registering as an American citizen within one year with a consul of the United States, or by returning to reside in the United States, or, if residing in the United States at the termination of the marital relation, by continuing to reside therein.

Any foreign woman who acquires American citizenship by marriage to an American citizen shall be assumed to retain the same after the termination of the marital relation if she continue to reside in the United States, unless she makes formal renunciation thereof before a court having jurisdiction to naturalize aliens; or, if she resides abroad, she may retain her citizenship by registering as such before a United States consul within one year after the termination of such marital relation.

A child born without the United States of alien parents shall be deemed a citizen of the United States by virtue of the naturalization of or resumption of American citizenship of the parent: Provided, that such naturalization or resumption takes place during the minority of such child; and provided further, that the citizenship of such minor child shall begin at the time such minor child begins to reside permanently in the United States.

All children born outside the limits of the United States, who are citizens thereof in accordance with the provisions of section 1993 of the Revised Statutes of the United States (see above), and who continue to reside outside of the United States, shall, in order to receive the protection of the government, be required, upon reaching the age of 18 years, to record at an American consulate their intention to become residents and remain citizens of the United States and shall further be required to take the oath of allegiance to the United States upon attaining their majority.

Any alien of the age of 21 years and upward who may, under existing law, become a citizen of the United States, who has served or may hereafter serve for one enlistment of not less than four years in the United States navy, naval auxiliary, marine corps or revenue cutter (coast guard) service and received an honorable discharge with recommendation for re-enlistment, shall be admitted to become a citizen of the United States upon his petition without previous declaration of intention to become such, and without proof of residence on shore. (Act of June 30, 1914.)

NATURALIZATION LAWS.

Approved June 29, 1906.

Exclusive jurisdiction to naturalize aliens resident in their districts is conferred upon the United States Circuit and District courts and all courts of record having a seal, a clerk and jurisdiction in actions in law or equity or both in which the amount in controversy is unlimited.

An alien may be admitted to citizenship in the following manner and not otherwise:

1. He shall declare on oath before the clerk of the proper court at least two years before his admission, and after he has reached the age of 18 years, that it is bona fide his intention to become a citizen of the United States and to renounce allegiance to his foreign state or sovereignty. Such declaration shall set forth the same facts as are registered at the time of his arrival.

2. Not less than two years nor more than seven after he has made such declaration he shall file a petition, signed by himself and verified, in

which he shall state his name, place of residence, occupation, date and place of birth, place from which he emigrated, name of the vessel on which he arrived, the time when and the place and name of the court where he declared his intention of becoming a citizen; if he is married, he shall state the name of his wife, the country of her nativity and her place of residence at the time the petition is filed, and if he has children, the name, date and place of birth and place of residence of each child living. The petitioner shall also set forth that he is not a disbeliever in or opposed to organized government or a member of any body of persons opposed to organized government, and that he is not a polygamist or a believer in polygamy; that he intends to become a citizen of and to live permanently in the United States, and every other fact material to his naturalization and required to be proved upon the final hearing of his application. The petition shall be verified by the affidavits of at least two credible witnesses who are citizens. At the time of the filing of the petition there shall be also filed a certificate from the department of commerce and labor stating the date, place and manner of his arrival in the United States and the declaration of intention of such petitioner, which certificate and declaration shall be attached to and be a part of his petition.

3. He shall, before he is admitted to citizenship, declare on oath in open court that he will support the constitution of the United States, and that he absolutely renounces all allegiance to any foreign prince, potentate, state or sovereignty.

4. It shall be made apparent to the satisfaction of the court admitting any alien to citizenship that immediately preceding the date of his application he has resided continuously within the United States five years at least, and within the state or territory where such court is at the time held one year at least, and that during that time he has behaved as a man of good moral character, attached to the principles of the constitution. In addition to the oath of the applicant, the testimony of at least two witnesses, citizens of the United States, as to the facts of residence, moral character and attachment to the principles of the constitution shall be required.

5. He must renounce any hereditary title or order of nobility which he may possess.

6. When any alien who has declared his intention dies before he is actually naturalized the widow and minor children may, by complying with the other provisions of the act, be naturalized without making any declaration of intention.

Immediately after the filing of the petition the clerk of the court shall give notice thereof by posting in a public place the name, nativity and residence of the alien, the date and place of his arrival in the United States and the date for the final hearing of his petition and the names of the witnesses whom the applicant expects to summon in his behalf. Persons for naturalization may be filed at any time, but final hearing thereon shall be had only on stated days and in no case until at least ninety days have elapsed after the filing of the petition. No person shall be naturalized within thirty days preceding a general election within the territorial jurisdiction of the court.

No person who disbelieves in or who is opposed to organized government, or who is a member of or affiliated with any organization entertaining and teaching such disbelief in or opposition to organized government, or who advocates or teaches the duty, necessity or propriety of the unlawful assaulting or killing of any officer or officers of the government of the United States, or of any other organized government, because of his or their official character, or who is a polygamist, shall be naturalized.

No alien shall hereafter be naturalized or admitted as a citizen of the United States who cannot speak the English language. This requirement does not apply to those physically unable to comply with it, or to those making homestead entries upon the public lands of the United States.

ORIGIN OF VARIOUS LIMESTONES.

Ordinary or pure limestone, according to investigations made by the United States geological survey, is formed by molluscan shells and corals consisting of carbonate of lime; magnesian limestones are formed in large part by Foraminifera, the corals known as sea fans, and the echinoderms, which include crinoids, sea urchins and star fishes, all of which are rich in carbonate of magnesia, while phosphatic limestones or rocks owe their phosphates in large part to brachiopods, annelids and crustaceans.

SUPREME COURT BILLBOARD DECISION.

In a decision announced Jan. 15, 1917, the United States Supreme court held valid a Chicago billboard ordinance passed in 1911 prohibiting billboards on residence streets without the consent of more than half of the property owners in the block where a billboard is put up.

APPORTIONMENT OF REPRESENTATIVES.

[From census bureau report.]

The apportionment of representatives in congress, under the first six censuses—1790 to 1840, inclusive—was made by congress, each by a separate act. The law for taking the census of 1850 which was intended to be permanent, presented a rule of apportionment, fixed the number of members of the house at 233 and directed the secretary of the interior thereafter to make the apportionment. The apportionment of 1860 was also made under this law, but congress, on March 4, 1862, fixed the total number of representatives at 241, and the secretary of the interior apportioned the new quotas to the states. The apportionments from and after the census of 1870 were made by congress, each by a separate act, hence it may be assumed that the power conferred on the secretary of the interior by the act of May 23, 1850, was repealed by implication. The fol-

lowing shows the dates of the apportionment acts and the ratio of population to each representative:

DEATH OF ADMIRAL GEORGE DEWEY.

Admiral George Dewey of the United States navy died at his home in Washington, D. C., Tuesday afternoon, Jan. 16, 1917, after an illness of less than a week. He had, however, been gradually failing for a year and a half from ailments incident to old age. The immediate cause of his death was arteriosclerosis. Admiral Dewey was born Dec. 26, 1837, in Montpelier, Vt. He chose a naval career, was graduated from Annapolis in 1858 and served in the civil

war as a lieutenant. In 1898, while commander of the Asiatic squadron, he fought and won the battle of Manila bay, destroying the Spanish Asiatic squadron under Admiral Montojo, without the loss of a ship or man under his own command. He was made admiral of the navy in 1899 and from March 29, 1900, to the time of his death he was president of the general board. He was buried in Arlington National cemetery.

IMPEACHMENT CASES IN THE UNITED STATES.

BEFORE UNITED STATES SENATE.

The senate has sat as a court of impeachment in the cases of the following accused officials, with the result stated:

William Blount, senator from Tennessee, in 1799; charges dismissed for want of jurisdiction, Blount having resigned previously.

John Pickens, judge of the United States District court for New Hampshire; removed from office in 1804.

Samuel Chase, associate justice of the Supreme court of the United States; acquitted 1805.

James H. Peck, judge of the United States District court for Missouri; acquitted 1831.

West H. Humphreys, judge of the United States District court for Tennessee; removed from office, 1862.

Andrew Johnson, president of the United States; acquitted 1868.

William W. Belknap, secretary of war; acquitted 1876.

Charles Swayne, judge of the United States District court for the northern district of Florida; acquitted 1905.

Robert W. Archbald, associate judge of the United States Commerce court; convicted 1913.

AGAINST GOVERNORS.

Nine governors in the United States have faced impeachment proceedings. These men and the results that followed were:

Charles Robinson, Kansas, 1862; acquitted.

Harrison Reed, Florida, 1868; charges dropped.

Wm. W. Holden, North Carolina, 1870; removed.

Powell Clayton, Arkansas, 1871; charges dropped.

David Butler, Nebraska, 1871; removed.

Henry C. Warmoth, Louisiana, 1872; term expired and proceedings dropped.

Adebert Ames, Mississippi, 1876; resigned.

William Sulzer, New York, 1913; removed.

SPECIAL LABOR COMMISSION.

Appointed by President Wilson Sept. 19, 1917.

William B. Wilson, secretary of labor, chairman.
Col. J. L. Spangler, Pennsylvania.
Vernez Z. Reed, Colorado.
John H. Walker, Illinois.
E. P. Marsh, Washington.
Secretary of Commission—Felix Frankfurter, New York.

It is the duty of the commission to visit localities where labor troubles are most frequent and, as the personal representatives of the president, to call on the governors of the states where the difficulties are with a view to lending sympathetic counsel and aid to the state governments in the development of a better understanding be-

tween laborers and employers. It is not expected to hold formal public hearings, but to get into touch with both sides by the more informal process of personal conversation.

FEDERAL WORKMEN'S COMPENSATION COMMISSION.

Appointed by President Wilson Jan. 5, 1917.

Dr. Riley McMillan Little of Swarthmore, Pa., a republican, for a term of six years.
Mrs. Frances C. Axtell of Bellingham, Wash., a progressive, for a term of four years.
John J. Keegan of Indianapolis, a democrat, for a term of two years.

AMERICA FIRST IN FRUIT EXPORTS.

The United States leads the world in the export of fruit, according to figures furnished by the agricultural department in Washington, D. C. In 1910 the value of the fruit exported was \$18,505,000, while in 1915 it was \$34,230,000. Fresh and dried apples constituted one-third of the value of these exports. Italy and Spain are second and third, respectively. During the five years from 1909 to 1913 the average value of the fruit exports from Italy was \$21,492,000 and from Spain \$21,353,000. Lemons constituted in value one-third of the fruit exports from

Italy, and oranges one-half of those from Spain.

With reference to imports of fruit, the three leading nations are the United Kingdom, Germany and the United States. Countries which lead in the cultivation for export of some particular kind of fruit are Asiatic Turkey for dates, raisins and dried figs, Greece for dried currants, Hawaii for canned pineapples, Italy for lemons, Jamaica for bananas, Japan for persimmons, Spain for oranges, table grapes and pickled olives, and the United States for prunes.

THE SMITHSONIAN INSTITUTION IN WASHINGTON.

The Smithsonian institution was established by statute in 1846, under the terms of the will of James Smithsonian, who bequeathed his fortune in 1826 to the United States for the "increase and diffusion of knowledge among men." From the income of the fund a building, known as the Smithsonian building, was erected in Washington, D. C., on land given by the United States. The institution is legally an establishment having as its members the president and vice-president of the United States, the chief justice and the president's cabinet. It is governed by a board of regents consisting of the vice-president, the chief justice, three members of the United States senate, three members of the house of representatives and six citizens appointed by

joint resolution of congress. It is under the immediate direction of the secretary of the Smithsonian institution, who is the executive officer of the board and the director of the institution's activities. The institution aids investigators by making grants for research and exploration, providing for lectures, initiating scientific projects and publishing scientific papers. It has administrative charge of the national museum, the national gallery of art, the international exchange service, the national zoological park, the astrophysical observatory and the regional bureau for the international catalogue of scientific literature. The institution's original endowment of \$541,000 has been increased by gifts and accumulated interest. The secretary of the institution is Charles D. Walcott.

COMMONWEALTH OF AUSTRALIA.

July 9, 1900, the British parliament passed an
act empowering the six provinces of Australia to
form a federal union and Jan. 1, 1901, the new
commonwealth was proclaimed at Sydney, N. S.
W. Its first parliament was opened May 9, 1901,
by the prince of Wales (now George V.), heir-
apparent to the British throne, acting for his
father, King Edward VII. The capital at present
is in Melbourne.

Government—The federal parliament is made up
of a senate of thirty-six members, six from
each original state, and a house of representa-
tives of seventy-five members, apportioned as
follows: New South Wales, 27; Victoria, 21;
Queensland, 10; South Australia, 7; Western
Australia, 5; Tasmania, 5. The king is repre-
sented by the governor-general. He and the
council of seven ministers exercise the execu-
tive power. The governor-general is paid a
salary of \$50,000 a year. The governor-general
is Ronald C. Munro-Ferguson. The ministers
are: W. M. Hughes, prime minister; W. A.
Watt, public works and railways; J. A. Jen-

UNION OF SOUTH AFRICA.

Sept. 29, 1900, the British parliament passed an
act empowering the four self-governing colonies

of South Africa—Cape of Good Hope, Natal,
Transvaal and Orange Free State—to form a
federal government to be known as the Union of
South Africa. This was proclaimed May 31, 1900,
at Pretoria, the seat of government, other ser-
vices taking place at Cape Town, the seat of the
legislature.

The executive government is vested in the king,
represented by a governor-general, and an ex-
ecutive council and in ten ministers of state.
Legislative power is vested in a parliament con-
sisting of a senate and a house of assembly.
The senate contains forty members, eight of
whom are nominated by the governor-general in
council and thirty-two elected by the four pro-
vinces, each of which is entitled to eight senators.
The assembly consists of 121 members, chosen in
electoral divisions as follows: The Cape of Good
Hope, 51; Natal, 17; Transvaal, 38; Orange Free
State, 17. Senators are elected for ten years and
assemblymen for five. The English and Dutch
languages are both official.

Imports and Exports—The total imports of the
four states in 1916 were valued at \$201,999,700
and the exports at \$118,795,900. Exports to the
United States in 1917, \$15,512,157; imports, \$23,-

ALBANIA.

Albania is an autonomous kingdom created at a
conference of ambassadors in London May 30,
1913, as a result of the Balkan wars. Its terri-
tory formerly comprised the Turkish provinces of
Scutari and Yanina. It has an area of 11,317
square miles and a population of nearly 1,000,000.
Until the outbreak of the European war in Au-
gust, 1914, it was governed by a king (impret)
and an international commission. William I,
prince of Wied, was the first king, but he was
on the throne only half a year, an insurrection
compelling him to leave the capital, Durazzo,
Sept. 2, 1914. Since then the country has been
in a state of disorder. The Austrians captured
the greater part of it in the winter of 1915-1916.

NONCONTIGUOUS POSSESSIONS OF THE UNITED STATES.

THE PHILIPPINE ISLANDS.

The Philippine islands were ceded to the United States by Spain Dec. 10, 1898. Maj.-Gen. Merritt was the first military governor. He was succeeded in August, 1899, by Maj.-Gen. E. S. Otis, who in turn was followed in May, 1900, by Maj.-Gen. Arthur MacArthur. The last named remained in office until July 4, 1901, when the military authority was transferred to Gen. A. B. Chaffee. By order of the president Gen. Chaffee was relieved of his duties as military governor July 4, 1902, and the office terminated. The Philippine commission was at the same time made the superior authority. Sept. 2 the islands were divided into three military departments, to be known as the department of Luzon, the department of Visayas and the department of Mindanao.

July 1, 1902, congress passed an act providing temporarily for the government of the Philippines, providing for the election by popular vote, two years after a census of the islands had been taken and published, of delegates to an assembly consisting of not more than 100 members nor less than fifty, apportioned among the provinces as nearly as possible according to population. The first election was held July 20, 1907, when eighty members of the legislature were chosen. The first session was formally opened Oct. 16 by William H. Taft, the first civil governor of the islands after they came into American possession.

By act of congress approved Aug. 29, 1916, the legislative authority is vested in the Philippine legislature, composed of two houses, one the senate and the other the house of representatives. The senate consists of twenty-four senators and the house of representatives of ninety members. The legislature created under this law opened its first session on Oct. 16, 1916, and on its being organized the Philippine commission ceased to exist and the members thereof vacated their offices. Sergio Osmeña was elected speaker of the house and Manuel Quezon president of the senate.

AMERICAN-JAPANESE AGREEMENT AS TO CHINA.

On Friday, Nov. 2, 1917, the secretary of state and Viscount Ishii, the special Japanese ambassador, exchanged at the department of state the following notes dealing with the policy of the United States and Japan in regard to China:

"Department of State, Washington, D. C., Nov. 2, 1917:

"Excellency:

"I have the honor to communicate herein my understanding of the agreement reached by us in our recent conversations touching the questions of mutual interest to our governments relating to the republic of China.

"In order to silence mischievous reports that have from time to time been circulated, it is believed by us that a public announcement once more of the desires and intentions shared by our two governments with regard to China is advisable.

"The governments of the United States and Japan recognize that territorial propinquity creates special relations between countries and consequently the government of the United States recognizes that Japan has special interests in China, particularly in the part to which her possessions are contiguous.

"The territorial sovereignty of China, nevertheless, remains unimpaired, and the government of the United States has every confidence in the repeated assurances of the imperial Japanese government that while geographical position gives Japan such special interests they have no desire to discriminate against the trade of other nations or to disregard the commercial rights heretofore granted by China in treaties with other powers.

"The governments of the United States and Japan deny that they have any purpose to infringe in any way the independence or territorial integrity of China and they declare, fur-

thermore, that they always adhere to the principle of the so-called 'open door' or equal opportunity for commerce and industry in China.

"Moreover, they mutually declare that they are opposed to the acquisition by any government of any special rights or privileges that would affect the independence or territorial integrity of China or that would deny to the subjects or citizens of any country the full enjoyment of equal opportunity in the commerce and industry of China.

"I shall be glad to have your excellency confirm this understanding of the agreement reached by us.

"Accept, excellency, the renewed assurance of my highest consideration.

"ROBERT LANSING.

"His Excellency Viscount Kikujiro Ishii, Ambassador Extraordinary and Plenipotentiary of Japan on Special Mission. The Special Mission of Japan."

VISCOUNT ISHII'S REPLY.

"Washington, D. C., Nov. 2, 1917.

"Sir:

"I have the honor to acknowledge the receipt of your note of to-day communicating to me your understanding of the agreement reached by us in our recent conversations touching the questions of mutual interest to our governments relating to the republic of China.

"I am happy to be able to confirm to you, under authorization of my government, the understanding in question set forth in the following terms:

"(Here the special ambassador repeats the language of the agreement as given in Secretary Lansing's note.)

K. ISHII.

"Ambassador Extraordinary and Plenipotentiary of Japan on Special Mission.

"Honorable Robert Lansing, secretary of state."

IMPERIALIST PLOT DEFEATED IN CHINA.

China had another troubled year, with internal dissensions, troubles with Japan and German intrigues to contend against. Aside from various local and provincial rebellions the republic had to withstand a second attempt to revive the Manchu monarchical regime. The first attempt was made under the leadership of Yuan Shih-kai in 1915-1916, but was defeated by the vote of the people. Yuan Shih-kai died June 6, 1916, and was succeeded in the office of president by Li Yuan-hung, the vice-president. Tuan Chi-jui was appointed premier.

In March, 1917, the relations between China and Germany became acute. The Chinese cabinet favored the severing of relations, but Li Yuan-hung and many members of parliament opposed it. Premier Tuan Chi-jui resigned March 4, but resumed office when the president promised to give the cabinet full power to frame the country's foreign policy. Relations with Germany were severed March 14 and China aligned herself with the entente and finally on Aug. 14 declared war on Germany and Austria-Hungary. Before that time, however, the attempt to replace the young emperor Hsuan Tung on the throne was made and defeated. In June Gen. Chang Hsun, military governor of the province of Anhwei, led a revolt and formed a provisional government. He demanded that the Pekin government dissolve parliament within forty-eight hours. He enforced the demand by sending soldiers to Pekin, compelling the president to obey.

On the 2d of July the young emperor, who had abdicated the throne Feb. 12, 1912, was declared the lawful ruler of China by Gen. Chang Hsun and his followers. He took possession of the palace and President Li Yuan-hung resigned. The latter, however, refused to recognize the restoration of the empire and designated as his successor Vice-President Feng Kwo-chang. Gen. Chang Hsun assumed the office of premier and Li Yuan-hung took refuge in the Japanese embassy. The royalist coup d'etat failed to win the favor of the northern military leaders and after less than a week on the throne Hsuan Tung abdicated. Feng Kwo-chang became president as Li Yuan-hung refused to resume office, and Tuan Chi-jui, who had led the republican troops against the imperialists, was reinstated in his position as premier. Wang Tah-sieh was made minister of foreign affairs. Not long after this the republic declared war on Germany and Austria-Hungary and but for some difference with Japan as to certain special privileges demanded by the Tokyo government had no further serious trouble to contend with.

It developed that the imperialists were backed by German influences and that the plan was to thwart American, Japanese and other allied interests in the republic and to prevent the government from entering the war. Apparently it was also hoped that Japan and America would become involved in a controversy over China. This move, however, was frustrated by the agreement entered into by these countries in November.

THE CARNEGIE FOUNDATION FOR THE ADVANCEMENT OF TEACHING.

The Carnegie Foundation for the Advancement of Teaching was founded by Andrew Carnegie in 1906 and incorporated by the congress of the United States in 1906 for the purpose of providing retiring allowances for teachers and officers of universities, colleges and technical schools in the United States, Canada and Newfoundland, and, in general, of advancing the profession of the teacher and the cause of higher education.

In the administration of its endowment, which now amounts to \$15,000,000, the foundation has

restricted its allowances to professors and officers in a list of seventy-three institutions, selected for their educational standing and has published a series of widely influential reports and bulletins concerning educational conditions. The president of the foundation is Henry S. Pritchett; its trustees are presidents of universities and colleges and financiers. Further information may be had by addressing the secretary, Clyde Furst, 576 5th avenue, New York.

 Office—Southern building, Washington, D. C.

The board of mediation and conciliation, created by act of congress approved July 15, 1913, was established to settle by mediation, conciliation and arbitration controversies concerning wages, hours of labor or conditions of employ-

ment that may arise between common carriers engaged in interstate transportation and their employees engaged in train operation or train service. Whenever such a controversy arises, interrupting or threatening to interrupt the operation of trains to the serious detriment of the public interest, upon the request of either party the board of mediation is required to use its best efforts by mediation and conciliation to bring about an agreement. If such efforts are unsuccessful, the board endeavors to induce the parties to submit their controversy to arbitration and, if successful, makes the necessary arrangements for such arbitration. The board is an independent office.
